96 Randolph Avenue and Highland Street.

*Special Signals.

Directions for Sounding an Alarm

Open outside door of Fire Alarm Box, then pull the hook down ONCE and let go. Remain at Box until arrival of Firemen and direct them to the Fire.

Signals

1 One blow, 7.30 a. m., 12 m., 5.45 p. m. Fire Alarm Tests
1 - 1 Two blows, Recall.
1 - 1 - 1 Three blows followed by four rounds of box number, general alarm.

Signal for No School

The signal 2-2 sounded four times on the fire alarm at
7.15 o'clock means no school sessions for all schools for entire day.
7.30 o'clock means no sessions for all schools below the Junior Hlgh School for the entire day.
11.40 o'clock means no afternoon session for all schools below the Junior High School — this signal will not be sounded if the 7:15 signal has been sounded.
The 7:15 signal will rarely be sounded as it includes the closing of the High and Junior High Schools.
If the 7.15 signal is given, the 7.30 signal will be unnecessary.

J. HARRY HOLMES, Chief of Department.

Emergency call for Fire Department should be "Milton Fire Department—Emergency"

REPORT OF TOWN ACCOUNTANT

Milton, Mass., January 15, 1930.

To the Honorable Board of Selectmen:

In accordance with the Revised By-Laws of the Town of Milton, and General Laws, Chapters 41 and 44, the books and accounts of all officers and committees intrusted with the expenditures of money, and all original bills and vouchers on which moneys have been paid from the treasury for the year ending December 31, 1929, have been examined and found correct.

In only two cases when bills were submitted for payment did I refuse to place them on the Treasurer's Warrant. The School Department submitted bills payable to the Milton High School Athletic Association for services of officials at games played between the school teams of the Town of Milton and teams from other municipalities and as this is not a purpose for which the School Department is authorized to expend public money I was forced to return these bills to them. The Sewer Department submitted several bills pertaining to the East Milton sewer and drain job, for which there was a specific appropriation, requesting that they be charged against the general sewer construction account, but as this could not be done I returned the bills to the Sewer Department requesting that they be held until such time as the town in town meeting takes some action regarding their payment.

Respectfully submitted,

MARY A. BERNI,
Town Accountant.

REVISED BY-LAWS

TOWN OF MILTON, MARCH 2, 1902

Adopted by the Town and approved by the Superior Court May 20, 1902

The amendments to Chapters 2, 3, 4, 7, 8, and 10, adopted by the Town March 2, 1914, March 13 and September 1, 1915, March 11, 1922, March 14, 1925, March 13, 1926, March 12, 1927, March 10, 1928, June 13, 1928, were approved by the Attorney-General, December 10, 1914, May 8 and September 22, 1915, April 6 and July 19, 1922, March 26, 1925, March 18, 1926, April 20, June 21, 1927, June 11, 1928, September 24, 1928, June 1, 1929

Chapters 12 and 13, adopted by the Town July 10, 1922, were approved July 11 and 21, 1922

The amendment to Chapter 12, adopted by the Town March 13, 1926, was approved March 17, 1926

CHAPTER 1

General Provisions

Section 1. These By-Laws, contained in this and the succeeding chapters, being ten chapters in all, may be designated as the Revised By-Laws, adding the number of the chapter and section when necessary.

Sect. 2. So far as the provisions of these By-Laws are the same in effect as those of previously existing By-Laws, they shall be construed as a continuation of such By-Laws, but, subject to said limitations and the provisions of the next section, all By-Laws of the Town heretofore in force are hereby repealed; provided that this repeal shall not apply to or affect any By-Law, order, or article heretofore adopted, accepting or adopting the provisions of any statute of the Commonwealth.

Sect. 3. These By-Laws and the repeal of all By-Laws heretofore in force shall not affect any act done, any right accrued, any penalty or liability incurred, or any suit, prosecution, or proceeding, pending at the time when they take effect; nor shall the repeal of any By-Law thereby have the effect of reviving any By-Law theretofore repealed or suspended.

Sect. 4. When in a By-Law anything is prohibited from being done without the license or permission of a certain officer, officers, or board, such officer, officers, or board, shall have the power to license or permit such thing to be done.

Sect. 5. In all the By-Laws of the Town the following words and expressions shall, unless inconsistent with the manifest intent, be severally construed as follows:—

The word public way shall include any highway, town way, road, bridge, street, avenue, boulevard, roadway, parkway, lane, sidewalk or square; the owner or occupant of a building or land shall include any sole owner or occupant, and any joint tenant and tenant in common of the whole or of any part of a building or lot of land: words purporting to give a joint authority to three or more officers or other persons shall give such authority to a majority of such officers or persons; the word person may include corporations; words importing the singular number may apply to the plural number, and words importing the masculine gender may apply to the feminine gender.

Sect. 6. All fines and penalties for the violation of any By-Laws shall, when received, inure to the use of the Town, and be paid into the Town treasury, unless it be otherwise directed by the laws of the Commonwealth or the By-Laws of the Town.

Sect. 7. Whoever violates any of the provisions of the By-Laws of the Town, whether included in these By-Laws or any hereafter enacted, whereby any act or thing is enjoined or prohibited, shall, unless other provision is expressly made, forfeit and pay a fine not exceeding twenty dollars for each offence.

Sect. 8. Whoever shall refuse or neglect to obey any order of any Town officer or board of Town officers, issued under any of the By-Laws of the Town, directed to him and properly served upon him, shall, in cases not otherwise provided for, forfeit and pay for such offence a fine not exceeding twenty dollars.

Sect. 9. Prosecutions for the breach of any of the provisions of the By-Laws of the Town shall be commenced within six months from such breach.

Sect. 10. Any or all of the By-Laws of the Town may be repealed or amended, or other By-Laws may be adopted, at any Town meeting, annual or special, an article containing the subject-matter of the proposed change having been inserted in the warrant for such meeting.

CHAPTER 2

Town Meetings

Section 1. The warrants for all Town meetings shall be directed to the constables of the Town, and the meetings shall be notified by posting attested copies of the warrant in each of the post-offices of the Town at least fourteen days, and by leaving printed copies thereof at the dwelling-houses in the Town at least four days, before the day of such meeting.

Sect. 2. The annual meeting for the election of Town officers shall be held upon the first Saturday of March, the polls to be open at fifteen minutes before six o'clock in the forenoon, and they shall remain open until four o'clock in the afternoon for the election of such other Town officers as are required by law to be elected by ballot, all said officers to be voted for on official ballots. At any time after said four o'clock a vote may be passed to close the polls in not less than ten minutes.

Sect. 3. All business except the election of such officers and the determination of such matters as by law are required to be elected or determined by ballot shall be considered at an adjournment of said meeting to the following Saturday at one-thirty o'clock in the afternoon.

Sect. 4. All motions shall, if required by the Moderator, be reduced to writing before being submitted to the meeting.

Sect. 5. Upon taking the question, the sense of the meeting shall be taken by the voices of the town meeting members and the Moderator shall first announce the vote as it appears to him by the sound.

If the Moderator is unable to decide by the sound of the voices or if his announcement made thereupon is doubted by seven town meeting members arising in their places for that purpose, the Moderator shall request the town meeting members to be seated, and shall appoint tellers; the question then shall be distinctly stated, and those in the affirmative and negative respectively shall be requested to rise and stand in their places until they are counted by the tellers, who shall report their count to the Moderator.

If the vote is further doubted and twenty-five town meeting members arise in their places and ask for a division of the meeting by the taking of the yeas and nays, then the roll of the meeting shall be called in alphabetical order and no town meeting member shall be allowed to vote after the vote is declared.

Sect. 6. No vote shall be reconsidered at the same meeting, except upon a motion made within one hour of the adoption of such vote, unless ordered by two-thirds of the voters present and voting thereon.

Sect. 7. When a question is before the meeting, the following motions, viz.:—

to adjourn,
to lay on the table,
for the previous question,
to postpone to a time certain,
to commit, (or recommit) or refer,
to amend or substitute,

shall have precedence in the order in which they are placed in this section; provided however, no article in the warrant shall be finally disposed of by a vote to lay upon table, to indefinitely postpone, or to take no action thereunder.

In proposed amendments involving amounts or dates, the smallest amount and the shortest time shall be put first.

Sect. 8. After the declaration of the vote for Town officers, fifteen legal voters shall be appointed by the Moderator, who shall constitute a committee to be known as the Warrant Committee. The persons so appointed shall continue as members of said committee until the Town meeting of the ensuing year.

CHAPTER 3

The Warrant Committee

Section 1. The Warrant Committee shall, within two weeks after their appointment, meet, at the call of the member thereof first named, for organization by the choice of a chairman and secretary. And they shall meet thereafter from time to time as they may deem advisable.

They shall have power to fill vacancies in their number by vote, attested copy of which shall be sent by the secretary to the Town Clerk.

Sect. 2. It shall be the duty of the Warrant Committee to inform themselves concerning those affairs and interests of the Town, the subject-matter of which is generally included in the warrants for its Town meetings; and the officers of the Town shall, upon their request, furnish them with facts, figures, and any other information pertaining to their several departments; provided, however, that any such information may be withheld when, in the opinion of the officer or board of officers so requested, the communication thereof might injuriously affect the interests of the Town or its citizens.

Sect. 3. The Warrant Committee shall consider the various articles in the warrants for all the Town Meetings held during the period for which they were appointed including the various articles in the warrant for the annual Town Meeting next after their appointment; they shall also consider all questions submitted to the voters of the Town at any meeting, including State elections under any act or resolve of the Legislature and proposed amendments to the Constitution; and they shall report in print before all such meetings their estimates and recommendations for the action of the Town.

On or before January first of each year each board, committee or officer of the Town shall file with the Selectmen, who shall transmit the same to the Warrant Committee, a statement in detail of the appropriation or appropriations recommended by such board, committee or officer for the work under its or his charge for the ensuing year.

The Warrant Committee shall include in its report of recommendations for the annual Town Meeting a statement setting forth the total appropriations so requested, the appropriations recommended, and the total as such appropriations requested and recommended, and an estimate of the tax rate for the ensuing year if such recommendations are apopted.

CHAPTER 4

The Town Finances and Property

Section 1. The financial year shall begin with the first day of March.

Sect. 2. The Selectmen shall annually, not less than seven days before the annual meeting, cause to be printed and distributed among the taxpayers of the Town, a detailed report of all money received into and paid out of the Town treasury during the preceding calendar year, with such information and recommendations as they may deem proper, and with detailed estimates of the amounts of money that will be required for the ensuing financial year. With this report shall be printed the records of all meetings of the Town held since the last annual report was printed, the reports of the Auditors, of the Surveyors of Highways, and of the Engineers of the Fire Department, the Collector's account of receipts, payments, and abatements, a list of all taxes assessed, except the poll tax list, an abstract of the births, marriages, and deaths to be furnished by the Town Clerk, a statement concerning the condition and fund of the public library and the cemetery to be furnished by the Trustees respectively, and a statement of all other funds belonging to the Town or held for the benefit of its inhabitants; also statements of the liabilities of the Town on bonds, notes, certificates of indebtedness, or otherwise, and of the total money paid the Town, the income of which is to be applied to the care of lots in the cemetery. The annual report shall also contain such other matters as may be required by the By-Laws of the Town.

Sect. 3. The assessment of taxes shall be completed and the tax list and warrant shall be delivered to the Collector on or before the first day of August in each year.

Sect. 4. Poll taxes shall be payable on demand, and all other taxes assessed in each year shall be payable on or before the first day of November in the same year; and on all such taxes as are not paid on or before the said first day of November, interest shall be charged at a rate to be fixed annually by the Town, pursuant to Section 71 of Chapter 490 of the Acts of the year 1909, Part 1, and the Collector shall use all the means and processes provided by law for the collection of all taxes remaining unpaid after the first day of November in the same year.

Sect. 5. No person being an officer of the Town shall in his official capacity make or pass upon, or participate in making or passing upon, any sale, contract or agreement, or the terms or amount of any payment, in which the Town is interested and in which such officer has any personal interest at variance with that of the Town.

Sect. 6. The Selectmen, being duly authorized by vote of the Town under the limitations imposed by statute, may authorize the Treasurer to borrow money temporarily in anticipation of the collection of taxes, or upon loans authorized by vote of the Town, and to give promissory notes therefor in behalf of the Town, the same to be signed by the Treasurer and countersigned by a majority of the Selectmen.

Sect. 7. No money granted for special purposes shall be applied to any other use unless by a vote of the Town, and all unexpended balances of such grants shall be stated in the annual report.

Sect. 8. The Selectmen shall keep full accounts in respect to the several separate appropriations and the drafts made against each and shall not approve any draft which does not state specifically the appropriation against which it is drawn, whether general or special.

Sect. 9. The Warrant Committee shall send to the Selectmen and to the Auditors certified copies of all votes whereby transfers are made out of the Reserve Fund for extraordinary or unforeseen expenditures.

Sect. 10. No board, committee, or officer of the Town shall commit the Town to any expenditure or liability which would, in the ordinary course of business, be chargeable to the appropriation of which such board, committee or officer is or has been in charge, after such appropriation has been

exhausted, or after the satisfaction of all liabilities against it would exhaust it, until either the Warrant Committee shall have transferred additional sums to such appropriation, or until the Town at a meeting of the voters, shall have acted in the matter.

Sect. 11. No grant of a sum of money exceeding five hundred dollars shall be made until the subject-matter thereof has been considered and the estimates reported to the Town either by the Selectmen or other Town officers, or by the Warrant Committee or some committee chosen for that purpose in pursuance of a vote of the Town.

Sect. 12. The Selectmen shall have full authority as agents of the Town to institute and prosecute suits in the name of the Town, and to appear and defent suits brought against, unless it is otherwise specially ordered by a vote of the Town.

Sect. 13. Whenever it shall be necessary to execute any deed conveying land or other instrument required to carry into effect any vote of the Town, the same shall be executed by the Selectmen, or a majority thereof, in behalf of the Town, unless the Town shall otherwise vote in any special case.

Sect. 14. The Selectmen shall appoint a Town Accountant, who shall perform the duties prescribed by law. At the close of each fiscal year he shall cause an audit of the accounts of the Town to be made under the supervision of the Director of Accounts, as provided by Section 35 of Chapter 44 of the General Laws.

Sect. 15. Whenever damages may be recovered against the Town under General Laws, Chapter 79, entitled "Eminent Domain" and acts in amendment thereof and in addition thereto, the Board of Selectmen, unless otherwise provided by vote of the Town, may exercise in the name and behalf of the Town all the powers granted in Section 39 of said Chapter relative to settlement of damages, assumption of betterments, offers of settlement, and other matters in said section contained.

CHAPTER 5

The Cemetery

Section 1. The sole care, superintendence, management, and control of the Cemetery shall be intrusted to a Board of five Trustees to serve for the period of five years; one of said Board shall retire and new member be elected at each annual meeting of the Town.

In case of vacancies in the Board of Trustees the remaining members may fill the same, but any member so chosen shall hold office only until the next annual Town meeting, when a Trustee shall be elected for the unexpired term.

Sect. 2. Citizens of Milton who are heads of families and have been residents of the Town not less than five years shall be entitled to lots in the Cemetery, allowing one lot to a family, subject to the regulations adopted by the Town, upon payment of the charges for putting the lot in order; but by unanimous consent of the Trustees the five years' residence requirement may be waived.

Sect. 3. The Trustees, when in their judgment it shall be deemed advisable, may sell lots at the rate of not less than fifty cents a square foot, but only to those who are in some way connected with Milton people.

Sect. 4. The proprietor of each lot shall cause to be erected, at his own expense, corner-stones, and a step with his name and the number of the lot inscribed on the same, and shall cause his lot to be kept in proper order; and if the proprietor shall omit for thirty days after notice to erect such land marks and to keep the lot in order, the Trustees shall have authority to have the same done at the expense of said proprietor.

Sect. 5. No lot shall be used for any other purpose than as a place of burial for the dead, and no proprietor shall suffer the remains of any person to be deposited within the bounds of his lot for hire; nor shall any proprietor sell or transfer the whole or any part of his lot without the consent of the Trustees.

Sect. 6. If in the judgment of the Trustees any trees or shrubs in any lot shall become detrimental to the adjacent lots or avenues, or dangerous or inconvenient, it shall be the duty of the Trustees to enter upon said lot and to remove said trees and shrubs, or such parts thereof as are thus detrimental, dangerous or inconvenient.

Sect. 7. There shall be no structure or inscription placed in, upon or around any lot which the Trustees shall deem offensive or improper; and it shall be the duty of the Trustees to remove all offensive or improper objects.

Sect. 8. The Trustees shall have authority to purchase any tomb in the Cemetery offered for sale, paying for the same such sums as, in their judgment, may be fair and reasonable. They shall also have authority to give for any tomb a lot to be constructed on the land occupied by the tomb, or to be selected at some other point in the Cemetery grounds, as they may agree with the proprietor of the tomb. Should there be no living proprietors, or legal representatives of deceased proprietors, the Trustees may take possession of such Tomb, carefully remove its contents to a lot prepared for the purpose and erect over the remains a suitable memorial stone.

Sect. 9. The following regulations shall be posted within the Cemetery:—

1. All persons are prohibited from driving on the borders.
2. No horse shall be left upon the grounds without a keeper, unless fastened to posts provided for the purpose.
3. All persons are prohibited from discharging firearms within the grounds of the Cemetery, except in connection wiith military memorial services.
4. All persons are prohibited from writing upon or otherwise defacing any sign, monument, fence, or other structure.
5. All persons are prohibited from gathering flowers, or breaking any tree, plant or shrub.
6. Dogs are not allowed within the Cemetery grounds.

CHAPTER 6

Police Regulations

Section 1. No person shall move or assist in moving any building, over any way which the Town is obliged to keep in repair, without the written permit of the Selectmen being first obtained; nor, having obtained such permit, without complying with the restrictions and provisions thereof.

Sect. 2. Whoever, without a written license from the Selectmen, shall cause or suffer any cart or wagon to remain within the limits of any public way so as in any manner to obstruct travel thereon, or for more than twenty-four hours, shall forfeit and pay a sum not less than one dollar and not more than ten dollars for each offence; and he shall be subject to a like penalty if he neglects to remove the same within the time ordered by such officers, who may revoke such license at any time.

Sect. 3. No person shall place or cause to be placed, upon any public way or sidewalk, any lumber, iron, wood, coal, trunk, bale, box, crate, cask, barrel, package or other thing, and allow the same to remain for more than one hour, or more than ten minutes after being notified by a constable, police officer or the Selectmen.

Sect. 4. Any person who intends to erect, repair or take down any building on land abutting on any way which this Town is obliged to keep in repair, and desires to make use of any portion of said way for the purpose of placing thereon building materials or rubbish, shall give notice thereof to the Selectmen. And thereupon the Selectmen may grant a permit in writing to occupy such a portion of said way to be used for such purpose as in their judgment the necessity of the case demands and the security of the public allows; such permit in no case to be in force longer than ninety days, and to be on such conditions as the Selectmen may require; and especially in every case, upon condition that during the whole of every night, from twilight in the evening until sunrise in the morning, lighted lanterns shall be so placed as effectually to secure all travellers from liability to come in contact with such building materials or rubbish.

Sect. 5. No person shall throw or place, or cause to be thrown or placed, any ice or snow into or upon any public way unless the same be broken into small pieces and spread evenly.

Sect. 6. Whoever, without the written permission of the Selectmen, shall place or cause to be placed in or upon any public way, or sidewalk, any ashes, dirt, rubbish or filth of any kind, or any animal or vegetable substance, shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence.

Sect. 7 Whoever shall suffer any horse or grazing beast, or swine, to run at large in the Town, or feed in any public way either with or without a keeper, and whoever shall drive any such animal upon any sidewalk, or suffer any horse to remain hitched across any sidewalk, shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence.

Sect. 8. Three or more persons shall not continue to stand or remain in a group, or near to each other, on any sidewalk or in any public place in such a manner as to obstruct a free passage for foot passengers, after having been requested by a constable or police officer to move on. Any person who shall violate the provisions of this section shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence.

Sect. 9. No person shall dig up or obstruct any portion of any way which the Town is obliged to keep in repair without the permit, in writing of the Selectmen, nor, having obtained such permit, shall fail to comply with the conditions thereof; and in addition to any penalty to which he may be subjected under these By-Laws for such failure, he shall reimburse the Town for all expenses and damages which, or for which, the Town may be compelled to pay by reason of such unauthorized use, or any failure to comply with said conditions.

Sect. 10. No person shall ride or drive any beast of burden, carriage or draught, or shall propel or cause to be propelled any bicycle, tricycle, automobile or any vehicle whatsoever, at a rate of speed exceeding ten miles an hour, in or over any crossing in any public way.

Sect. 11. No person shall permit any team under his care or control to stand across any public way in such a manner as to obstruct the travel over the same for an unnecessary length of time; no person shall stop with any team in any public way so near to another team as to obstruct public travel; and no person shall stop with any team or carriage upon or across any crossing in any public way.

Sect. 12. No person shall drive or take charge of at the same time in any public way two or more vehicles drawn by horses or other beasts; or shall allow any vehicle belonging to him to be driven in any public way without some competent person in charge thereof.

Sect. 13. Whoever shall coast upon ice or snow on Adams Street, between Churchill's Lane and the line of the City of Boston, or upon any public way on which the Selectmen or Superintendent of Police shall by public notice have forbidden such coasting, and whoever shall drive, wheel or draw any coach, cart, wheelbarrow, handcart, velocipede, bicycle or

any carriage of burden or pleasure, except children's carriages, or coast upon any sidewalk in the Town, shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence.

Sect. 14. Whoever shall behave in an indecent or disorderly manner, or use profane, indecent, or insulting language in or upon any sidewalk, public way, or other public place, to the annoyance or disturbance of any other person there being or passing in a peaceable manner, shall forfeit and pay a sum not less than one dollar nor more than twenty dollars for each offence.

Sect. 15. Any person or persons who shall play or perform on any musical instruments, or sing, parade, march, or congregate in any public way or public place, except in connection with a funeral, without the written permit of the Selectmen, shall forfeit and pay a sum not less than one dollar nor more than twenty dollars for each offence.

Sect. 16. Whoever shall be or remain on any doorstep, portico, or other projection from any house or building, or upon any wall or fence on or near any public way or public place, after being requested by the occupant of the premises or by any constable or police officer to remove therefrom, shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence.

Sect. 17. No person shall throw stones, snowballs, sticks, or other missiles, or kick a football or play at any game in which a ball is used, or fly any kites or balloons, in any public way.

Sect. 18. Whoever shall affix, by paste or otherwise, any handbill, placard, notice, or advertisement, or paint, draw or stamp the same, or any marks or figures, to or upon any sign board of the Town, or to or upon any building, fence, wall, tree or structure, without the permission of the owner of such building, fence, wall, tree or structure, shall forfeit and pay a sum not less than one dollar nor more than ten dollars for each offence; and if such handbill placard, notice, advertisement, mark, or figure be obscene or indecent, the penalty shall not be less than twenty dollars for each offence.

Sect. 19. Whoever shall undertake to enter a particular drain into a common sewer without a permit in writing from the Sewer Commissioners or without complying with the conditions and directions of such permit, shall forfeit and pay a sum not exceeding ten dollars.

Sect. 20. Whoever shall lead or cause to be led into any public way, or running stream, any drain or pipe from any house or other building whereby filthy water or other unclean matter may be emptied into or upon any such public way or running stream; and whoever shall throw, lead or discharge or cause to be thrown, led or discharged, into any public way, or running stream, any noxious or poisonous matter or substance, or any matter or substance which shall cause an offensive smell or odor, or which shall be destructive of, or injurious to, animal life, shall forfeit and pay a sum not less than five dollars nor more than twenty dollars.

Sect. 21. The Selectmen may grant licenses to use a certain portion of any public way as a carriage-stand, under such terms and conditions as they may prescribe; and no person shall use any portion of any public way as a carriage-stand for the solicitation of passengers for hire without a license from the Selectmen. But licenses shall not be confined to one person to the exclusion of other applicants, and shall be granted so as to allow competition and promote public convenience.

Sect. 22. No person shall distribute papers, circulars or advertisements through the Town or any portion thereof in such a manner as to make a litter or otherwise cause public annoyance.

Sect. 23. No person shall fire, discharge, explode or set off any gun, firearm, torpedo, firecracker or fireworks in such manner as to frighten any horse, or disturb the peace or quiet of any neighborhood.

Sect. 24. No person shall wilfully deface or injure any public playground, planting space, flower bed, tree, shrub or grass border.

Sect. 25. No person shall own or keep a dog which by barking, biting,

howling or in any other manner is disturbing the peace or quiet of any neighborhood.

Sect. 26. The Selectmen may license suitable persons to be dealers in and keepers of shops for the purchase, sale, or barter of junk, old metals, or second-hand articles, in the Town. They may also license suitable persons as junk collectors, to collect, by purchase or otherwise, junk, old metals, and second-hand articles from place to place in the Town; and they may provide that such collectors shall display badges upon their persons; or upon their vehicles, or upon both, when engaged in collcting, transporting, or dealing in junk, old metals, or second-hand articles; and may prescribe the design thereof. They may also provide that such shops and all articles of merchandise therein, and any place, vehicle or receptacle used for the collection or keeping of the articles aforesaid, may be examined at all times by the Selectmen or by any person by them authorized thereto. The aforesaid licenses may be revoked at pleasure and shall be subjected to the provisions of Sections 186 to 189 inclusive of Chapter 102 of the Revised Laws.

Whoever violates any provisions of Sections 26 and 27 shall in cases not otherwise provided for, forfeit and pay for each offence a fine not exceeding twenty dollars.

Sect. 27. The Selectmen may order numbers to be affixed to or painted on the buildings on any street in their discretion. The owner of every house shall comply with such order within thirty days thereafter.

Prosecutions and Penalties.

Except when otherwise provided by law, prosecutions for offences under the By-Laws of the Town may be made by any constable or police officer of the Town.

CHAPTER 7

The Construction and Inspection of Buildings

Section 1. This Chapter shall constitute and be known as the Building Code and may be cited as such. It provides, in conjunction with Chapter 635, Acts of 1912, known as the "Tenement House Act", for all matters concerning the construction, equipment, alteration, repair, demolition or moving of buildings or structures erected or to be erected in the Town of Milton.

Sect. 2. Whenever the word "Inspector" occurs in this Chapter it means the Inspector of Buildings.

Sect. 3. The Inspector may, so far as is necessary for the performance of his duties, enter any building or premises within the Town at any reasonable hour.

Sect. 4. In this Chapter the following terms shall have the meanings respectively assigned to them:

First Class Buildings: A first class building shall consist of fireproof material throughout, with floors constructed of iron, steel or reinforced concrete beams, filled in between with terra cotta or other masonry arches or with concrete or reinforced concrete slabs. Wood may be used only for under and upper floors, windows and door frames, sashes, doors, interior finish, handrails for stairs, necessary sleepers bedded in cement, and for isolated furrings bedded in motar. There shall be no air space between the top of any floor arches and the floor boarding.

Second Class Buildings: Second class buildings shall include all buildings not of the first class, the external and party walls of which are of brick, stone, iron, steel, concrete, reinforced concrete, concrete blocks or other equally substantial and fireproof material.

Third Class Buildings: Third class buildings shall include all buildings not of the first or second class.

Thickness of Wall: The minimum thickness of such wall.

Grade: Average grade of the ground immediately adjoining a building.

Cellar: A story more than one-half below the average grade of the ground immediately adjoining a building.

Wooden Frame Building: Any building of which an external wall is constructed wholly or partly of wood. Wood frames covered with metal wire lath and plaster or brick shall be deemed to be wood structures.

Reinforced Concrete: By the term "reinforced concrete" is meant an approved concrete mixture reinforced by steel of any shape so combined that the steel takes up the tensile stress and assists in the resistance to shear.

Story: That part of a building between the top of any floor beams and the top of the floor or roof beams next above.

Permits

Sect. 5. Before the erection, construction or alteration of any building or part of any building, structure or part of any structure, wall, or any platform, or flooring to be used for standing or seating purposes, is commenced, the owner or lessee, or agent of either, or the architect or builder employed by such owner or lessee in connection with the proposed erection or alteration shall, except for ordinary repairs, submit to the Inspector a detailed description of the location, purpose and construction of the proposed structure or work on proper blanks to be furnished by the Inspector, and full and complete copies of the plans of such proposed work, and such structural detailed drawings as the Inspector may require.

Such plans and detailed drawings shall be furnished in dulicate and, if approved by the Inspector, one set shall be kept at the building during the progress of the work, open to the inspection of the Inspector or his representative. The other shall be kept on file in the office of the Inspector.

The Inspector may require an applicant for a permit to submit with the plans of a building or other structure detailed drawings and calculations of any portions thereof subjected to unusual stresses, or of complicated construction, or for a steel frame or reinforced construction, or of any type of construction not particularly described in this chapter.

Nothing in this section shall be construed to prevent the Inspector from granting his approval of the erection of any part of a building or structure where the general plans and detailed descriptions have been filed for the same, before the entire detailed plans have been submitted.

Sect. 6. It shall be the duty of the Inspector to approve or reject any plans filed with him pursuant to the provisions of this chapter within a reasonable time and within ten (10) days in any event, and no work shall be commenced until a permit is issued.

Sect. 7. Upon approval of plans the Inspector shall issue a permit. The permit shall be void unless work is commenced within three (3) months from the date thereof.

Sect. 8. No building shall be lathed nor shall any metal ceiling, plaster board or other covering be put un until the Inspector has been notified that the building is ready for such work, and until he has given written consent thereto.

Sect. 9. If a proposed building or structure is of a size or character not provided for by this chapter, plans and specifications of such building or structure shall be submitted to the Inspector and referred by him, with his recommendations thereon, to the Board of Selectmen for approval.

Construction

Sect. 10. The Inspector shall examine all buildings in the course of erection or alteration as frequently as is necessary, to see that the Law and the By-Laws of the Town are complied with.

Sect. 11. Every portion of every building or other structure in process of construction, alteration, repair or removal and every neighboring building or other structure or portion thereof affected by such process, or by any excavation, shall be properly supported during such process or excavation.

Sect. 12. All masonry below the finished grade shall be laid up in mortar no poorer than one part Portland cement and three parts sand.

All masonry above grade shall be laid up in mortar no poorer than one part Portland cement, one part lime, and six parts sand.

Sect. 13. Every building or structure hereafter erected shall have a masonry foundation resting upon the solid ground, piles, or other durable structure. Said foundation shall be securely and properly built, and shall be of such thickness as to properly sustain the weight it is intended to support; provided however, that the Inspector may in his discretion, permit the use of other materials for foundations of buildings not over one and and one-half stories high.

Sect. 14. The underpinning above grade, if of concrete, shall be not less than ten (10) inches in thickness; if of brick, not less than twelve (12) inches in thickness; if of stone, not less than sixteen (16) inches in thickness, and shall be laid in cement mortar, as prescribed in Section 12.

Sect. 15. All foundation walls and pier footings shall be laid at least three (3) inches below cellar bottom and not less than three (3) feet six (6) inches below any adjoining surface exposed to frost.

Sect. 16. All piers shall be built of stone, good hard burnt brick laid in mortar, or reinforced concrete. Isolated brick piers shall not exceed in height ten (10) times their horizontal dimensions and, if of reinforced concrete, fifteen (15) times their least horizontal dimensions, which shall not be less than twelve (12) inches. Cement filled iron columns may be substituted for piers if of suitable size to carry the superimposed load. Such columns shall have cast iron caps and bases and shall rest on footings of masonry, stone, or concrete which shall be at least twelve (12) inches in each dimension.

Sect. 17. For buildings other than frame, where the walls are of brick or solid concrete, the minimum thickness in inches of all exterior and dividing walls carrying the loads of floors and roofs and including foundation walls for the same shall be not less than specified in the following table:

Height.	Foundation	Basement.	Stories					
			1	2	3	4	5	6
1 story . .	16	12	8					
2 stories . .	16	12	12	8				
3 stories . .	20	16	12	12	8			
4 stories . .	20	16	16	12	12	8		
5 stories . .	20	16	16	16	12	12	8	
6 stories .	24	20	16	16	16	12	12	8

The height of stories for the thickness of walls given shall not exceed:

First Story	17 feet
Second Story	15 feet
Third Story	13 feet
Fourth and Upper Stories	12 feet

and if any story exceeds the foregoing heights, it shall be counted as one additional story for each twelve feet in height or fraction thereof and the thickness of the walls not diminished from the thickness of the lower portion of such story.

If stone is used in place of brick or solid concrete, the thickness of walls shall be made four (4) inches thicker than above specified.

In external walls of the thickness specified in this section, the area of openings for windows, doors, flues, etc., shall not exceed 50 per cent of the gross area. In case the width of such openings exceeds one-half the length of the wall, the thickness of piers between openings shall be increased so as to maintain an area of at least fifty (50) per cent of the gross area required by the specified thickness; provided, however, that in the upper half of any vertical portion of the wall required to be of constant thickness a smaller addition may be made to the thickness of piers, if the stresses allowed by this code are not exceeded. Curtain walls of brick or concrete between piers, where carried to the piers by arches or lintels at each story, shall be not less than eight (8) inches in thickness.

Sect. 18. Vaulted walls shall contain, exclusive of ties, the same amount of material as required for solid walls, and shall be securely tied together with headers in every sixth course at least.

Sect. 19. In reckoning the thickness of walls, no allowance for ashlar shall be made unless it is at least eight (8) inches thick, in which case the excess over four (4) inches shall be reckoned as part of the thickness of the wall. Ashlar shall be at least four (4) inches thick and properly held by metal clamps to the backing, or properly bonded to the same.

Sect. 20. Reinforced concrete construction will be accepted for buildings of the first class, and must be designed in accordance with the recommendations of the Joint Committee of the American Society of Civil Engineers, or American Society for Testing Materials, and all materials used in the construction must conform to the requirements of the standard specifications of the American Society for Testing Materials.

The Building Inspector shall have authority to require tests to be made of all materials used in the construction. Such tests shall conform to the requirements as approved by the American Society for Testing Materials.

Only stone or gravel concrete shall be allowed in the construction of reinforced concrete buildings, except that slag or cinder concrete may be used for fireproofing purposes and for floors or roofs where the superimposed load does not exceed fifty (50) pounds per square foot, and the spacing between supports does not exceed six (6) feet.

The allowable unit stresses shall not exceed those recommended by the Joint Committee above mentioned.

Before issuing permit for the construction of reinforced concrete buildings, the Inspector of Buildings shall require the owner to submit a complete set of working drawings and details of the proposed construction with the approval of some well-known consulting engineer written upon each sheet of the drawing, and the cost of such approved drawings shall be paid by the owner.

Sect. 21. The studding in outside walls shall be at least two (2) by four (4) inches in size and spaced not over sixteen (16) inches on centers.

Studs next door and window openings shall be at least three (3) inches by four (4) inches and shall be mortised into sills and girts.

Openings in outside walls shall be trussed if the Inspector so requires.

Sect. 22. Every wooden building hereafter erected or altered shall have all parts of sufficient strength to carry the weight of the super-structure; shall be built with sills, posts, girts, studs and plates all properly framed, braced and secured together by mortising, strapping or halving, to the satisfaction of the Inspector.

The posts and girts shall be not less than four (4) inches in size except intermediate posts, which shall be not less than four (4) inches by eight (8) inches in size. Studs in interior partitions shall be placed not more than twenty (20) inches on centers. Plates shall be not less than four (4) inches by four (4) inches in size, but may be two (2) inches by four (4) inches doubled. Sills shall be not less than four (4) inches by six (6) inches in size.

Sect. 23. The studding of main or carrying partitions shall be not less than two (2) by four (4) inches in size, and shall rest on a sole piece of

hard pine two (2) by four (4) inches. All openings in main partitions of more than thirty-six (36) inches shall be trussed and have studs doubled at sides. Every partition shall have a header extending the length of the partition, and carrying partitions shall be bridged with stock the full width of studding and two (2) inches thick, at least once in height.

Partitions over twelve (12) feet in height shall be bridged at least once in every six (6) feet.

When carrying partitions rest directly over each other, the studs shall run down between the floor beams and rest on the header of the partition below.

1988514

Headers of carrying partitions shall be at least two (2) inches by four (4) inches in size, doubled and of hard pine.

Sect. 23A. All wooden header beams more than four (4) feet long used in any building shall be framed together and pinned or hung to the trimmer beams in stirrupirons. When it is not practicable to frame or secure the ends of tail beams into header beams, the ends of the tail beams shall be hung to the header beams by stirrup-irons.

Sect. 24. All wooden beams of floors or flat roofs shall be properly bridged with cross bridging at least one (1) inch by three (3) inches in size, and the distance between bridging or between bridging and walls shall not exceed eight (8) feet.

Sect. 25. No part of any floor timber shall be within two (2) inches of any chimney; no studding or furring shall be within one (1) inch of any chimney; and no timbers or woodwork shall be within two (2) inches of the back wall of any fireplace. The header beam, carrying the tail beams of a floor and supporting the trimmer arch in front of a fireplace, shall be not less than eighteen (18) inches from the finished chimney breast.

Sect. 26. Every wooden beam, except header beams, shall rest four (4) inches in the wall at each end, or upon a girder or columns as authorized by this chapter, unless the wall is properly corbelled out of four (4) inches, in which case the brickwork or corbelling shall extend to the top of the floor beams.

Sect. 27. The ends of all wooden beams of floors where they rest on brick walls, and the ends of all wooden roof beams in parapeted walls, shall be cut to a bevel three (3) inches in their depth.

Sect. 28. No cutting of timbers for any purpose shall be done so as to reduce the strength of the supporting parts below that required by the provisions of this chapter. No floor, timber, header or trimmer beam of any building shall be cut into more than two (2) inches in depth for piping without a permit from the Inspector. Holes for electric wires through wooden beams, girders or floor beams shall not be located more than one (1) inch from the neutral axis thereof.

Sect. 29. Every second and third class building hereafter built shall have in each story all vertical space in the exterior walls, and carrying partitions thoroughly stopped with fireproof materials not less than four (4) inches in height. These steps may be omitted on approval of the Inspector in cases where the studding is to remain open and uncovered. In every building used solely as a mill or factory there shall be a fireproof stop between the upper and under floor. This fire stop may, however, be omitted if the floor boards are at least two (2) inches thick and splined or tongued together and the space between the timbers of the floor open and uncovered.

Sect. 30. All floors shall be of sufficient strength to bear the weight imposed thereon and of sufficient strength in all parts to safely bear (in addition to the weight of the material of which the floor is composed), upon every square foot of its surface not less than the weights named below for the specified purposes for which such floors are respectively used or designed to be used:

Dwelling houses and hotels [except public rooms having a floor area of over five hundred (500) square feet and corridors], fifty (50) pounds; unfinished attics used for storage purposes only, thirty (30) pounds; school-

houses, except corridors and assembly halls, sixty (60) pounds; stairs, landings, platforms, fire escapes, office floors, places of public assembly and public buildings having permanent seats, seventy-five (75) pounds; stables, private garages and the portions of public garages not containing machinery, seventy-five (75) pounds; corridors of hotels, fo public buildings and of schoolhouses and rooms in hotels exceeding five hundred (500) square feet in area, one hundred (100) pounds; retail stores and buildings for light manufacturing purposes, one hundred and twenty-five (125) pounds; places of public assembly and public buildings having movable seats, dance halls and gymnasuims, two hundred (200) pounds; warehouses and buildings for heavy manufacturing purposes, two hundred and fifty (125) pounds; places of public assembly and public buildings having movable seats, dance halls and gymnasiums, two hundred (200) pounds:. Loads not included in the above classification shall be determined by the inspector.

Sect. 31. The pressure upon brick masonry in walls or piers, of which the thickness or least dimension is more than one-sixth of the height, when lime mortar is used, shall not exceed eight (8) tons per square foot; with lime and cement mortar, twelve (12) tons per square foot; with cement mortar, eighteen (18) tons per square foot. When the thickness or least dimension is between one-sixth and one-twelfth the height, and lime mortar is used, the pressure shall not exceed seven (7) tons per square foot; lime and cement mortar, ten (10) tons per square foot; with cement mortar, fifteen (15) tons per square foot.

On first class stone work laid in cement, pressure shall not exceed: on sandstone, thirty (30) tons square foot; on marble or limestone, forty (40) tons per square foot; on granite, sixty (60) tons per square foot.

Hollow blocks of trre cotta or concrete when used for bearing walls shall have not more than fifty (50) per cent of cellular space. Concrete blocks shall not be used in construction until they have attained the age of twenty-eight days, or developed the strength required in this section. All blocks shall be laid in Portand cement mortar.

The compressive strenght of building blocks shall in all cases be calculated upon the gross area of the bedding faces, no account being taken of the cellular spaces. The average ultimate compressive strength for terra cotta blocks laid with cells vertical shall be not less than twelve hundred (1,200) pounds per square inch; the average for concrete blocks laid with cells vertical shall be not less than eight hundred (800) pounds per square inch. Concrete blocks shall be not less than thirty-six (36) days old when tested. The average strength of the blocks as here given shall be obtained by testing ten blocks of average quality.

The allowable working stress of hollow building blocks shall not exceed one hundred (100) pounds per square inch of gross area for terra cotta blocks, or seventy-five (75) pounds per square inch of gross area for concrete blocks. If a wall be built of blocks with the cells horizontal, the allowable working stress shall not exceed thirty (30) pounds per square inch of gross area.

The maximum stress in pounds per square inch in woodwork shall not

	Long-leaved Yellow Pine, Oak & Locust	Other Woods
Direct tension on compression or fibre stress .	1,500	1,000
Direct compression side grain	500	300
Shear across fiber	1,200	800
Shear with fiber	150	100
Short columns	1,000	700

JQ Columns may be used with a length not exceeding forty (40) times the least dimension. The unit strain for lengths up to tne (10) times the least dimensions shall be as given in the above table, with a reduction of one hundred (100) pounds per square inch for every increase of ten in the ratio of length to least dimension.

The maximum stress in tension in cast iron, or tensile fiber stress in case of beams, shall not exceed three thousand (3,000) pounds per square inch. The maximum compression fiber stresses in beams shall not exceed sixteen thousand (16,000) pounds per square inch. Cast iron columns may be used with a length not exceeding twenty (20) times their external diameter. The unit stress for lengths up to three (3) times their diameter shall not exceed elevn thousand (11,000) pounds pr square inch, with a reduction of five hundred (500) pounds per square inch for every increase of 3 in the ratio of length to least diameter.

In rolled steel the maximum stresses shall not exceed the following:

Tension and fiber stress, 16,000 pounds per square inch; compression in columns, 13,000 pounds per square inch.

In rolled steel the maximum stresses shall not exceed the following:

Tension and fibre sstress, 16,000 pounds per square inch; compression in columns, 13,000 pounds per square inch

Columns may be used with a ratio of length (1) to least radius of gyration (r) not exceeding 16, being expressed in feet and the r in inches. The unit stress allowed shall be 13,000 pounds per square inch for 1-r from 2 to 4; 12,000 from 4 to 6; with a decrease of 1,000 pounds for each succeeding increase of 2 in the ratio of 1 to r.

Shear in rivets, 10,000 pounds per square inch; shear in rough bolts, 9,000 pounds per square inch; shear in web (stiffened), 8,000 pounds per square inch in short pieces, or compressive bearing on rough bolts, 15,000 pounds per square inch.

The maximum stresses in wrough iron shall not exceed seventy-five (75) per cent of those allowed in rolled steel.

Materials not specifically mentioned above shall not be allowed to carry stresses exceeding one-quarter the stresses which would cause fracture or cracks in specimens of such material of average quality under similar conditions of loading. In cases of doubt of the strength of such materials, the owner may be required to make such tests as the Inspector shall deem necessary to determine the strength, said tests to be made in the presence of the Inspector or his authorized representative.

Sect 32 Frame buildings veneered on the outside with four (4) inches of brick or stone work shall have such brick or stone work supported on a foundation of masonry, and bearing on rivets, 18,000 pounds per square inch; shall be properly anchored to the frame structure. The height of any usch veneer shall not exceed twenty-five (25) feet abovve the solid masonry.

Sect 33 All hot air furnaces, low pressure boilers, and hot water heaters shall be placed at least two (2) feet from any wooden or combustible partition or ceiling, unless such partition or ceiling is properly protected by incombustible material, when the distance shall be not less than one (1) foot

Sect 34 No wood shall be placed within one (1) inch of any smoke flue or metal pipe used to convey hot air No smoke pipe shall pass through any wood floor No smoke pipe shall be placed nearer than twelve (12) inches to any woodwork unless it is properly guarded by metal shields; if so guarded smoke pipes shall be not less than six (6) inches distant. Where smoke pipes pass through a lath and plaster partition they shall be guarded by galvanized idon ventilated thimbles at least twelve (12) inches larger in diameter extending through the partition and eight (8) inches larger than the pipe. No smoke pipe shall pass through the roof of any building unless a special permit be first obtained from the Inspector of Buildings.

Sect. 35. Steam or hot water heating pipe shall not be placed within two (2) inches of any timber or woodwork, unless the timber or woodwork is

protected by a metal shield; the distance shall be not less than one (1) inch. All steam or hot water heating pipes passing through floors and ceilings or lathed and plastered partitions shall be protected by a metal tube one (1) inch larger in diameter than the pipe—having a metal cap at the floor.

All pipes or ducts used to convey air warmed by steam or hot water shall be of metal or other fireproof material. All steam and hot water pipe coverings shall consist of fireproof materials only.

Sect. 36. All walls, ceilings and partitions inclosing drying-rooms, when not made of fireproof material, shall be wire lathed and plastered, or covered with metal, tile or other hard, incombustible material.

Sect. 36A. No portion of any building of third class construction to which the provisions of Chapter 635 of the Acts of 1912 do not apply shall be hereafter erected, enlarged, altered, or placed nearer than four (4) feet to the line of any adjacent lot or to any other building of the first or second class; or nearer than eight (8) feet to any portion of any other building of the third class on the same lot, unless fireproof masonry walls, with openings protected as required by Section 36, are built next to the said lot or other building, such walls to be of thickness provided under Section 17.

Sect. 37. In first or second class buildings all openings in walls within four (4) feet of adjoining property lines shall be protected by metal shutters or by metal sash, frames and wire glass.

Sect. 38. Every building of the third class hereafter erected to form a block of two or more buildings shall have a wall of brick, or Portland cement concrete, or other equally substantial and approved fireproof material between adjoining buildings, completely separating same. Such walls to be of thickness specified in Section 17, carried to under side of roof boarding.

Sect. 38A. Every dwelling to which the provisions of Chapter 635 of the Acts of 1912 do not apply shall have at least two independent means of egress.

Electric Wiring and Fixtures

Sect. 39. All wires, appliances and apparatus in the interior of a public building or on private premises, which are intended for the transmission of electricity and to be connected with an outside circuit, shall be made and at all times kept safe, and shall be placed, arranged, attached, changed and maintained by the person, firm or corporation owning or using the same, to the satisfaction of the Inspector of Wires appointed in accordance with the provisions of Chapter 337 of the Acts of the year 1899. The Inspector of Wires shall have access at all reasonable times to such wires, appliances and apparatus.

Before any person, firm or corporation shall arrange, fix, or essentially change any such wires, appliances and apparatus, the Inspector of Wires shall be notified and given full opportunity to inspect the said wires and their arrangement and fixtures before the same are covered or enclosed. Wires in the interior of buildings and on private premises shall not be connected with an outside circuit which crosses or runs along, over or under any street or way of the Town without written permission therefor having been first obtained from the Inspector of Wires.

Companies and contractors making any repairs on or installing any electric plants in the Town of Milton shall send a notice to the Inspector of Wires before the work is commenced.

All work and material must be supplied and installed in accordance with provisions of the National Electric code and any amendments or additions thereto.

Gas Fixtures

Sect. 40. The burners of all gas fixtures shall be at least three (3) feet below any ceiling or woodwork, unless the same is properly protected by a shield, in which case the distance shall be not less than eighteen (18) inches. No gas bracket on any lath and plaster partition or woodwork shall be less than five (5) inches in length, measured from the burner to the plaster surface or woodwork.

Sect. 41. Gas pipes in any building or structure shall be installed in accordance with the rules and regulations prescribed by the company furnishing gas. All gas pipes shall be inspected and tested by the gas company before the pipes are covered, and a certificate of the same from the gas company shall be placed on file with the Inspector of Buildings by the owner of the building or his representative. The method of installation of the gas pipes shall be subject to the approval of the Inspector of Buildings.

Sect. 42. Every hot water boiler hereafter installed, to be used for heating purposes, shall be provided with a safety or relief valve of a size not less than that known commercially as one half (½) inch. Such valve shall be attached either directly to the boiler or to some pipe connected therewith at a point not more than one foot from the boiler.

Regulations Made By The Fire Engineers According To The Provisions Of Chapter 32, Section 46, Of The Revised Laws In Regard To Chimneys, Flues, Fireplaces And Heating Pipes

Sect. 43. All chimneys hereafter erected shall be built of brick, stone or other incombustible material.

Sect. 44. All chimneys hereafter erected, if walls are less than eight (8) inches thick, shall be lined on the inside with terra cotta or tile pipe, made smooth on the inside from two (2) feet below girder, or from the throat of the fireplace, if the flue starts from the latter, and carried up continuously to the top. The ends of all such lining pipes shall be made to fit close together, and the pipe shall be built in, as the flue or flues are carried up. The walls shall be at least four (4) inches thick. No parging mortar shall be used on the inside of any fireplace, chimney or flue. The firebacks of all fireplaces hereafter erected shall be not less than eight (8) inches in thickness if of solid brickwork not less than twelve (12) inches if of stone. When a grate is set in a fireplace, a lining of firebrick at least two (2) inches in thickness shall be added to the fireback, unless soapstone, tile or cast iron is used and filled solidly behind with fireproof material.

All chimneys shall extend at least three (3) feet above the highest point at which the chimney cuts the roof and at least six (6) inches above any roof surface within ten(10) feet in a horizontal line.

Sect 45 Imitation fireplaces inteneded for use with gas or electricity and not having a flue shall be constructed throughout, including the hearth, of fireproof material not less than two (2) inches thick.

Hearths of all fireplaces and chimney breasts where mantels are placed shall be supported by trimmer arches of brick, stone, burnt clay or concrete built of clay or concrete at least eighteen (18) inches in width measurd from the face of the finished chimney breast and not less than sixteen (16) inches longer than the width of the finished fireplace opening. Wooden centers under trimmer arches shall be removed before plastering the ceiling underneath. Hearths may be supported on steel cantilever beams built not less than sixteen (16) inches into the chimney.

Sect. 46. No chimney shall be supported by, started or built upon any woodwork.

In no case shall a chimney be corbelled out more than two-thirds the thickness of a wall to which it is attached, and in all such cases the corbellings shall consist of at least five course of brick. Where chimneys are

supported by piers, the piers shall start from the foundation on the same line with the chimney breast, and shall be not less than twelve (12) inches on the face, properly bonded into the walls. When a chimney is to be cut off below, in whole or in part, it shall be wholly supported by stone, concrete, brick, iron or steel.

All chimneys which become dangerous in any manner whatever shall be repaired or made safe, or taken down.

Sect. 47. All hot air furnaces, low pressure boilers, and hot water heaters shall be placed at least two (2) feet from any wooden or combustible partition or ceiling, unlses such partition or ceiling is properly protected by incombustible material, when the distance shall not be less than one (1) foot.

Sect. 48. No wood shall be placed within one (1) inch of any smoke flue or metal pipe used to convey hot air. No smoke pipe shall pass through any wood floor. No pipe shall be placed nearer than twelve (12) inches to any woodwork unless it is properly guarded by metal shields; if so guarded smoke pipes shall be not not than six (6) inches distant. Where smoke pipes pass through a lath and plaster partition they shall be guarded by galzanized iron ventilated thimbles at least twelve (12) inches ni diameter than the pipes, or by galvanized iron thimbles surrounded by solid masonry extending through the partition and eight (8) inches larger than the pipes. No smoke pipe shall pass through the roof of any building unless a special permit be first obtained from the Inspector of Buildings.

Sect. 49. Steam or hot water heating pipe shall not be placed within two (2) inches of any timber or woodwork, unless the timber or woodwork is protected by a metal shield, then the distance shall be not less than one (1) inch. All steam or hot water heating pipes passing through floors and ceilings or lathed and plastered partitions shall be protected by a metal cap at the floor.

All pipes or ducts used to convey air warmed by steam or hot water shall be of metal or other fireproof material. All steam and hot water pipe coverings shall consist of fireproof materials only.

CHAPTER 8

The Regulation and Inspection of Plumbing

Section 1. There shall be in the Town a department for the inspection of plumbing in accordance with the provisions of Chapter 103 of the Revised Laws.

Sect. 2. The word "Inspector" without further addition wherever used in this chapter means the Inspector of Plumbing.

Sect. 3. Every plumber before commencing work on any part of the drainage system in a building, except in the case of the repair of leaks, shall file at the office of the Inspector upon blanks provided for that purpose, a description of the proposed work. No such work shall be done in any building unless approved by the Inspector and after a permit is issued therefor. Permits to perform plumbing shall be issued only to master plumbers. Drawings of the proposed work shall be filed when required by the Inspector.

Sect. 4. No drainage, waste or ventiation pipes shall be covered or concealed in any way until the same have been examined and approved by the Inspector. Notice shall be sent to the Inspector when the work is sufficiently advanced for such inspection, and it shall be the duty of such Insspector, within two (2) working days after receiving such notice, to inspect the same: and in case any change therein shall be found necessary, he shall direct in writing the change to be made.

Sect. 5. All drainage, waste and ventilation pipes shall be subjected to the water test before the fixtures are set, said pipings and fixtures shall be subjected to pneumatic or other reliable test. All such tests shall be made in the presence of the Inspector.

cessible cleanout, and shall extend to a point ten(10) feet outside of the cellar wall. The pipe from the sewer or cesspool to within ten (10) feet of the cellar wall shall have tight joints. The clean-out, if made accessible, may be placed outside the cellar wall. All drain or ventilation pipes shall extend undiminished in inside diameter at least two (2) feet above the highest window on the roof. Every drain pipe, except a drain pipe from a building having but one sink, or but one sink with adjoining trays, shall have a suitable trapplaced with an accessible clean-out at a reasonable distance from the point where such drain pipe leaves the building. All changes in direction of soil pipes shall be made by Y branches or by curved pipes. No ventilation pipes on the outside of any building shall be less than two (2) inches in diameter.

Sect. 9. All joints in iron pipes, soil or vent pipes shall be made by thoroughly caulking the same with molten lead. Joints of lead pipes with iron pipes shall be made by soldering the same into brass ferrules by means of a full sized wiped joint and caulking the ferrules to pipes which are of cast iron, or screwing them to pipes which are of wrought iron.

Sect. 10. Every water-closet, urinal, sink, basin, bath-tub, slop hopper, and every tray or set of four or less wash trays shall hav ea separate trap, placed as near the fixture as possible, except that when two sinks or two basins, or a sink and a set of four or less wash trays adjoin, one trap shall be sufficient. A basin and bath-tub adjoining shall each have a separate trap, and in no case shall the waste from the bath-tub or other fixtures be connected with the water-closet trap or water-closet lead outlet pipe.

All fixturs traps shall be protected from syphonage or air pressure by special vent pipes having a diameter not less than the diametre of the waste pipe at a point not lower than the seal of the trap in such manner as to make the vent pipe a continuation of or a Y branch from the waste pipe, except that the highest fixture on a stack which extends through the roof shall not require such special vent pipe unless the length of the waste pipe from the trap of said fixture to the said stack exceeds three (3) feet. Vent pipes for water-closets shall be of not less than two (2) inches bore

Sect. 6. The drainage and waste piping of every building shall be connected with the public sewer when such sewer is located in a street, way or other land adjacent to the lot upon which the building is located. if the sewer is within two hundred (200) feet of such building and is so lohundred (200) feet from the sewer or a sewer is not accessible. connecated as to take the sewerage therefrom. If the building is more than two tion may be made with a proper cesspool, provided a permit is granted therefor by the Board of Health.

Sect. 7. The soil pipe of every building shall be of sufficient size to receive and allow freely to pass, all that enters or should enter the same. All soil pipes shall be of extra heavy cast iron pipe. All drain and connecting ventilating pipes within th e building shall be of sufficient size, and made of cast iron with leaded and caulked joints, but galvanized wrought iron pipe may be used for vent purposes. All pipes shall be properly secured to walls and ceilings with wrought iron hangers. Waste pipes shall be of cast iron, of lead, or of annealed brass of a thickness not less than No. 13 Stubbs gauge with brass or cast iron recessed fittings. No soil pipe of any building shall be less than four (4) inches inside diameter, except by written permission of the Board of Health. No vent pipe shall bs less than one and a quarter (1¼) inches inside diameter.

Sect. 8. All drain pipes shall have a proper pitch, shall have an acand may be connected with the water-closet waste pipe below the level of the trap seal. Two or more vent pipes may be connected together or with a soil pipe, but such connection with a soil pipe shall be above the uppermost fixture coinnected with such soil pipe. Lead vent pipes may be used only where they are exposed to view.

Sect. 11. No drip or overflow pipes from safes under water-closets, urinals, or other fixtures, no overflow pipes from tanks or cisterns, no waste pipes from refrigerators or other receptacles in which food is stored, no

rain water conductors, and no steam exhaust pipes, or steam waste pipes shall be connected with any soil pipe. No openings shall be allowed in the soil or waste pipe of any building for the purpose of receiving the surface drainage of the cellar except by permission of, and in a manner satisfactory to the Board of Health. No brick, sheet metal, earthenware, or chimney flue shall be used as a sewer ventilator, or to ventilate any trap, drain soil or waste pipe.

Sect. 12. Every water-closet shall be supplied with water from a tank or cistern, and shall have a flushing pipe of not less than one and a quarter (1¼) inches inside diameter. Flushing valves attached directly to a water-closet may be used, but when used the method of installation shall conform in every particular to the requirements of the Inspector.

Sect. 13. Cesspools shall have a top of stone, or arched brick, with iron rim and cover, and may be laid up dry, unless otherwise ordered by the Board of Health.

Sect. 14. No water-closet shall be enclosed with any woodwork.

Sect. 15. None of the provisions of the foregoing sections of this chapter shall apply to the drainage systems of barns and stables, except so far as ordered by the Board of Health, and all drainge systems of barns and stables shall be constructed according to plans approved in writing by the Board of Health.

Sect. 16. Every closed tank or boiler hereafter installed, which is to be used for the storage and supply of hot water, shall, if fed by direct pressure from any source outside of the building, have a safety or relief valve and a vacuum valve. Each valve shall be of a size not less than that known commercially as one-half (½) inch.

Sect. 17. Any person violating any of the provisions of Chapters numbered Seven and Eight shall be liable to a fine of not less than twenty (20) dollars nor more than one hundred (100) dollars for each offence, to be paid into the treasury of the Town of Milton.

Sect 18. Upon the approval of Chapters 7 and 8 by the Attorney-General of the Commonwealth and the publication as required by law, they shall go into effect, and all building laws heretofore adopted by the Town shall be thereby repealed, except that in cases where permits have been issued prior to the approval and publication as above provided, the laws then existing shall govern the work to be performed under said permits.

CHAPTER 9

Street Railways

Section 1. The annual report shall contain the following concerning the street railways in the Town and the street railway companies owning or operating the same, viz:—

Copies or full statements of all locations granted to street railways during the preceding calendar year, with all the terms, conditions and modifications thereof, and the terms of any modifications granted during the year of locations previously granted.

A copy of all regulations in force as to the rate of speed, the mode, manner and extent of use of tracks, and the number and routes of cars of any and all such companies made by the Selectmen under the provisions of Sections 40 and 42 of Chapter 112 of the Revised Laws.

A statement of all taxes paid the Town by street railway companies during the preceding calendar year, which by the terms of Section 47 of Chapter 14 of the Revised Laws are to be applied toward the construction, repair and maintenance of the public ways and removal of snow therefrom within the Town.

Sect. 2. Whenever the Selectmen are of the opinion that additional accommodations for the traveling public are required upon any street railway in the Town, and the company neglects or refuses to furnish the same at their request, it shall be their duty to petition the Board of Railroad Commissioners to order such additional accommodations to be provided under the terms of Section 70 of Chapter 112 of the Revised Laws.

CHAPTER 10

Town Ways

Section 1. Every way that shall be laid out for the acceptance of the Town as a town way shall be not less than fifty feet in width, provided, however, that this section shall not prevent the layout of any way, which, prior to the time when this amendment takes effect, shall have been duly approved by the Board of Survey. Provided, however, that upon written certification by the Board of Survey, in respect to the layout of a particular way, that the requirement of a width of fifty feet will cause practical difficulty or unnecessary hardship, such way, or ways, may be laid out less than fifty feet but not less than forty feet in width.

Sect. 2. If an existing private way the fee of which is in the abutters shall be laid out for the acceptance of the Town as a town way, such way shall not be accepted unless and until the Selectmen shall have certified in writing that such way is well built, and as constructed it is equal to the average construction of existing highways of the Town; provided, however, that this section shall not apply to ways laid out subject to the provisions of law relating to the assessment of betterments.

Sect. 3. Whenever any way shall have been laid out or altered by the Selectmen, and accepted and allowed by the Town, no entry for the purpose of constructing any part of such laying out or alteration shall be made until all claims for damages by reason thereof shall have been finally adjusted or determined, unless such entry shall be authorized by special vote of the Town

CHAPTER 11

Billboards

Section 1. No person or corporation shall erect or maintain a billboard sign or other outdoor advertising device, except as provided in Section 32 of Chapter 93 of General Laws, on any location within three hundred feet of any public park or playground or Metropolitan Park or Parkway, if within public view from any portion of such parks, playgrounds, or parkways; or within three hundred feet of any other public way and within public view from any portion of the same, if such billboard, sign or device exceeds five feet in height or eight feet in length, and no billboard, sign or device placed within three hundred feet of any such public way and within public view shall be nearer than fifty feet to any other such billboard, sign or device; or at the corner of any public ways and within the radius of one hundred fifty feet from the point where the center lines of such ways interesect; or in any place unless the lowest portion of such billboard, sign or device is at least three feet from the ground, and the entire structure, including its braces and supports, is maintained in good repair, painted, and free from accumulation of rubbish and filth and from the pupæ, eggs and caterpillars of gypsy and brown-tail moths and other tree and shrub destroying pests; provided that this section shall not apply to signs or other devices which advertise or indicate either the person occupying the premises in question or the business transacted thereon, or advertise the property itself or any part thereof if for sale or to let.

CHAPTER 12

Use of Buildings

Section 1. Districts.—A residence district is hereby created in the Town of Milton to be known and designated as District A, the bounds of

which shall be as set forth in the Zoning Map hereinafter in this By-Law referred to, the said district comprising all territory within the corporate limits of the Town of Milton, excepting the districts marked B and C on said Zoning Map, which are bounded and described as follows:

District B.—Beginning at a point in the boundary line between Milton and Quincy at the junction of the northeasterly side line of Bryant Avenue, and said boundary line: thence running northwesterly along said northwesterly along said northeasterly boundary of Bryant Avenue to a point where the northwesterly side line of Martin Terraceextended northeasterly would intersect said line of Bryant Avenue; thence turning and running southwesterly along said extension of the northwesterly side line of Martin Terrace and said northwesterly side line itself to the end of said Martin Terrace at the land of L. A. Dame: thence turning to the right and running northwesterly along said land of L. A. Dame to the southeasterly side line of Boulevard Street: thence continuing in a northwesterly direction across said Boulevard Street to the intersection of the northwesterly side line of Boulevard Street with the southeasterly side line of Edge Hill Road; thence turning and running northeasterly and northerly along said southeasterly side line of Edge Hill Road and continuing northerly in the same line across Adams Street to the easterly boundary line of land of the New York, New Haven and Hartford Railroad Company: thence turning and running northwesterly along said easterly boundary line to a point where the southeasterly side line of Wood Street extended southwesterly would intersect said easterly boundary line: thence turning and running northeasterly along said southeasterly side line of Wood Street to a point distant 200 feet northeasterly from the northeasterly side line of Granite Avenue: thence turning at right angles and running southeasterly in line parallel with the northeasterly side line of Granite Avenue and 200 feet distant therefrom to a point distant 200 feet northerly from the northerly line of Adams Street: thence turning and running easterly in a line parallel with said northerly side line of Adams Street and distant 200 feet therefrom to the westerly side line of Church Street: thence turning and running southerly along the westerly side line fo Church Street to a point where the westerly side line extended intersects the southerly side line of Adams Street: thence turning and running westerly to the westerly side line of Mechanic Street: thence turning and running southerly along the westerly side line of Mechanic Street 100 feet: thence turning to the right and running westerly on line parallel with the southerly side line of Adams Street and 100 feet distant therefrom to a point 100 feet northeasterly from the northeasterly side line of Granite Avenue: thence turning and running southeasterly in a line parallel with the northeasterly side line of Granite Avenue and 100 feet distant therefrom to the boundary line between Milton and Quincy: thence turning and running southwesterly along said boundray line to the point of beginning.

District C.—Beginning at a point in the boundary line between Milton and Boston at the Neponset River, said point being at the interesection of the southerly boundary of land of the New England Telephone and Telegraph Company extended easterly and said boundary line between Milton and Boston: thence running westerly along said extension of the southerly boundary line of the New England Telephone and Telegraph Company and said southerly boundary line itself, to the easterly side line of Adams Street; thence continuing in hte same general westerly direction across Street and Canton Avenue to a point 100 feet distant westerly from the westerly side of High Street extended: thence turning and running parallel with the westerly side line of High Street and distant westerly 100 feet therefrom to the northerly side line of Eliot Street: thence turning and running westerly along said northerly side line of Eliot Street to Pine Tree Brook: thence turning and running along the center line of said Brook southerly and southwesterly to the southwesterly boundary of land of the Town of Milton used for a Police Station: thence turning and running northwesterly along the southwesterly boundary and southwesterly

line extended across Central Avenue to land of Octavia L. Horne: thence utrning and running in a general northerly direction along the westerly boundary line of land of said Octavia L. Horne, and said westerly boundary line extended to the northerly side line of Eliot Street: thence turning and running westerly along said northerly side line of Eliot Street to the westerly boundary of land now or formerly of the National Biscuit Company: thence turning and running northerly along said westerly boundary produced across land of the New York, New Haven and Hartford Railroad Company to boundary line between Boston and Milton at the Neponset River: thence turning and running in a general easterly and southerly direction along said boundary between Boston and Milton to the point of the beginning.

Sect. 2. Zoning Map.—(a) The Zoning Map prepared by C. Frederick Joy, Jr. Civil Engineer, dated June 23, 1922, bearing the signatures of the Board of Selectmen and showing the boundaries of Districts A, B, and C, is declared to be a part of this By-Law.

(b) Where a boundary line divides a lot in a single ownership at the time of the adoption of this By-Law, the regulations as to District A shall not apply provided the lot does not extend more than twenty-five feet within the boundary line of said District A.

Sect. 3. Residence Purposes.—In District A, except as herein otherwise provided, no building shall be used, and no building shall be erected or altered which is intended or designed to be used for a store or shop, or for manufacturing or commercial purposes, or any other purpose except for one or more of the following:

(a) A dwelling for one or more families.

(b) A hotel or a lodging or boarding house.

(c) A club other than a club the chief activity of which is a service customarily carried on as a business.

(d) A church, school or academy.

(e) Other purposes which are not particular industries, trades, manufacturing or commercil purposes.

(f) A railroad passenger station.

(g) A farm, truck garden, nursery or greenhouse.

(h) An accessory purpose customarily incident to the above purposes and not detrimental to the use of other property in the district for the above purposes, including a private garage for not more than two automobiles. An accessory purpose shall not include an advertising sign except a real estate sign advertising for sale or rent the property on which it is placed, but may include a sign not over one square foot in area, bearing a name and the designation of any authorized occupation, and being such a sign as is customary on any building used for the purposes permitted by this section of this By-Law.

(i) A garage for more than two automobiles, or a telephone exchange or transforming station, provided in each case that after a public hearing, fourteen days' notice of which shall be given, in such manner as the Selectmen shall rule that such use in a building or buildings located, designed and constructed as described by them in their ruling, will not be seriously detrimental to the use of other property in the district for the purpose specified in the proceeding paragraphs of the section, and provided that the use is confiend to a building or buildings conforming to the description of said ruling.

Sect. 3A. Location fo Buildings in District A.—After this section shall be duly adopted by the Town and become effective pursuant to law, in District A,

1. Set-back: No part of a building except steps, and eaves not exceeding 18" wide, shal be builtwithin 15 feet of the sideline of the street on which it fronts, provide that no bulding need be set back ore than the average of the set-back af the buildngs on the lot next thereto on either

side, a vacant lot or a lot occupied by a building set back more than 15 feet being considered as occupied by a building set back 15 feet, and provided further than on a lot less than 100 feet deep of record in the Registry of Deeds at time this section becomes effective no building need be set back more than 15 per cent of the depth of the lot, and provided that in such cases exceptions shall be permissible as in the case of buildings to which the 15 foot setback applies.

2. Rear Yards: No part of the building except steps, and eaves not exceeding 18" wide shall be built within 25 feet or a distance equal to one-quarter of the mean depth of the lot, whichever is the less, from the rear line line, provided that for each foot that the building sets back from the front line in addition to the requirements in the preceding paragraph its distance from the rear lot line may be reduced one foot, but in no case under this provision to less than 20 feet, excepting that buildings of accessory use as defined in Section 3, paragraph (h) may be built within said twenty-five foot or lesser strip.

3. Side Yards: No part of the building except steps chimneys, and eaves not exceeding 18" wide, and buildings of accessory use as defined in Section 3, paragraph (h) shalll be built within 8 feet a side line on a lot or street, provieded that the widthe of one side yard may be reduced one foot for each foot that the width of the other side yard is increased, but no side yard shall be reduced to less than six feet, and provided further that on no lot of record in Registry of Deeds at the time this section becomes effective, shall the buildable width, with the same permissible exceptions, be reduced to less than 25 feet.

4. Garages: No part of a garage, unless contained within the body of the house, shall be built within 40 feet, or a distance equal to 40 per cent of the mean depth of the lot, whichever is the less, from the front line of the lot, or within 15 feet of a street line forming the side line of a corner lot.

5. Area: No dwelling, exclusive of piazzas, eaves, and steps, shall occupy more than one-third of the lot on which it is place, and no builing feet may be occupied subject, however, to the requirements contained in it is placed, except that on corner lot an addititional area of 400 square other than a dwelling shall occupy more than one-half of the lot on which all other paragraphs of this section.

6. No lot shall be so reduced in area that the dimensions of the open spaces thereon shall be smaller than herein prescribed.

7. No building shall be built within 16 feet of any other building on the same lot excepting buildings of accessory use as defined in Section 3, paragraph (h).

Sect. 3B. Single Family Dwellings.—After this section shall be duly adopted by the Town and shall become eflective pursuant to law, no dwelling shall be erected in Districe A which is intended or designed to be other than a single family detached dwelling, and no building shall be altered so as to be or become a dwelling other than a single family detached dwelling, and no building erected or altered in violation hereof, shall be used as a dwelling provided, however, that a building may be used, erected or altered which is intended or designed to be used as a dwelling for not more than two families on any lot if, at the time this section becomes effective—

1. It is between two lots on which are buildings designed for occupation by two or more families each, located on the same side of the street and less than 100 feet apart, or if

2. The majority of all the frontage on the same street as the lot on a street or streets in substantially direct continuation thereof and within 300 feet of the site of the proposed building is occupied by building designed for two or more families each or side yard adjacent thereto, no such side yard to exceed 10 feet width, all frontage between buildings designed for two or more families and less than 100 feet apart being considered as occupied by buildings for two families.

Sect. 3C. Validity.—The invalidity of Section 3A or Section 3B, or any provision of said Sections, shall not affect the validity of any other Section or provision of said Sections, and said Sections shall affect the provisions of Chapter 12 in force when this amendment becomes effective only so far as said Sections are inconsistent therewith and valid.

Sect. 3D. So much of this amendment as is approved by the Attorney General shall go into effect upon its publication, or notice by delivery, as required by law.

Sect. 4. Existing Buildings.—Any building or part of a building in District A which at the time of adoption of this By-Law is being used for a purpose forbidden in said District may continue to be used for the same purpose or for a purpose not substantially different in character. Any such building or part of a building and any addition thereto made by permission of the Selectmen as hereinafter provided may be structurally altered or added to at any time provided the alterations or additions do not substantially enlarge the part of the building used for such purpose; and any such building or part of a building or such addition which is partially or wholly destroyed by fire or other casualty may be repaired or replaced by a structure of substantially the same size and character and used for the purpose for which it was formerly used or for a purpose not substantially different in character.

Any such building may be added to or enlarge at any time and such addition or enlargement used for the purpose for which the original building may lawfully be used under the provisions of the foregoing paragraph of this section provided in each case that after a public hearing, of which fourteen days' notice shall be given in such manner as the Selectmen may decide, the Selectmen shall determine that such addition or enlargement and the use to be made thereof will not to any substantial extent be more detrimental to the use of other property in the district for the purposes permitted in Section 3 than the building to which such addition or enlargement is to be made or the use then lawfully made thereof, and shall issue a permit therefor. Each such permit issued by the Selectmen shall specify the size and character of the addition or enlargement and no such addition or enlargement shall be constructed or used for any purpose forbidden in District A which is not constructed in accordance with the terms of such permit.

Sect. 5. Incidental Use of Residential Builldings.—Any building in District A designed solely for residential purposes, and used primarily and principally for residential purposes, may be used incidentally for a purpose forbidden in said District, provided, in each case, that after a public hearing, of which fourteen days' notice shall be given in such manner as the Selectmen may decide, the Selectmen shall determine that the use of such building is incidental only, within the meaning hereof, and that such incidental use will not be detrimental to the use of other property in the distritc for the purposes permitted in Section 3, and shall issue a permit therefor.

Sect. 6. Enforcement.—Whoever violates any of the provisions of this By-Law shall be punished by a fine of not more than twenty dollars for each violation. Upon any well founded information from any citizen that this By-Law is being violated or upon his own initiative, the Inspector of Buildings shall take immediate steps to enforce the By-Law.

Sect. 7. Validity.—The invalidity of any section or provision of this By-Law shall not invalidate any other section or provision hereof.

Sect. 8. The provisions of this By-Law shall be construed as being additional to and not as limiting or lessening to any extent whatsoever the requirements of Chapters 7 and 8 of the Revised By-Laws of the Town.

Sect. 9. So much of this By-Law as is approved by the Attorney-General shall go into effect upon its publication, or notice by delivery, as required by law.

CHAPTER 13

Planning Board

A Board consisting of five members is hereby created and established, to be known as the Planning Board. At the annual town meeting to be hald in March, 1923, there shall be elected one member of such Board to sedve for one year, two members to serve for two years and two members to serve for three years, and thereafter there shall be elected at the annual meeting in each year one or two members of such Board to fill the places of members whose terms of office epire in such year. The members of such Board shall serve without pay.

The Board shall perform the the duties prscribed by Sections 70 and 71 of Chapter 41 of the General Laws. It shall be the duty of the Board also to consider and advise upon municipal improvements in regard to which th advice of the Board, at any time, may be asked by any officials of the Town. The Board may upon its own initiative make to any official or officials of the Town such recommendations in regard to municipal improvements as the Board may from time to time think proper or expedient.

LEGISLATIVE ACTS ACCEPTED BY THE TOWN OF MILTON

March 19, 1866. Voted to establish a high school, according to the provisions of Section 2 of Chapter 38 of the General Statutes. (Repealed, 1898, Chapter 496, Section 36)

March 2, 1874. Voted, To accept provisions of Chapter 265 of the Acts of 1873, relative to public landing places is the town of Milton. (Special Act.)

March 4, 1878. Voted, To accept the provisions of Section 23 to 32 of Chapter 24 of the General Statutes, relative to the establishment of a board of fire engineers. (General Laws, Chapter 48, Section 45.)

March 3, 1879. Voted, To accept the provisions of Section 21 of Chapter 38 of the General Statues, relative to the election of School Committee. (General Laws, Chapter 41, Section 1.)

December 8, 1879. Voted, To accept the provisions of Section 1 of Chapter 234 of the Acts of 1878, relative to truants and neglected children. (Repealed, 1919, Chapter 363, Section 16.)

March 5, 1883. Voted, To accept the provisions of Section 10 of Chapter 48 of the General Statutes, relative to truants and neglected children. (Repealed, 1898, Chapter 496, Section 36.)

March 7, 1881. Voted To accept the act of the Legislature, Chapter 158 of the Laws of 1871, entitled, "An Act to Provide for the Election of Road Commissioners." (General Laws, Chapter 41, Section 1.)

March 3, 1890. Voted, To accept the first nine sections of Chapter 51 of the Public Statutes, said Chapter being entitled, "Of Betterments, and other Assessments on Account of the Cost of Public Improvements." (General Laws, Chapter 80.)

February 12, 1891. Voted, To accept the act authorizing towns and cities to lay out public parks within their limits; being Chapter 154 of the Acts of 1882. (General Laws, Chapter 45, Sections 1 to 11.)

March 2, 1891. Voted, To accept the provisions of Chapter 386 of the Acts of 1890, relative to the election of town officers. (Repealed 1893, Chapter 417, Section 345.)

February 3, 1894. Voted, That the town does hereby accept the provisions of Section 268 of Chapter 417 of the Acts of 1893, relative to the election of a separate Board of Assessors. (General Laws, Chapter 41, Section 1.)

November 28, 1894. Voted, To accept the provisions of Chapter 324 of the Acts of 1894, entitled an "Act Relative to the Reservation of Spaces in Public Ways." (General Laws, Chapter 82, Section 34.)

March 4, 1895. Voted, That the town hereby accepts the provisions of Chapter 309 of the Acts of 1885, authorizing towns to license groves to be used for picnics and other lawful amusements. (General Laws, Chapter 140, Sections 188 to 190.)

March 4, 1895. Voted, To accept the provisions of Section 272 of Chapter 417 of the Acts of 1893, relative to the election of Sewer Commissioners. (General Laws, Chapter 41, Section 1.)

March 4, 1895. Voted, To accept the provisions of Chapter 462 of the Acts of 1893, relative to the establishment of a building line on Public Ways. (Repealed, Acts of 1917, Chapter 344, Part 8, Section 1.)

March 4, 1895. Voted, To accept the provisions of Chapter 218 of the Acts of 1894 as amended by Chapter 473 of that same year, relative to the election of Boards of Health in towns. (General Laws, Chapter 41, Section 1.)

March 4, 1895. Voted, To accept the provisions of Sections 20 and 21 of Chapter 50 of the Public Statutes relative to the establishment and grading of sidewalks by the Selectmen. (General Laws, Chapter 83, Section 25.)

March 4, 1895. Voted, To accept the provision of Chapter 304 of the Acts of 1895, authorizing the town of Milton to construct one or more systems of sewerage. (Special Act.)

REPORT OF THE LEGISLATIVE COMMITTEE

For The Year Ending December 31, 1928

Mr. L. B. Kent has acted for us in examining all bills filed in the Legislature and has reported to the Committee such bills as he thought might affect the Town of Milton. The Committee has also examined the bills as they were printed. Bills which seemed to require possible action were reported to the Selectmen with the recommendations of the Committee, so that the Selectmen might in their discretion instruct the legislative counsel to represent the Town.

Respectfully submitted,

LINCOLN BRYANT,
Chairman for the Committee.

Voted, That the above report be accepted and placed on file.

Article 11. To see what sum of money the Town will vote to appropriate to be expended by the Selectmen for the celebration of the Fourth Day of July, 1929.

Voted, That the sum of $500 be appropriated to be expended by the Selectmen for the celebration of the Fourth Day of July, 1929.

5.	Tree Warden Department:		
	Public Work	$8,500	
	Private Work	3,500	12,000.00
6.	Moth Department:		
	Public Work	$6,000	
	Private Work	4,000	10,000.00
7.	Street Lighting		25,508.25
8.	Additional Lights		1,000.00
9.	Building Inspector		3,000.00
10.	Sealer of Weights and Measures		500.00

Article 13. To see if the Town will vote to authorize the Moderator to apppoint a Committee of three citizens to study the needs of the Town Departments in regard to office space; to appropriate money for the use of said committee and act on anything relative thereto.

Voted, That the Moderator is hereby authorized and instructed to appoint a committee of three citizens who shall study the needs of the Town Departments in regard to office space, prepare plans and specifications as deemed necessary and report in writing to the Selectmen not later than December 1, 1929, and that the sum of $1,500 be appropriated for the use of said committee.

COMMITTEE APPOINTED

William B. Thurber
G. Frank Kemp
Arthur W. Rice

Article 14. To see if the Town will vote to construct a fireproof vault in the office of the Town Clerk and Tax Collector in accordance with the plans approved by the Commissioner of Public Records and appropriate money for the same and act on anything relating thereto.

Voted, That the Town do not so vote.

Article 15. To see what sum of money the Town will appropriate for Traffic Signals to be used on public ways, and act on anything relating thereto.

Voted, That the sum of $11,000 be appropriated, and that the money be expended by the Selectmen.

HEALTH AND SANITATION

Article 16. To see what sum of money the Town will vote to appropriate for Health and Sanitation the present year.

Voted, That the following sums be appropriated under this article:

1.	Health—General	$7,750.00
2.	Dental Dispensary for Schools	750.00
3.	Inspector of Animals	300.00
4.	Vital Statistics	750.00
5.	Sewer Maintenance	3,500.00
6.	Maintenance and Repairs of Norfolk County Hospital	8,646.94

Article 17. To see what sum of money the Town will appropriate for the disposal of garbage, ashes and other refuse and offal, and to see if the Town will authorize the Board of Health to make a contract therefor for a term of years.

Voted, That the Board of Health be and hereby is authorized to make a contract for the disposal of garbage, ashes and other refuse and offal, for a term of not more than three years, and that the sum of $21,560 be appropriated for the above purposes the current year.

Article 18. To see what sum of money the Town will vote to raise and appropriate for the construction of a garage or shelter for town automobiles on the property owned by the Town adjacent to the Thacher Building, to be used by the Water and Engineering Department, and act on anything relating thereto.

Voted, That the Board of Water Commissioners be authorized to build a garage on the property owned by the Town adjacent to the Thacher Building, to be used by the Water and Engineering Department, and that they be authorized to expend $6,500 from the unexpended balance of the Water Maintenance Account for said purpose.

Article 19. To see what sum of money the Town will vote to appropriate for the Water Department the present year, to be expended by the Board of Water Commissioners, and act on anything relating thereto.

Voted, That the sum of $122.000 be appropriated for the use of the Water Department the present year, to be expended by the Water Commissioners pursuant to the provisions of Acts of 1895, Chapter 304, and acts in amendment thereof and in addition thereto, said sum to include Metropolitan Water Assessment, the sum of $25,000 for the retirement of "Town of Milton Water Loan" bonds due in 1929, and $15,192 for the payment of interest on bonds and notes outstanding in "Town of Milton Water Loans"; and that the balance in the water maintenance account as of December 31, 1928, after deducting $6,500 for the building of a garage, be appropriated for Water Department purposes.

Article 20. To see what sum of money the Town will vote to expend for the construction of sewers for sanitary purposes, and for sewage disposal and to raise and appropriate money for the same.

Voted, That the Town appropriate the sum of $40,000 for the construction of sewers for sanitary purposes and for sewage disposal; and that to meet said appropriation there be raised in the tax levy of the current year the sum of $9,000, and that the Treasurer with the approval of the Selectmen be and hereby is authorized to borrow the sum of $31,000 and to issue bonds or notes of the Town therefor, said bonds or notes to bear on their faces the words "Town of Milton Sewer Loan, 1929" and to be payable in accordance with the provisions of Section 19 of Chapter 44 of the General Laws, so that the whole loan shall be paid in not more than twelve years from the date of the first bond or note or such earlier dates as the Treasurer or Selectmen may determine. Each bond shall be in coupon form and shall be subject to registration as to principal and may be exchanged in compliance with the statutory provisions for a registered certificate representing an equivalent obligation for principal and interest. The coupon bonds shall not be obligatory without the authenticated certificate of the First National Bank of Boston thereon.

(Unanimous Vote)

HIGHWAYS

Article 21. To see what sum of money the Town will vote to appropriate for the Street Department the present year.

Voted, That the following sums be appropriated under this article:

1.	General Expense	$80,000.00
2.	Permanent Construction	17,250.00
3.	Sidewalks	8,000 00

Article 22. To see what sum of money the Town will appropriate for the drainage of public streets the ensuing year.

Voted, That tht sum of $8,500 be appropriated.

Article 23. To see what sum of money the Town will vote for the care and maintenance of Granite Avenue Bridge over the Neponset River, under Chapter 58, General Acts of 1915.

Voted, That the sum of $7206.70 be appropriated.

Article 24. To see if the Town will vote to accept Reservation Road as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Reservation Road as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate the sum of $7,500 for the construction of said way.

Article 25. To see if the Town will vote to accept Plymouth Avenue as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Plymouth Avenue as a town way as laid out by the Selectmen under the laws authorizing the assessment of betterments, and to appropriate the sum of $12,000 for the construction of said way.

Article 26. To see if the Town will vote to accept Laurel Road as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Laurel Road as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate the sum of $6,250 for the construction of said way.

Article 27. To see if the Town will vote to accept Breck Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Breck Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate the sum of $3,500 for the construction of said way.

Article 28. To see if the Town will vote to accept Viola Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Viola Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate the sum of $2,000 for the construction of said way.

Article 29. To see if the Town will vote to accept Bassett Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept Bassett Street as a town way as laid out by the Selectmen under laws authorizing the assessment of betterments, and to appropriate the sum of $4,400 for the construction of said way.

Article 30. To see if the Town will vote to elect at its next annual meeting three Road Commissioners, one to serve for one year, one for two years and one for three years, and at each annual meeting thereafter to elect one Road Commissioner for three years as provided in Section 63 of Chapter 41 of the General Laws.

Voted, That the Town do not so vote.

Voted, That the report of the Committee be accepted and the committee discharged.

Article 31. To see if the Town will accept the relocation and alteration of Brush Hill Road at the junction with Blue Hill Avenue, as laid out by the Selectmen, and to appropriate money therefor, and act on anything relating thereto.

Voted, To accept the relocation and alteration of Brush Hill Road at the junction with Blue Hill Avenue, as laid out by the Selectmen, and to appropriate the sum of $1,100 for the construction of said way as relocated and altered.

Article 32. To see if the Town will accept the relocation and alteration of Artwill Street at its junction with Reedsdale Road, as laid out by the Selectmen, and to appropriate money for the same, and act on anything relating thereto.

Voted, To accept the relocation and alteration of Artwill Street at its junction with Reedsdale Road, as laid out by the Selectmen.

Article 33. To see what sum of money the Town will appropriate for the construction of the junction of Elm Street and Canton Avenue as relocated and altered by the Selectmen and accepted by vote of the Town at the annual town meeting in March, 1928, and act on anything relating thereto.

Voted, That the sum of $450 be appropriated for the construction of the junction of Elm Street and Canton Avenue as relocated and altered by the Selectmen and accepted by the vote of the Town at the annual town meeting in March, 1928.

Article 34. To see what sum of money the Town will appropriate for the payment of amounts due the County of Norfolk on account of expense and damages paid by the County in connection with the layout of Granite Avenue, and for the payment of other damages in connection with the same.

Voted, That the sum of $11,799.53 be appropriated for the payment of amounts due the County of Norfolk on account of expenses and damages paid by the County in connection with the layout of Granite Avenue, and for the payment of other damages in connection with the same.

Article 35. To see what sum of money the Town will appropriate for the completion of the construction of Granite Avenue, and act on anything relating thereto.

Voted, That the sum of $6,500 be appropriated.

Article 36. To see what sum of money the Town will vote to raise and appropriate for the reconstruction and repair of Randolph Avenue in conjunction with the Commonwealth of Massachusetts and/or the County of Norfolk, and to see if the Town will authorize the Board of Selectmen in its name and behalf to enter into all necessary and proper contracts, in connection with the same, with said Commonwealth and/or said County, and with corporations and persons, and act on anything relating thereto.

Voted, That the Town appropriate no money and that no authority for action be given the Selectmen.

Article 37. To see if the Town will vote to revoke the reservation of a certain part of the special space for the use of street railways heretofore reserved by the Town under authority of the Acts of 1895, Chapter 121, said part being described as follows:

> All that part of space reserved as aforesaid in Randolph Avenue, commencing at the boundary line between the city of Quincy and the town of Milton and running about 4500 feet and terminating on the westerly side line of Randolph Avenue at land of the Commonwealth of Massachusetts.

and act on anything thereto.

Voted, That the Town do not so vote.

Article 38. To see what sum of money the Town will appropriate for the construction of, and payment of damages in connection with, Bassett Street, as laid out by the Selectmen and accepted by the vote of the Town at the annual meeting in March, 1928, and act on anything relating thereto.

Voted, To appropriate $3,900 for the construction of, and payment of damages in connection with, Bassett Street as laid out by the Selectmen and accepted by the vote of the Town at the annual meeting in March, 1928.

Article 39. To see if the Town will vote to authorize the Board of Park Commissioners to sell and convey at private sale, in the name and behalf of the Town, at such price and under such terms and conditions as the Park Commissioners may determine the whole or any part of a certain parcel of land on Blue Hill Avenue, the same having been acquired by the Town for the purposes of a gravel pit and, later, having been held for

playground purposes, and being bounded and described as follows, and to act on anything relating thereto.

Commencing at a stone bound in the County Commissioners' line forming the southeasterly boundary of Blue Hill Avenue, set at land now or formerly of Bridget Will, thence running southerly along said land of Will 104.05 feet to a point; thence running northwesterly to said County Commissioners' line and forming an angle of 90 degrees therewith, 85 feet; thence running northeasterly along said County Commissioners' line, 60 feet to the point of beginning.

Containing 2,550 square feet more or less.

Voted, That the Board of Park Commissioners be and hereby is authorized to sell and convey at private sale, in the name and behalf of the Town, at such price and under such terms and conditions as the Park Commissioners may determine, the whole or any part of a certain parcel of land on Blue Hill Avenue, the same having been acquired by the Town for the purposes of a gravel pit, and, later, having been held for playground purposes, and being bounded and described as follows:

Commencing at a stone bound in the County Commissioners' line forming the southeasterly boundary of Blue Hill Avenue, set at land now or formerly of Bridget Will, thence running southerly along said land of Will 104.05 feet to a point; thence running northwesterly to said County Commissioners' line and forming an angle of 90 degrees therewith, 85 feet; thence running northeasterly along said County Commissioners' line, 60 feet to the point of beginning.

Containing 2550 square feet more or less.

Article 40. To see if the Town will authorize the Selectmen to sell and convey in the name and behalf of the Town, at such price and upon such terms as they may determine, a certain parcel of land in the Town, bounded and described as follows:

A parcel of land on the west side of Hudson Street, being Lot No. 135, bounded as follows: On the east by Hudson Street; on the south by Lot No. 134; on the west by Lot No. 127; on the north by Lot No. 136.

All shown on Plan No. 12 in the Assessors' Office.

The same having been acquired by the Town at sale for non-payment of taxes, the right of redemption having been foreclosed, and act on anything relating thereto.

Voted, That the Board of Selectmen be and hereby is authorized to sell and convey in the name and behalf of the Town, at such price and upon such terms as they may determine, a certain parcel of land in the Town bounded and described as follows:

A parcel of land on the west side of Hudson Street, being Lot No. 135, bounded as follows:

On the east by Hudson Street; on the south by Lot No. 134; on the west by Lot No. 127; on the north by Lot No. 136;

All shown on Plan No. 12 in the Assessors' Office.

The same having been acquired by the Town at sale for non-payment of taxes, the right of redemption having been foreclosed.

Article 41. To see if the Town will vote to authorize the Board of Selectmen to sell and convey on behalf of the Town, at such price and upon such terms as they may determine, a certain parcel of land purchased by the Town at a tax sale for non-payment of taxes, bounded and described as follows:

A certain parcel of land situated in Milton and bounded: Southerly by the Quincy line; westerly by land now or formerly of Edward Baker and land now or formerly of John F. Beatty and Joseph P. and Martin Lomasney; northerly by land now or formerly of said Betty and said Lomasney; easterly by land now or formerly of said Beatty and said Lomasney and by land now or formerly of Lillian Davis and Edith Karp.

Containing 4.2 acres and being quarry land off Quarry Street.

and act on anything relating thereto.

Voted, That the Board of Selectmen be and hereby is authorized to sell and convey on behalf of the Town, at such price and upon such terms as they may determine, a certain parcel of land purchased by the Town at a tax sale for non-payment of taxes, bounded and described as follows:

A certain parcel of land situated in Milton and bounded: Southerly by the Quincy line; westerly by land now or formerly of Edward Baker and land now or formerly of John F. Beatty and Joseph P. and Martin Lomasney; northerly by land or formerly of said Beatty and said Lomasney; easterly by land now or formerly of sair Beatty and said Lomasney and by land now or formerly of Lillian Davis and Edith Karp.

Containing 4.3 acres and being quarry land off Quarry Street.

Article 42. To see if the Town will vote to authorize the Board of Selectmen, in its name and behalf to sell and convey at public auction or private sale, a certain parcel of land formerly used as a gravel pit, bounded and described as follows:

A parcel of land in the Town of Milton, bounded: Northwesterly by Blue Hill Avenue; northeasterly by the land now or formerly of Wallace C. Tucker; Southeasterly by land now or formerly of Clara S. McCully; southwesterly by a passage and by land now or formerly of Martin Gibbons.

Containing 843 square feet more or less.

and act on anything relating thereto.

Voted, That the Town do not so vote.

Article 43. To see if the Town will vote to accept as a gift, a certain parcel of land bounded and described as follows:

Northeasterly on land now or formerly of New York, New Haven and Hartford Railroad Company, 15 feet; southeasterly on Lot B shown on the plan hereinafter referred to, 56.98 feet; southwesterly on Cliff Road, 15.16 feet; northwesterly on Lot A shown on said plan, 56.83 feet.

Containing 843 square feet more or less. Said lot is shown on a plan entitled, "Town of Milton—Plan of Land at the End of Cliff Road," dated December 4, 1928, by Forrest J. Maynard, Town Engineer.

and act on anything relating thereto.

Voted, To accept as a gift, a certain parcel of land bounded and described as follows:

Northeasterly on land now or formerly of the New York, New Haven and Hartford Railroad Company, 15 feet; southeasterly on Lot B shown on the plan hereinafter referred to, 56.98 feet; southwesterly on Cliff Road, 15.16 feet; northwesterly on Lot A shown on said plan, 56 83 feet.

Containing 843 square feet more or less.

Said lot is shown on a plan entitled, "Town of Milton—Plan of Land at the End of Cliff Road," dated December 4, 1928, by Forrest J. Maynard, Town Engineer,

and that the Selectmen be and hereby are authorized to act for the Town in connection with same.

Article 44. To see if the Town will vote to amend Chapter 10 of the Revised By-Laws, in Section 1 thereof, by striking out said section and substituting substantially the following:

> Section 1. No way shall be laid out for the acceptance of the Town as a town way, less than fifty feet in width, excepting, that upon written certification by the Board of Survey, in respect to the layout of a particular way, that the reuirement of a width of fifty feet will cause practical difficulty or unnecessary hardship, such way, or ways, may be laid out less than fifty feet but not less than forty feet in width, and provided that this section shall not prevent the layout of any way which, prior to July 9, 1927, was duly approved by the Board of Survey, or the layout of a way not less than 30 feet in width over a private way which, prior to July 9, 1927, was constructed and open to public travel (or prior to March 3, 1913, was constructed and open to public travel,)

and act on anything relating thereto.

Voted, That Chapter 10 of the Revised By-Laws be and hereby is amended by striking out Section 1 thereof and substituting the following:

> Section 1. No way shall be laid out by the Town as a town way less than fifty feet in width, excepting that upon written certification by the Board of Survey, in respect to the layout of a certain way, that the requirement of a width of fifty feet will cause practical difficulty or unnecessary hardship, such way, or ways, may be laid out less than fifty feet but no less than 40 feet in width, and provided that this to July 9, 1927, was duly approved by the Board of Survey, and further provided that if the requirement of a width of fifty feet will cause practical difficulty or unnecessary hardship, then this section shall not prevent the layout of any way not less than thirty feet in width, over a private way which, prior to March 3, 1919, was constructed and open to public use.

PUBLIC WELFARE

Article 45. To see what sum of money the Town will vote to appropriate for the Public Welfare Department the present year.

Voted, That the sum of $13,000 be appropriated for the present year and $526.02 be appropriated for unpaid bills of 1928.

Article 46. To see if the Town will authorize the Selectmen to let or lease for not more than five years, or such time as the Selectmen may determine, the building known as the men's house, and land surrounding and appurtenant thereto, located on the Town Farm property off Canton Avenue, Milton, Massachusetts, and act on anything relating thereto.

Voted, That the Selectmen be and hereby are authorized to let or lease for not more than five years, the building known as the men's house and the land surrounding and appurtenant thereto, located on the Town Farm property off Canton Avenue, Milton, the proceeds thereof, after payment of expenses in connection with the same, to be for the benefit of the poor of Milton as the Selectmen shall judge best, in accordance with the terms of the will of William Stoughton, formerly of Boston, deceased.

Soldiers' Benefits

Article 47. To see what sum of money the Town will vote to appropriate for Soldiers' Relief the present year.

Voted, That the sum of $2,000 be appropriated.

Article 48. To see what sum of money the Town will vote to appropriate for State Aid and Military Aid under Chapter 200, General Acts of 1919, the present year.

Voted, That the sum of $800 be appropriated.

Article 49. To see what sum of money the Town will vote to appropriate to be expended by the Huntington Frothingham Wolcott Post No. 102, G. A. R., on Memorial Day.

Voted, That the sum of $400 be appropriated.

Schools and Libraries

Article 50. To see what sum of money the Town will vote to appropriate for the support of the Schools the present year.

Voted, That the sum of $277,000 be appropriated for the present year and $118.50 be appropriated for unpaid bills of 1928.

Article 51. To see what sum of money the Town will vote to appropriate for Vocational Education under the provisions of General Laws, Chapter 74, and act on anything relating thereto.

Voted, That the sum of $1,000 be appropriated for the present year and $291.47 be appropriated for unpaid bills of 1928.

Article 52. To see if the Town will vote to accept the provisions of Section 44 of Chapter 32 of the General Laws relating to municipal pension for school janitors, and act on anything relating thereto.

Voted to accept the provisions of Section 44 of Chapter 32 of the General Laws relating to municipal pension for school janitors.

Article 53. To see if the Town will vote to authorize the appointment of a committee which shall have authority to consider the need for additional schoolhouse accommodations in the Mattapan district and to procure plans, specifications, and approximate estimates for an elementary school building on the schoolhouse site on Eliot Street, and that the sum of $3,000 (Three Thousand Dollars) be appropriated to defray the expenses of such committee, said committee to report to the Selectmen in writing not later than December 1, 1929.

Voted, That the Moderator be authorized and instructed to appoint a committee which shall have authority to consider the need for additional schoolhouse accommodations in the Mattapan district and to procure plans, specifications and approximate estimates for an elementary school building on the schoolhouse site on Eliot Street, and that the sum of $3,000 (Three Thousand Dollars) be appropriated to defray the expenses of such committee, said committee to report to the Selectmen in writing not later than December 1, 1929.

COMMITTEE APPOINTED

Charles M. Rogerson
William F. Dugan
Howard E. Murphy
Eliot T. Putnam
Arthur W. Vose.

It was unanimously requested that the Committee when selecting a name for this school consider the name of "Nathaniel H. Stone" as being an appropriate one.

Article 54. To see what sum the Town will raise and appropriate for completing the construction of the school building on Edge Hill Road and for original equipment and furnishings of said school building, and act on anything relating thereto.

Voted, That the Committee appointed by the Moderator pursuant to the vote of the Town at its Annual Town Meeting held in March 1928, and continued as a committee by vote of the Town at its Special Meeting held June 13, 1928. for the purpose of erecting the school building on Edge Hill Road, be further continued as a committee for the purpose of equipping said school and grading land and playgrounds appurtenant thereto and that the sum of $37,000 be appropriated for said purposes to be expended by said committee: that $8,802.21 be raised in the tax levy of the current year; that $2,588.65 be transferred from the unexpended balance of the New Tucker School Account; that $11.94 be transferred from the unexpended balance of the High School Addition account; that $597 20 be transferred from the unexpended balance of the War Memorial Account; and that the Treasurer be and hereby is authorized in the name and behalf of the Town to borrow a sum not exceeding $25,000 for said purposes and to issue bonds of the Town not exceeding said sum. Said bonds shall bear on their face the words "Town of Milton School Loan", and shall be payable as required by Section 19 of Chapter 44 of the General Laws, so that the whole loan shall be paid in not more than five years from their date. They shall be sold at not less than the par value thereof from time to time by the Treasurer. Each bond shall be in coupon form, subject to registration as to principal, and may be exchanged in compliance with the statutory provisions for a registered certificate representing an equivalent obligation for the principal and interest. The coupon bonds shall not be obligatory without the authenticating certificate of the First National Bank of Boston thereon.

(Unanimous Vote)

Article 55. To see what sum of money the Town will vote to appropriate for the Public Library the present year.

Voted, That the sum of $20,500 be appropriated.

Article 56. To see if the Town will vote to erect and equip a branch library building in the Mattapan district, and to determine how the money therefor shall be raised and to act on anything relating thereto.

Voted, That the Trustees of the Library be and hereby are authorized to erect and equip a branch library on the town land at 101 Blue Hills Parkway, substantially in accordance with plans formulated by them at the request of the Town at the Annual Town Meeting held March 17, 1928, being plans made by Eliot T Putnam, Architect, dated December 14, 1928; and that the sum of $40,000 b appropriated for this purpose.

REPORT REGARDING LIBRARY BRANCHES AT MATTAPAN AND EAST MILTON

Pursuant to the vote of the Town at the annual meeting in March 1928, the Trustees of the Milton Public Library have proceeded to formulate plans for the possible development of the Mattapan and East Milton branches of the Library.

The branch in Mattapan at present occupies the Kidder House on a site which, together with the building, has recently been acquired by the Town by gift from the Kidder House Association. The site is well suited for a new branch library building, being conveniently located and of ample size. The present building is believed by the Trustees to be inadequate. It is not advisable to go to any considerable expense to repair or to reconstruct it.

The branch in East Mliton is now located in rented quarters. The rooms are small and inconvenient, and this rapidly growing section of the Town needs better accommodation. The Trustees have viewed and considered several sites in East Milton. The Town now owns land on Adams Street, a part of the site of the old schoolhouse. Other locations have certain advantages over this. The Trustees do not feel that they are ready yet to make a definite recommendation for this branch and desire more time for consideration.

Tentative plans have been prepared for a branch library building suitable for the site in Mattapan and an estimate of the cost of the building has been made.

The cost as so estimated is $40,000 complete with the equipment and the necessary grading, etc.

The plans have been studied carefully with reference to the particular needs of the Town, and of the district for which the building is designed, and comparisons have been made with other communities which have met with the same problem. The Trustees believe that a library built from these plans would be most desirable for the present use and capable of being extended if necessary for any future growth of the Town in the district.

As the generous gift to the Town has made the site available without cost for the Mattapan branch, the Trustees recommend that a building be erected thereon in accordance with the plans and at a cost as noted above. The Trustees believe that such a building is much needed if the work of the Library in Mattapan is to be extended or maintained. They feel also that a building in East Milton, which is equally needed, should be erected in the near future.

Trustees of the Milton Public Library.

NATHANIEL T. KIDDER,
Chairman.

The above report was read by Mr. Kidder and accepted and placed on file.

Recreation and Unclassified

Article 57. To see what sum of money the Town will vote to appropriate for the general uses of the Board of Parw Commissioners the present year.

Voted, That the sum of $5,510 be appropriated.

Article 58. To see if the Town will vote to acquire the land hereinafter described, offered to the Town as a gift, for the purposes of a playground and, or recreation center, and appropriate such sum as may be necessary to meet the expense of taking title to said land and marking the boundaries of the same, and act on anything relating thereto. Said land is bounded and described as fololws:

> Northerly by Maple Street, 15.13 feet; northeasterly by land now or formerly of Martin, 238.07 feet; southeasterly by land now or formerly of Frederick A. Gaskins, 77.88 feet; southwesterly by said land now or formerly of Gaskins, 36.79 feet; northwesterly by other land of James S Russell, 155.10 feet; southwesterly by said land of Russell in two courses, 41.68 feet and 83.02 feet.
>
> Containing 9,942 square feet more or less and being shown on a plan entitled, "Plan of Land in Milton, Mass.", by Aspinwall & Lincoln, Civil Engineers, dated December 5, 1928, on file in the Office of the Park Commissioners.

Voted, That the Town do not so vote.

Article 59. To see what sum of money the Town will vote to appropriate for Pensions and Annuities the present year.

Voted, That the following sums be appropriated:

1.	Police and Firemen, Section 85, Chapter 32, General Laws	$ 4,200 00
2.	Annuity, Chapter 16, Special Acts of 1919	300 00
3.	Police and Firemen's Widows, Pensions, Section 88, Chapter 32, General Laws	1,200 00
4.	Laborers' Pensions, Section 77, Chapter 32, General Laws	6,066 96
5.	School Teachers' Pensions, Section 42, Chapter 32, General Laws	925 00
6.	Pensions, Chapter 9, Special Acts of 1925	1,000 00

Enterprises and Cemeteries

Article 60. To see what sum of money the Town will vote to appropriate for the improvement of the Cemetery the present year.

Voted, That the sum of $17,700 be appropriated.

Article 61. To see if the Town will authorize the Trustees of the Cemetery to secure plans and construct a building in the cemetery grounds to be used for storage of tools and equipment, and locker rooms for employees, and to raise and appropriate money for the same, and act on anything relating thereto.

Voted, That the Trustees of the Cemetery be and hereby are authorized to secure plans and construct a building in the cemetery grounds to be used for storage of tools and equipment, and locker rooms for employees, and that the sum of $10,000 be appropriated for said purpose.

Interest and Maturing Debt

Article 62. To see what sum of money the Town will vote to appropriate for Interest and Maturing Debt the present year.

1. Interest

   Voted, That the sum of $46,767.50 be appropriated.

2. Maturing Debt

Voted, That the sum of $87,000 be appropriated and to meet said appropriation, there be raised in the tax levy of the current year the sum of $84,879.45 and that the sum of $2,120.55 be appropriated out of the Premium on Bond Account.

Article 63. To see if the Town will vote to authorize the Moderator to appoint a committee of citizens which shall consider the needs, present and future, of the Town in respect to aviation requirements, and report to the Warrant Committee, with recommendations, on or before December 1, 1929.

Voted, That the Moderator be and hereby is authorized and instructed to appoint a committee of citizens which shall consider the needs, present and future, of the Town in respect to aviation requirements, and report to the Warrant Committee, with recommendations, on or before December 1, 1929.

Committee Appointed

Harold W. Pierce
John E. Berry
Thomas F. White

Article 64. To see what action the Town will take upon the reports of the committees aappointed under Articles 58 and 59 of the Warrant for the annual town meeting held in March, 1928, for the following purposes, respectively: to consider the regulation of future real estate developments in the Town, and to consider the advisability of revising the building laws of the Town; and act on anything relating thereto and appropriate money in connection therewith.

Voted, That the two committees appointed under articles 58 and 59 of the warrant for the annual town meting held in March 1928, be consolidated into a single committee of five, composed of the same five citizens appointed on said committees, who shall consider the regulation of future real estate developments in the Town, the policy of laying out highways and assessment of Betterments thereon and the advisability of revising the building laws of the Town, and report to the Board of Selectmen not later than December 1, 1929, and that the appropriations of $600.00 made at said meeting held in March 1928 be continued for the use of said committee. Oscar W. Haussermann was appointed to fill vacancy caused by resignation of Edward C. Bradlee.

Article 65. To see if the Town will vote to amend Chapter 4 of the Revised By-Laws, in Section 2 thereof, by striking out from said section the words "a list of all taxes assessed", and act on anything relating there-

Voted, That Chapter 4, Section 2 of the Revised By-Laws be hereby is amended by adding in the 10th line thereof, after the word "assessed," the words, "Except the," Poll Tax list so that Section 2 will read as follows:

> Section 2. The Selectmen shall annually, not less than seven days before the annual meeting, cause to be printed and distributed among the tax-payers of the Town, a detailed report of all money received into and paid out of the Town treasury during the preceding calendar year, with such information and recommendations as they may deem proper, and with detailed estimates of the amounts of money that will be required for the ensuing financial year. With this report shall be printed the records of all meetings of the Town held since the last annual report was printed, the reports of the Auditors, of the Surveyors of Highways, and of the Fire Department, the Collector's account of receipts, payments, and abatements, a list of all taxes assessed, except the poll tax list, an abstract of the births, marriages, and deaths to be furnished by the Town Clerk, a statement concerning the condition and funds of the public library and the cemetery to be furnished by the Trustees respectively, and a statement of all other funds belonging to the Town or held for the benefit of its inhabitants; also statements of the liabilities of the Town on bonds, notes, certificates of indebtedness or otherwise, and of the total money paid the Town, the income of which is to be applied to the care of lots in the cemetery. The annual report shall also contain such other matters as maybe required by the By-Laws of the Town

APPROVED BY THE ATTORNEY GENERAL JUNE 1, 1929

Article 66. To see what sum of money the Town will vote to appropriate for a readjustment of the taxable property values by the Board of Assessors during the present year.

Voted, That the Town do not so vote.

Article 67. To see if the Town will vote to accept an act authorizing the City of Boston and the Town of Milton to reimburse Thomas Gordon for money paid by him for expense of defending a certain action and in satisfaction of a certain execution therein.

Voted, That the Town so vote.

Article 68. To see what sum of money the Town will vote to appropriate to reimbures Thomas Gordon for money paid by him for expense of defending, and if satisfaction of an execution issued in, an action brought against him to recover damages for a certain act done in the performance of his duties as an employee of the Granite Avenue Bridge Commission.

Voted, That the sum of $746.15 be appropriated.

And you are directed to warn said inhabitants qualified as aforesaid to meet at the times and places and for the purposes herein mentioned, by posting attested copies of this Warrant in each of the post-offices of said Town fourteen days at least before said second of March, and leaving printed copies thereof at the dwelling houses of said Town at least four days before said date.

Hereof fail not, and make due return of this Warrant with your doings thereon to the Town Clerk, on or before said second of March, next.

Given under our hands at Milton, the fourteenth day of February, nineteen hundred and twenty-nine.

JOSIAH BABCOCK,
FREDERICK A. GASKINS,
KENNETH D. JOHNSON,
Selectmen of Milton.

Commonwealth of Massachusetts, Norfolk, ss.

Milton, February 25, 1929.

Pursuant to the within warrant I have notified the inhabitants of the Town of Milton as within directed to meet at the time and places and for the purposes therein mentioned by posting attested copies of the same in the post offices of the town and leaving copies at the dwellings of the inhabitants.

PELEG BRONSDON,
Constable of Milton.

March 9, 1929 at 6:30 P. M.

Voted, That the Meeting be dissolved.

The foregoing meeting was opened March 2, 1929, at 5:45 A. M., by the Wardens in the several precincts.

Attest:
G. FRANK KEMP,
Town Clerk.

DEPARTMENT REPORTS

REPORT OF SELECTMEN

Milton, Mass., Dec. 31, 1929.

To the Citizens of Milton:

Your Board of Selectmen respectfully submits the following report for the year 1929:

As a result of the annual election held on the first Saturday in March, Messrs. Josiah Babcock, Kenneth D. Johnson and Norton Wigglesworth were elected Selectmen for one year. Both Messrs. Babcock and Johnson are serving their sixth successive terms and Mr. Wigglesworth his second term. The Board organized with Mr. Johnson serving as Chairman and Mr. Wigglesworth as Secretary.

Appointments

The Board made very few changes in the matter of appointments during the year with the exception of Insurance Adviser to which office Frank K. Forde was appointed, and of Superintendent of the Highway Department to which Forrest J. Maynard was appointed as of April 1st. The other appointments made by the Board will be found elsewhere in this annual report of the town.

Licenses

Questions involving the interpretation and administration of the Zoning By-Law have continued to occupy the attention of the Board. There have been eleven public hearings on applications filed for variances of the existing by-law and additions to existing commercial properties. Public hearings were held on three applications involving rather prominent commercial properties located in various parts of the town that are legally styled as "non-conformers" by reason of the fact that they are located in the residential district but are allowed to continue their respective commercial operations because they were in the residential district at the time the Zoning By-Law was enacted. The applications before the Board in all three of these cases called for material additions which the Board felt, if allowed, would substantially change the character of the neighborhood and derogate from the original intent and purpose of the Zoning By-Law. In view of this conclusion these applications were all denied. In one case the Board granted a garage location where the lot line, due to the irregular shape of the lot made it impossible for the owner to locate his garage in accordance with the provisions of the Zoning By-Law. In another case, the Board allowed a variation to provide for the conduct of a riding stable in the Blue Hills section of the town. An effort to vary the Zoning By-Law so as to permit the erection of a two-family house on a vacant lot, which did not come within the provisions of the Zoning By-Law, was denied. Considerable discussion and correspondence has taken place in connection with the construction of a greenhouse on Blue Hill Avenue in the residential district. Under the provisions of Chapter 12, Section 3, Paragraph (g), this type of business is permitted but not for retail purposes. It is the intention of the Board to see that this section is legally enforced until such time as it is changed by the citizens of the town. The Water and Engineering Departments sought permission to erect a ten-car garage for municipal purposes on land owned by the town in the vicinity of the Thacher Building. The Selectmen could see no good reason for varying the terms of the Zoning By-Law in this case and as a result denied the application.

Permits to install gasoline tanks have been granted during the year, one in the commercial zone and one in the residential district on application of a "non-conformer."

The Board has granted an additional license for motor bus transportation to the Eastern Massachusetts Street Railway Company, the details of which are considered under the heading of "Public Transportation" in this report. The usual applications for peddlars' licenses, junk collectors' licenses, victuallers' licenses, antique shop licenses, permission to purchase and carry revolvers, to parade on public highways, to move buildings over the public highways, to conduct intelligence offices, and many other similar activities have demanded the Board's attention throughout the year.

Law

The town has not been involved in any particular legal actions during the past year. The Board has received whatever legal advice has been necessary on all questions from Town Counsel Lincoln Bryant, who has been retained on the same basis as in the past few years.

The long drawn-out litigation involved in the suit of the General Outdoor Advertising Company against the Department of Public Works of Massachusetts has not yet been concluded, although final arguments have been made by Counsel representing both sides before the Master who was assigned to hear this case. No doubt it will have an early hearing before the Supreme Judicial Court and it is anticipated that a final decision will be reached during 1930.

Felix Rackemann, having recovered sufficiently from injuries which he suffered in the latter part of 1926, has resumed his duties as Legislative Counsel and has been of assistance to the Board in matters pertaining to legislation.

Highways

Snow: With the exception of rather unusual conditions in the latter part of February and in the early part of December, there have been no particular difficulties in the removal of snow and ice during the year. The equipment now owned by the town for carrying on this work has required some small replacements and would certainly be materially assisted by the purchase of a heavy type of truck that could be used not only during the time of year when there is no snow and ice, but to great advantage during the winter months.

Maintenance: Under the superintendence of Mr. Maynard, the Board has made an effort to maintain the public highways throughout the town so as to provide a safe and comfortable means of travel so essential to the convenience and well-being, not only of our citizens, but of others who make use of our highways. We have spent more money than ever before in resurfacing certain highways that were beyond the stage where further patching and minor repairs could be of any real value. In this connection we call your attention to the work that has been done on Highland Street, Brook Road, between Brush Hill Road and Blue Hill Avenue, Lincoln Street, Brook Hill Road, and Squantum Street. These jobs can in no sense be described as permanent construction, but we feel that they will give a satisfactory return on the money invested in constructing them to their present condition. Other jobs of reconstruction along this line have been done on Canton Avenue, Randolph Avenue, Grafton Avenue, Huntington Road, and in a few other sections of the town.

Street oiling has been characterized by the use of a larger quantity of oil, in many cases of a heavier grade than ever used before, and in the use of more pea-stone to take the place of sand that has usually been applied for this work. Excellent illustrations of the result gained can be seen in the present surface on Walnut Street, Spafford Road, Clapp Street and Valley Road.

The Board had an oppropriation of $10,000.00 less than the previous year and with the same personnel, with the exception of two or three changes, and with the same equipment, with the exception that it was all a year older, wa sable to complete the year without the necessity of a transfer from the Reserve Fund. At the same time, the year was concluded with all bills paid and no material and supplies delivered in 1929 to be paid for in 1930. However, if an emergency had arisen during the past year this appropriation would not have been adequate and therefore we recommend an increase for 1930 of this account.

Permanent Construction: At the annual meeting in March the sum of $17,250.00 was appropriated for this item, and with the exception of a small balance, all of this amount was expended in rebuilding Thacher Street from Blue Hills Parkway to Breck Street. This work was done by Simpson Brothers, the same firm of contractors that did the job on Adams Street, East Milton, in 1928. Because of the successful results gained from the Adams Street job, a similar type of work was done on Thacher Street.

For the coming year the Board has recommended a much larger sum of money for permanent construction, emphasizing the necessity of doing this work on Canton Avenue from the Parkway to Atherton Street and on Eliot Street and Central Avenue from Morton Road to Brook Road. This second stretch of highway is made necessary by the abandonment of the street car line, formerly operated by the Eastern Massachusetts Street Railway Company in conjunction with its East Milton to Milton Lower Mills Route. During the past year the work on Canton Avenue has been anticipated by reason of the construction of an underground storm water drainage system which leaves simply the matter of reconstructing the street in order to provide us with a first class highway over this important route.

Randolph Avenue: As a result of the excessive cost of reconstructing Randolph Avenue from the Quincy line to Highland Street as estimated a year ago, making the town's share something over $90,000 00, the Town Meeting, on recommendation of the Selectmen, voted to take no action during the past year. However, early in the year the Board, realizing the importance of planning for this work, requested Jesse B. Baxter, a former member of the State Department of Public Works, to act as special representative of the Board in working out a new plan for the construction of this highway. As a result of the work that has been done during the year, the Board has received a communication from the Department of Public Works informing it that if the Town of Milton will appropriate $35,000.00 the State will build this highway in 1930. The County Commissioners for Norfolk County have also agreed to contribute an amount not exceeding $30,000.00 towards the cost of this construction. Together with this good news the Board has been informed that the Eastern Massachusetts Street Railway Company is planning to abandon its Brockton to Mattapan car line and to substitute a bus line, thus eliminating the additional expense which would have to be borne by the town for relocating the tracks of this company along the route proposed for reconstruction. In other words, what looked like a job that would cost the town over $90,000.00 in March of 1929, has now been reduced to a cost to voted unanimously to recommend an appropriation for this amount as Milton's contribution to this very necessary highway reconstruction program.

Other Road Work: During the past year the Boston Consolidated Gas Company has been engaged in rather extensive operations throughout the town in connection with the strengthening and extension of its underground service. One of the most important jobs in this connection was the laying of an 18 inch pipe on Squantum Street from the Quincy line to Granite Avenue. As a result of negotiations with this company, the Board

received an allowance from the company of $3,000.00 to repair the damage done to that particular highway as a result of the laying of this new main. With this amount and with nothing additional expended by the town, our Highway Department succeeded in resurfacing the entire length of Squantum Street from Granite Avenue to the Quincy line with the exception of a few hundred feet bordering the Wollaston Golf Club property.

Sidewalks

With the $8,000.00 appropriated for permanent sidewalks, we have laid granolithic walks on the east side of Granite Avenue from Adams Street to Squantum Street and on the north side of Canton Avenue from Thacher Street to Elm Street. For many years the permanent sidewalk originally laid on Eliot Street has been broken up and, in spite of attempts to repair it, has been particularly dangerous for pedestrians. This year the Board relaid this sidewalk for the entire length of Eliot Street from Blue Hills Parkway to Central Avenue at a cost of $4,000.00 none of which could be assessed back to the abutters in view of the fact that this constituted the reconstruction of an existing permanent sidewalk. All of the sidewalk work during the year described in this report has been done by contract after the receipt of competitive bids presented by a number of reputable contractors engaged in this type of work.

The one big sidewalk job anticipated and recommended by the Board for 1930 is the construction of a granolithic walk on the west side of Thacher Street from Blue Hills Parkway to Lincoln Street. The present sidewalk facilities on this highway are not only inadequate but entirely unsatisfactory. The invitation to the pedestrian to walk on the present smooth surface of the travel way creates a danger that can only be eliminated by the construction of such a sidewalk as is proposed in this recommendation. We also are impressed with the gradual increase in population that is taking place in the south section of the town along Hillside Street and have included in our recommendations for 1930 an appropriation for the construction of a gravel sidewalk on one side of Hillside Street from Randolph Avenue to Harland Street.

Drainage

The amount appropriated for storm water and surface drainage as part of the program which must necessarily be spread over a period of years has produced most beneficial results. The one big single item has been the laying of underground drainage on Canton Avenue between the Parkway and Atherton Street. Other work has been done in the Thacher Street district and particular attention was paid to the problem on Eliot Circle where a new line has been laid eliminating what has for many years been a very bad condition.

Without proper drainage facilities it is impossible to maintain existing highways or to plan on the construction or reconstruction of other public ways. One of the fundamentals in road construction is proper drainage. The town has made serious mistakes in the past for not recognizing the importance of this fact. We are, therefore, recommending an extensive drainage program for 1930 the details of which are outlined in the reports submitted by Mr. Maynard.

Street Widenings and Corners

No extensive street widening program was before us during the year but we have completed the work started in 1928 in connection with the relocation and widening of the corner at Randolph Avenue and Adams Street. We have also carried out the desires of the town as voted at

the annual meeting in relocating and widening the corners at Elm Street and Canton Avenue and at Blue Hill Avenue and Brush Hill Road in the Blue Hill section of the town.

For 1930 we recommend the widening of Edge Hill Road between Adams Street and Boulevard Street and the relocation and widening of corners at Adams Street and Edge Hill Road, at Adams Street and Hollis Street, at Adams Street and Brook Road, and at Thacher Street and Warren Avenue.

Due to the generosity and co-operation of the Turner estate and of William J. Creedon, the Board was able to effect a marked improvement at the corner of Thacher Street and Lincoln Street during the past year.

Bridges and Guard-Rails

Due to the condition of the Granite Avenue Bridge it was necessary for the town during the past year to participate in an extraordinary expense involving the repair of that bridge. This work was done under supervision of the Division of Bridges of the Department of Public Works of the City of Boston and has been highly commended by those who are familiar with the former condition of this bridge. Our own Highway Department has been engaged in the necessary repairs and reconstruction of bridges and guard-rails on Thacher Street, Pleasant Street and on Adams Street.

Betterment Construction

During the past year, as a result of votes at the annual Town Meeting, seven ways, formerly private ways, have been constructed under the Betterment Act as town ways. The three most expensive of these jobs have been done by private contract involving the largest amount of money ever expended by the town for this purpose under private contract. The remaining four ways have been constructed by our Highway Department. This work was all completed early in November and the bills as assessed against the abutters were delivered before the close of the year. The Board is more strongly convinced than ever that in spite of the apparent unimportance of many of these streets from the point of view of heavy traffic that it is essential that they be constructed of stone material rather than of gravel. The maintenance of a gravel road begins the day that its construction is completed. Although the initial expense involved in the construction of a gravel way may be less than that involved in the construction of a stone road, we consider it poor economy to build any more gravel roads because of the cost involved in their maintenance.

For 1930 the Board has voted to lay out and has recommended appropriations amounting to over $98,000.00 for the construction of 15 new private ways as town ways under the Betterment Act. Although this is an unusual amount of money we feel that it will not be duplicated in any one year in the near future and that if the town will accept our recommendation that it will do much to satisfy the urgent demand of our citizens who live on these private ways. It is well to bear in mind that under the present policy adopted by the Board only one-third of the total cost is actually paid for by the town. If our citizens are willing to contribute two-thirds of the cost of building these new streets we are unable to see any good reason why the town should not cooperate with them thereby receiving an improvement that is not only a benefit to the particular citizens living on the new streets but is of a general benefit to the town as a whole.

Street Lighting

With the usual appropriation of $1000.00 for additional street lights, the Board has had installed on Granite Avenue from Adams Street to Squantum Street nine of the new lights commonly known as the Arc lamp type.

This area was never properly lighted and with the additional width of the street and its continued importance as a main artery it was necessary to replace the old street lighting system with the modern one. In addition to this, new street lights have been placed in various parts of the town, adding to the convenience and safety of our citizens. For 1930 we are requesting another appropriation of $1,000.00 for this item and have in mind particularly the improvement of the street lighting in the neighborhood of the Town Hall and Thacher Building.

Milton has been particularly fortunate in its choice of a World War Memorial. Visitors to the town comment most enthusiastically on the beautifully artistic and symbolic monument that was dedicated some years ago on the Town Hall lot. Believing that the beauty of this Memorial can be more greatly enhanced during the hours when there is no daylight, we are recommending that the town appropriate the sum of $600.00 to improve the lighting facilities of this Memorial. This recommendation is based on a study which has been furnished to us by engineers of the Edison Company and we believe that the results gained from this improvement will be a particular satisfaction to the citizens of the town.

Traffic Signals

For the first time in its history the town has been equipped with a uniform system of automatic traffic signals. This has been made necessary not only on account of the increased traffic hazard but because of the program now carried on under the supervision of the Department of Public Works of the State. At eight intersections throughout the town, under the supervision of our Highway Department, traffic lights have been installed both on the pre-timed and manual system. At the intersections of Granite Avenue and Squantum Street and of Blue Hill Avenue, Dollar Lane, and Milton Street electro-matic traffic signals have been installed. We have introduced a self-directing traffic control that has more or less revolutionized the whole question of traffic signals. Milton was the first municipality in Massachusetts to install this type of traffic control. Since its installation in our town it has been installed in practically all of the neighboring communities as well as throughout the state. We have found it to work most satisfactorily and have been particularly pleased with the servicing and maintenance furnished by the company that owns the equipment which is rented to the town at a pre-determined monthly rental. During the latter part of the year another company has come forward with a new type of traffic control and has requested the privilege of installing it entirely at the company's expense at the intersection of Canton Avenue, Highland Street and Thacher Street. This we have permitted on the understanding that at the end of a six month's trial period we can either buy the equipment outright or order it removed from our highways. It will be necessary for us to install some sort of traffic control at this particular intersection during the coming year, so we believe it advisable to try out this new system under the basis outlined above.

Although the existing traffic signals have only been in operation for a few months, we have noted a marked decrease in the number of accidents at many of the intersections where they have been installed. We will be in a better position to ascertain their real value when they have been in operation for a longer time. Blue Hill Avenue continues to furnish us with the largest number of accidents of any highway in the town. Just what the final solution will be in an attempt to reduce the accidents on this way to a minimum we are not yet ready to say, but we are sure that the installation of the two traffic signals now in operation at the intersection of Brook Road and Blue Hill Avenue and at Milton Street, Dollar Lane, and Blue Hill Avenue have done much to increase safe travel. It has been particularly gratifying to receive a communi-

cation from Maxwell Halsey, the official of the State Department of Public Works in charge of traffic signals, to the effect that Milton's traffic signal system "is a 100% perfect." We have amended the traffic rules and regulations so as to provide for penalties against the operators of motor vehicles who fail to observe these new signals. We are also recommending that the town take necessary steps to make Blue Hill Avenue and Granite Avenue from the Boston line to Adams Street "through ways" as provided for in recent legislation. In addition to this important traffic signal work, we have located warning signs and signals in other parts of the town based on the reports of accidents and recommendations of our citizens.

Change of Street Names

The confusion caused by similarity in street names has been apparent for some time and complaints have been received not only from our citizens but particularly from the postal authorities. As a result the Board made a study of this matter during the past year and following public hearings changed the names of many of the existing private ways, details of which changes may be found in the report of our Town Engineer.

Board of Survey

The development of large tracts of land in the town during the past year has not been as extensive as in previous years. As a result the Selectmen, sitting as the Board of Survey, have been called upon to approve layouts of new streets in only a few cases. The one large development has been in connection with what is commonly known as the Bass Farm on Squantum Street. This area of twelve or more acres is now in the process of development and the four new streets necessary for this development were carefully studied by the Board before its approval of their layout. Because this has been a rather uneventful year in this respect is no reason to believe that the coming year and successive years will be the same. All thoughtful citizens must realize that the great area of undeveloped land in the town is bound to be opened for real estate development with a very short time. How to make this development progress along lines that will best correspond with the general improvement of the town is a most serious problem and calls for particular consideration on the part of the officials responsible. We have read with considerable interest the report of the committee which has been studying the regulation of future real estate developments during the past two years and commend to our citizens a sincere and thoughtful consideration of the recommendations contained in the report of this committee.

Public Transportation

During the past year three distinct changes have taken place in connection with public transportation in the town. The first one is the successful conclusion of the efforts made to secure through transportation by means of motor buses from East Milton to the Ashmont Terminal of the Rapid Transit Line. The obsolete system that prevailed along this line up to the Fall of this year was most unsatisfactory and in no way gave our citizens any of the benefits that we expected on account of the extension of the subway system to Ashmont. As a result of special legislation, which was supported unanimously by the Selectmen and in no uncertain terms by our citizens, the Eastern Massachusetts Street Railway Company early in October put into effect a through system of transportation that has been a boon to all of our citizens who use this means of transportation. We would be ungrateful indeed if we did not

at this time express our appreciation to the officers of the East Milton Improvement Association for their efforts in cooperating with us in producing this result.

Early in the year the Eastern Massachusetts Street Railway Company informed us of its intention to abandon the street car line which it has operated for many years over the route from East Milton to Milton Lower Mills and to substitute in its place a bus line along this same route. Following a public hearing the Board granted permission to this company to operate buses and as a result another bus line has been added to this type of existing transportation facilities.

Near the end of the year the town witnessed a most unusual development of the Metropolitan Transportation System when the rapid transit line from the Ashmont Terminal to Mattapan Square, over the old Shawmut Branch road-bed, was put into operation. This improvement completes the extension of the Cambridge to Dorchester tunnel system and as a result many of our citizens are provided with a system of transportation that is equalled by very few communities surrounding Boston. Of course with these changes in transportation there will at first be many difficulties and unpleasant readjustments, but we believe that all of these improvements will eventually be recognized as most beneficial for the town as a whole. The Selectmen are constantly in touch with the diverse problems arising out of these improvements and will do everything possible to eliminate whatever difficulties that do now exist.

Town Engineer

This department has established itself more firmly than ever during the past year and has been of particular value and assistance to all departments of the town. In reviewing the work of the department as outlined in the report of Town Engineer Maynard, it is almost impossible to understand how the town could ever have gone along satisfactorily without any Engineering Department. We commend to our citizens the details of this department as contained in the report of Mr. Maynard.

Police Department

Officer Francis T. Hanna died suddenly in September and as a result both the department and the town lost a most valuable public servant. The vacancy caused by his death has not yet been filled since we have not received from the Civil Service Commission a list of eligible candidates.

The traffic signal system which has been installed has been turned over to the Police Department to be operated under its control.

As a result of an investigation conducted by the Board, conclusive evidence has been revealed of the deplorable condition of our Police Signal System. Due to the age and obsolete condition of this system, we have learned that seldom a day passes when there is not some breakdown, thereby depriving this department of an accurate and speedy means of necessary communication. We have had a complete study made by the Gamewell Company, and as a result do recommend a special appropriation of $37,900.00 for the purpose of restoring this system to a standard of real usefulness.

The affairs of the police of the department have been conducted in a very satisfactory manner during the past year. We recommend that in the coming year a new ambulance be added to the equipment and that an appropriation be made to provide for the installation of a teletype. This teletype is part of the modern police equipment already installed in most of the surrounding communities and will do much to increase the efficiency of our local department. The increased appropriation provided for by the town in respect to ammunition is now producing the results anticipated by the Board when a recommendation for such an appro-

priation was originally made. We believe in this now even more than we did heretofore and trust that an increased amount will be provided to furnish the members of the department with ammunition necessary for continued intensive practice.

In spite of the increased amount of crime reports which are constantly before us in the daily papers, Milton has been particularly free from any serious crimes during the past year. It is natural for us to believe that this condition has been due largely to the efficiency of our department and the sincere purpose on the part of its members to provide the town with real protection.

Fire Department

Now that the Fire Department is more or less under the control of the Selectmen, we have acquainted ourselves more than ever with the details of this department. Chief J. Harry Holmes and the members of this department have given us excellent service during the year. The rules and regulations of the department have been completely revised so as to bring them up to date in view of the fact that the town voted to eliminate the Board of Fire Engineers. We recommend that an appropriation be made to purchase a new piece of apparatus to replace a worn-out automobile which is used in responding to telephone calls for small fires. With the increase in population in the town we believe it advisable to call attention to the necessity of doing something toward eliminating the large number of dump fires that constantly require the attention of this department. Some method should be devised to force the owners of private property, which is used for public dumping, so to control their property that the fires so ofen occurring thereon will not be a public menace and cause for public inconvenience.

Thacher Building and Town Hall

Nothing of particular importance has occurred in connection with the affairs of these two departments during the past year which have been so ably taken care of by Superintendent James Sangster. A modern wire fence has been constructed at the expense of the town on the property line between the Thacher Building lot and land owned by the Tildon Estate. Serious consideration must be given to necessary repairs in the Town Hall and we recommend that an additional appropriation be made to provide for these repairs.

Insurance

Under the direction of Frank R. Forde, who was appointed Insurance Adviser, all matters pertaining to town insurance have received expert attention.

Miscellaneous

Voting Precincts: In view of the apparent congestion at the polls in precincts II and IV, the Board has considered the advisability of revising the voting precinct lines and establishing two new precincts, making a total of six in place of the four existing precincts. A public hearing was held on this matter and since no great public interest was displayed by the citizens, we have felt that it would be advisable to postpone any action in this matter at least for another year.

Fourth of July: The Board appointed Demeron L. Deane, Ralph Freethy and Charles E. Cross as a citizens' committee to conduct the Fourth of July celebration. These citizens performed their task in a very satisfactory manner considering the small amount of money available and

presented to the town a program along the lines of previous years. We do not believe that $500.00 is a sufficient amount for the proper observance of this important holiday and recommend that unless the town is willing to increase the appropriation to the sum of $1000.00 that no money be appropriated for this purpose.

Armistice Day: For the past two years the Board has seen fit to spend $100.00 each year out of its own account for the observance of Armistice Day under the direction of the local Post of the American Legion. We believe that there should be an official appropriation by the town for this purpose and recommend the sum of $200.00. No holiday means more to those of us who are now living than Armistice Day. Now that it is a legal holiday, established by State Legislation, and since its meaning is such a definite one to all of our citizens, we feel that its observance should receive official recognition by the town.

Tercentenary Celebration: The year 1930 marks the 300th anniversary of the founding of Massachusetts Bay Colony. Milton, together with all other municipalities in the State, is planning for some official observance of this historical event. By way of preparing for our participation in the general program, we requested the Milton Historical Society to make a study of this matter and as a result of the cooperation given us by this society, we appointed Arthur H. Tucker, Chairman of the Milton Tercentenary Committee. Mr. Tucker and the members of his committee have prepared definite recommendations for action on the part of the town and we join with him and his committee in recommending that their suggestions be unanimously adopted.

In surveying the affairs of the Board of Selectmen during the past year, we are particularly impressed with the harmony that has existed on the Board in connection with the conduct of the various problems occupying the attention of the Selectmen. With the exception of two matters, there has been a unanimity that is most unusual and that should be called to the attention of our citizens. We are bound to recognize that this result is due largely to the cooperation and assistance that we have received from other town officials and employees. After all, no problem involving the conduct of our local municipal affairs should arise, except on rare occasions, that cannot be settled in a harmonious and satisfactory fashion. May we, therefore, at this time, express to our fellow officials and those who have worked with us, our sincere appreciation for their generous and helpful assistance and co-operation.

Because of the many inquiries that are directed to the Selectmen on matters over which they have absolutely no control, may we again call to the attention of our citizens the very important fact that under our present system of municipal government here in Milton the Board of Selectmen is only one of many boards, all of which are independently elected by the citizens to perform duties specifically outlined in the General Laws of the Commonwealth and in the By-Laws of the town. Town government as we enjoy it here is free from centralization. It is often difficult for those of our citizens who have been accustomed to live under a city form of government to realize this difference in municipal affairs. We believe that in spite of the increasing growth of our town and the additional problems that confront us that the present form of government is the best known form available.

KENNETH D. JOHNSON,
JOSIAH BABCOCK.
NORTON WIGGLESWORTH
Selectmen of Milton.

REPORT OF TOWN ENGINEER

Milton, Mass., Dec. 31, 1929.

To the Honorable Board of Selectmen:

The annual report of the Engineering Department for the year ending December 31, 1929, is respectfully submitted.

The engineering force consisted of the Town Engineer, two field parties and a draughtsman until March, when a third survey party was added. An increase in our appropriation was granted for this party in order to hurry the work on the town survey and to supply the Assessors with plans. Two field parties have been at work the greater part of the year on the town survey and the third party has supplied lines, grades and survey plans for bettermen streets.

Town Survey

The new survey party, consisting of an engineer and two helpers, started in the area known as the Columbine section and worked towards East Milton. This work required the running out and locating of all street lines, taking in all the existing road bounds, lot lines and buildings. The data for this work was taken from town records and from records at the Registry of Deeds in Dedham.

Because of the extremely dry weather during the summer, this work has progressed very satisfactorily. The area bounded by the Neponset River, Unquity Brook, Brook Road and Ridge Road has been completed. The original survey party employed on this work has finished the East Milton section, thus completing all the area bounding on the Boston-Milton line. While engaged on this work, this party ran out that part of the line between Milton and Quincy, starting at the established corner designated at M. Q. 5, located on what is known as Corliss Ledge, and running through to a corner located in Beal Street designated as M. Q. 4, a distance of 9723 feet. The boundary stone at M. Q. 4 has been removed. To reproduce this corner, data was obtained from the Engineer's Office of the Harbor and Land Commission at the State House and then checked by our coordination. This has changed that portion of the town line between M. Q. 4 and M. Q. 5. At the present time the old witness markers and road stones are used as the town line and one of these stones has proved to be 34.70 feet at right angles to the true line. The new plan will make quite a difference with the assessing of areas along this boundary line.

We have definitely located that part of the Milton-Quincy boundary from Beal Street to the Neponset River. Many permanent points have been established along these lines so that no difficulty will be met in reproducing any part of this boundary line in the future. Bounds have been set on each side of the streets intersecting said boundary lines. This work has required great care and accuracy.

This field work has been recently completed and is now being plotted on our big section maps.

Bettermen Streets

The streets constructed under the Bettermen Act this year are as follows:

Name	From	To	Length	Width
Antwerp Street	Squantum Street	Wood Street	1020	40
Bassett Street	Church Street	Granite Avenue	740	40
Breck Street	Thacher Street	Clapp Street	395	40
Laurel Road	Thacher Street	West Street	580	40
Plymouth Ave.	Edge Hil Road	Quincy Line	1455	75
Reservation Road	Brook Road	Edge Hill Road	800	40
Viola St.	Thacher Street	Brook Rd. Playground	276	40
			5266	

Plymouth Avenue, Reservation Road and Laurel Road were awarded to E. C. Sargent, the lowest bidder, by the Board of Selectmen. The other streets constructed under the Betterment Act were done by town labor.

Detailed plans and estimates have been prepared for the Board of Selectmen for the acceptance of the following streets:

Street	From	To	Length	Width	Sq. Yds.	Est. Cost
Avalon Rd.	Eliot St.	Lancaster Lane.	880	40	2426	$8215.29
Cedar Ter. St.	Squantum St.	Hope Ave.	900	40	2500	9509.75
Churchill St.	Blue Hill Ave.	Blue Hills Pkwy.	915	30	2070	6564.20
Elton Rd.	Fullers Lane	Private Land...	415	40	1150	3716.00
Garden St.	Edge Hill Rd.	Warner Rd. ...	910	40	2500	8929.00
Governors Rd.	Edge Hill Rd.	Warner Rd. ...	930	40	2580	9689.37
Governors Rd.	Brook Rd.	Edge Hill Rd. ..	783	40	2100	7821.74
Hazel St.	Pleasant St.	Private land...	570	40	1560	5659.55
Howard St.	Washington St.	Private land...	297	30	670	1867.70
Lawrence Rd.	Pleasant St.	Elton Rd.	270	40	830	3353.85
Meredith Cir.	Reedsdale Rd.	Reedsdale Rd..	1362	46	4600	14080.57
Virginia St.	Hawthorn Rd.	Fairfax Rd. ...	293	40	820	2775.95
Verndale Rd.	Blue Hills Pkwy.	Lothrop Ave. ..	358	40	840	2424.60
Westbourne Rd.	Otis St.	Private land ..	284	40	780	2901.00
Wood St.	Granite Ave.	Private land ..	1160	40	3233	10597.58
		Totals	10327	—	28659	$98106.15

These new streets have required special study in regard to drainage. Satisfactory drainage involves the area adjoining and should be so constructed as to accommodate surrounding territory in future extensions. Only the drain laid within the betterment street should be charged to that street. Therefore, if these streets are accepted, it will be necessary to increase our regular drainage appropriation.

Drainage

Drainage studies have been made of the low land in the vicinity of Brook Road. The water shed of this area contains 895 acres. Included in this section is a part of Milton Hill, all the area east of Highland Street, all the area (400 feet more or less) south of Pleasant Street and Edge Hill Road and as far east as Otis Street. This area can be drained and ground water lowered several feet by digging an open trench beginning at the lower side of the culvert at Otis Street. Assuming a maximum rainfall of 1½ inches in an hour and 60 percent of this volume to be cared for, it would require a culvert opening of about 20 square feet.

From this point the trench should be continued on a gradient of .40 of 1 percent to a point opposite Brook Road in the Brook Pond, so-called, thence on the northerly side of Brook Road to a point at Churchills Lane. This grade line is established to protect the town against other public utilitity companies who might from time to time plan to lay pipes or duct lines underground, thus obstructing the future drainage of this area. This proposed drain would also relieve the flood conditions which now exist during the wet season. (Note: See enclosed map of this area.) The greater part of this could be an open trench, and I recommend that this work be done as necessity requires.

I have recommended the installation of a drain on the upper half of Adams Street from Barnard Avenue to Churchills Lane, a distance of 1868 linear feet, as a beginning of the drainage program of this street. The storm water now flows on the street surface to an outlet at Barnard Avenue and through an existing pipe line to a ditch at Brook Road. The storm water gathers in such volume on this street during a heavy storm that it scours out the gutters to a dangerous depth to vehicles and overflows to private land. The drainage of the lower end of this hill going north from Centre Street should be installed the following year. After this work is completed the street will require a new surface.

Following is a list of drainage installed during the year:

	Length. in feet	Size of inches	Number of Basins	Number of Manholes
	200	10		
Bassett Street	80	8	5	1
Breck Street	130	8	2	0
	240	10		
Brook Hill Road	20	8	2	0
	300	15		
Canton Avenue	960	12	0	5
Capen Street	24	8	2	1
Centre Street	63	8	0	0
Curtis Road	163	8	0	1
Eliot Circle	195	8	0	1
Granite Avenue	18	8	2	2
Highland Street	66	8	1	0
	582	10		
Laurel Road	72	8	6	1
Lincoln Street	40	8	2	0
Norway Road			1	0
	1034	10		
Plymouth Avenue	245	8	8	5
Projecta Road	531	12	0	0
Reservation Road	687	8	6	2
Smith Road	88	8	1	0
	156	12		
	755	10		
Thacher Street	370	8	21	6
Walnut Street			1	
Warren Ave. at Playground	82	8	0	1
Totals	7101		60	26

Permanent Construction

Lines and grades were furnished for the drainage, curbing and the resurfacing of Thacher Street from Brook Road to Breck Street, a distance of 2900 feet. This work was done by contract, and awarded to Simpson Brothers Corporation of Boston by the Board of Selectmen.

This road surface is the same as that laid on Adams Street, East Milton, the previous year.

Lines and grades were furnished for all the work done on the construction and widening of the easterly side of Granite Avenue between Wood Street and Squantum Street.

Board of Survey

The Board of Survey accepted as private ways the following named streets:

..Name	From	To	Feet	Width
Augusta Rd.	Squantum St.	Pillon Road	352	40
Dexter Street	Prince St.	260 feet north	260	40
Guilford Rd.	Granite Ave.	Granite Avenue	1171	40
Hurlcroft Rd.	Squantum St.	Private land	917	50
McKinnon Ave.	Pleasant St.	Private land	412	40
Nash St.	St. Agatha Rd.	Private land	185	40–60
Pillion Rd.	Adams St.	Hurlcroft Road	970	40
Prince St.	Blue Hill Ave.	240 feet east	240	40
Stanton Rd.	Fairbanks Rd.	Magnolia Road	335	40
Taft Rd.	Hurlcroft Rd.	Pillon Road	322	40
Trout Brook Ave.	Robbins St.	Private land	325	50
			5489 feet	
			1039 miles	

These streets were checked as to lines and grades with special attention given to the problem of future drainage.

Street bounds have been set in all new streets and placed on old accepted streets where no accepted boundary point existed before. These points are of great benefit to the abuttor and simplify the work for other town departments and for public utility companies.

Permanent bounds set on the following streets:

Adams Street	1
Brackett Street	1
Ballou Street	2
Breck Street	2
Bassett Street	6
Brush Hill Road	1
Eaton Street	2
Fullers Lane	1
Granite Avenue	3
Laurel Road	2
Plymouth Avenue	6
Pine Tree Brook taking	7
Pilgrim Road	1
Reservation Road	3
Sheldon Street	2
Sunnyside Road	2
Thacher Street	1
Victory Avenue	2
TOTAL	45

Sidewalks

Following is a list of sidewalks built during the year:

Location	Length	Granolithic Sq. Ft. of 4 inch	Granolithic Sq. Ft. of 6 inch	Tar Concrete
Canton Ave., Thacher St. to Elm St.	675	3220	409	.....
Edge Hill Rd., opposite Garden St.	147	676	...	.....
Edge Hill Rd., near Plymouth Ave.	37	150	...	.....
Eliot St., Blue Hills Pkwy. to Central Ave.	5548	...	...	25740
Granite Ave., Adams St. to Squantum St.	1940	10738	1586	.....
Lincoln St., at Thacher St.	45	330	...	.....
Plymouth Ave., at Edge Hill Rd.	70	460	...	.....
Reservation Rd., at Edge Hill Rd.	66	428	...	.....
Waldeck Rd., at Edge Hill Rd.	88	548	...	.....
TOTALS	8616	16550	1995	25740

Total area of walks—44,285 square feet.

Eliot Street walk was maintenance work and was relaid with a sheet asphalt over the old tar concrete.

Curbing laid during 1929 is as follows:

Location	—Curbing— Circular	Straight	Granite blocks
Antwerp Street	134.	30.	....
Bassett Street	72.3	20.	....
Blue Hill Avenue	6.5	8.	....
Breck Street	88.	20.	....
Brush Hill Road	82.8	205.	....
Edge Hill Road	...	...	88.
Elm Street	134.	20.	60.4
Granite Avenue	190.8	50.	....
Kahler Avenue	56.5	24.	....
Laurel Road	139.2	52.	....
Lincoln Street	82.	26.	....
Plymouth Avenue	88.4	20.	370.6
Reservation Road	91.5	20.	....
Viola Street	25.0	20.	....
Total linear feet	1191.	515.	519.

Change of Street Names

Because of a duplication of street names, which led to confusion and delay, the Board of Selectmen requested that these streets be listed and new names suggested.

The following is a list of these streets:

Curtis Road	changed to	Alden Road
Elm Street	changed to	Clay Street
Pleasant Terrace	changed to	Orchard Road
Randolph Terrace	changed to	Brewster Road
Rockwell Street	changed to	Dexter Street
Thacher Terrace	changed to	Chilton Park
Oak View Street	changed to	Essex Road
Winthrop Road	changed to	Clark Road
Dyer Road	changed to	Audubon Road
Milton Avenue	changed to	Bradford Road
Columbia Street	changed to	Ferncroft Road
Pine Road	changed to	Standish Road
Pine Street	changed to	Conway Road

House Numbers

This office now has a complete set of house numbering plans and has issued 159 numbers to house owners during the year.

Permits

We have issued 226 street permits for all kinds of street occupancy.

Milton Cemetery

A survey was made of the entire area in the vicinity of the Soldiers' Lot, between Centre Street and the new locker building. A map was made showing all the old deeded lots. Of the remaining area, several hundred new lots were plotted and numbered.

Other work for this department consisted of staking out and giving grades for new roadways.

Police Department

A plan showing all police and fire alarm boxes has been made and supplied to the Police and Fire Departments.

Several plans of fatal accidents which have occurred on our streets have been made. The plan showing the location of all accidents reported by the police has been kept up to date.

Traffic Signals

The entire force was busy several days making a traffic count at the intersections where signals have been installed. This work was required by the Traffic Engineer of the Department of Public Works at the State House, Boston, to secure for the town a permit to install and operate stop and go signals. Since the installation of the signals, all underground cables which connect the lamps have been located and plotted on our record maps.

Details of the financial statement of this department will be found in the report of the Town Accountant.

I wish to express publicly my appreciation of the faithful services of the engineering force and to thank the Selectmen for their courtesy and cooperation.

Respectfully submitted,

FORREST J. MAYNARD,
Town Engineer.

REPORT OF ASSESSOR OF TAXES

December 31, 1929.

To the Citizens of the Town of Milton, Massachusetts:

The Assessors of Taxes herewith submit their report for the year 1929. At the annual election of Town Officers for the year 1929, Robert Bowie was elected for the three year term.

On March 7, 1929, the Board organized as follows: William W. Churchill, Chairman; George S. Murray, Secretary. On May 7th, Miss Dorothy L. Maxwell was appointed Clerk of the Board, to succeed Wallace C. Tucker, whose resignation the Board regretted receiving after his eighteen years in the Town's service. Miss Bertha M. Johnson was appointed Secretary to the Board.

The new Motor Vehicle excise law, which eliminates the old system of assessing registered automobiles as personal property, went into effect on January 1, 1929. The introduction of this law has increased the work of the Board to a very large extent, this increase being due, in part, to the additional number of bills to be sent out, but principally to the adjustments which are required to be made on cars traded or sold, and the resulting increased correspondence. Due to the extra billing necessitated by the Motor Vehicle excise law, the billing machine which was purchased last year has been in use for an even greater length of time than last year. It has proved entirely satisfactory, and much time and labor have been saved since its installation; without it, it is doubtful if this year's work could have been accomplished on time without the lengthy employment of at least two additional people. The approximate number of bills sent out during the year is as follows: Poll taxes, 4600; real and personal taxes, 4900; excise taxes, 5900.

In submitting a somewhat more lengthy report this year than has ordinarily been the custom, the Assessors feel that the citizens will be interested in a general discussion of the tax system now existing in Massachusetts, to the end that they may have a clearer idea of the place which local taxation occupies in the whole tax system, and a better understanding of the necessities of its administration. The rising cost of municipal activities, not only in Milton but throughout the Commonwealth, and, for that matter, throughout the Nation, makes the subject of Town expenditures and Town taxation one of serious concern to all residents of the Town. Local taxes, as assessed by this Board, effect every land owner and rent-payer in Milton, as also every person owning personal property on which he is assessed, and every person registering an automobile which is ordinarily garaged in Milton.

The Assessors seriously strive to distribute fairly the taxes which must be levied. They feel that their obligation to the tax-payers of the Town is to see that the tax is equitably distributed and that everyone pays his proper and just share, no more and no less than is his fair amount. Their every effort is to achieve this result. The Assessors have nothing to do with the appropriation of money except insofar as their interest as citizens carries them into discussions of the problems before the Town. Their sole official duty is to levy taxes to the extent necessary to provide the funds required to meet the obligations resulting from appropriations at the annual Town Meetings. This report will seek to give a general

explanation of the circumstances which surround the determination of our local taxes.

According to the 1925 census, Massachusetts had 4,144,205 inhabitants and these annually contributed in direct taxes to the support of the Government of the United States, of the Commonwealth of Massachusetts, of its 14 counties, of its 316 towns and 39 cities, and in addition, paid special taxes for the support of districts called fire, water, light, and improvement districts, which are established in certain communities and paid for by the residents of those communities benefited thereby. The largest is the Metropolitan District, which includes Boston and certain nearby cities and towns including Milton, and there are about 62 smaller districts in other parts of the State. The district tax is levied and collected in the same manner and at the same time as other local taxes, except that the Metropolitan District taxes are levied and collected by the Commonwealth. Other special taxes are assessed against and through the local governments in certain sections of the Commonwealth to cover deficits in the operation of street cars, elevated trains, and subways.

Taxes in Massachusetts may be divided roughly into two general classifications: those collected by the local municipalities and those collected by the State. Taxes assessed and collected locally in Milton constitute taxes upon real estate and tangible personal property, the motor vehicle excise tax, and the poll tax. Taxes collected by the Commonwealth of Massachusetts include the income tax, the corporation excise tax, the stock transfer tax, the legacy tax, the estate tax, and the gasoline tax. Of the receipts from these various taxes, the income tax revenue, and by far the greater part of the corporation excise revenue, are distributed to the cities and towns of the Commonwealth and are credited by the cities and towns against their local expenses. The income the Town receives from this distribution tends to materially reduce local taxes on real estate and personal estate. The larger portion of the cost of maintaining the Milton town government is for the support of the public schools, the highway department, the police, fire, water, and sewerage departments, and the smaller portion is for the maintenance of the large number of additional necessary town activities. During the past year Milton paid a county tax of $40,801.34. The larger portion of the cost of maintaining the government of the county is for the maintenance of the county courts, the building and maintenance of county court houses, registries of deeds and of probate, jails, county roads and bridges, and schools, and the smaller portion for various necessary county activities. During the past year the Town of Milton paid a State tax of $41,310.00. The larger portion of the cost of maintaining the State government is for the building and maintenance of institutions for the retention and care of those suffering from mental diseases, the feeble-minded, the indigent, the drug addicts, the felons and the misdemeanant, and sufferers from tuberculosis, the building and maintenance of roads and bridges, the development of harbors and public lands and their maintenance, the diffusion of education, the building and maintenance of normal and trade schools, the maintenance of a State militia and a State police force, the care and protection of industrial workers, the care and protection of the public health, the supervision of public service activities, the maintenance of the judiciary, and the expense of the General Court. The smaller portion is for many State-wide activities. That portion of the expense of maintaining the government of the Commonwealth of Massachusetts which is not met by taxes, levied by the State and kept entirely for its own use, is assessed upon the cities and towns on a basis of valuation, measured by their ability to pay, and falling as a direct tax upon local real estate and tangible personal property.

The cities and towns of the Commonwealth, for the purpose of meeting their regular expenses and obligations incurred by issuing loans for permanent improvement, use the revenue they obtain from minor sources, such as fees and fines, and polls, and the larger amounts of revenue they

receive from the Commonwealth for taxes collected from business corporations, incomes, and public service corporations; and for the major portion they levy an assessment through the elective or appointed Board of Assessors, as the case may be, usually three in number, upon all the real estate and tangible personal property, excluding merchandise owned by a foreign or domestic corporation, and taxing only the machinery of corporations used in the conduct of the business, as well as their real estate. An exception is that class of property expressly exempted by reason of its public, charitable, religious, or educational nature, and also (since 1929) the excise on registered motor vehicles. Forest lands are taxed by special provision of law to encourage forestation: vessels engaged in interstate or foreign carrying trade, or commercial fishing (provided certain tax returns are made), are taxed on a different basis from other tangible personal property. Taxes are levied in each year as of April 1st, except in the case of the recent motor vehicle excise tax, which is levied at such times and as frequently as the Assessors find desirable.

When the time to determine the tax rate arrives, the Assessors, having been notified by the proper town officials, of the amount of money appropriated at the annual Town Meeting, and of the provisions, if any, made for meeting any portion of such appropriations, by adding the State and County Tax, and any other sum required by law to be raised by taxation, determine the total amount which must be provided for; and by deducting from this amount the amount certified to them by the Commissioner of Corporations and Taxation as the estimated receipts which the Town will receive from the corporation excise and income tax revenue, and by also deducting the amount to be raised by the tax on polls and by the motor vehicle excise, and by deducting estimated receipts such as fines, fees, and various departmental receipts, such as those from the water department, various trust funds, and so forth, determine the amount which must be raised by the direct Town tax on real estate and tangible personal property. They then determine the tax rate per $1000 of valuation by dividing the amount thus to be raised by the total Town valuation, both real and personal, as shown below:

1929 Expenditures

State Tax	$41,310.00	
County Tax	40,801.34	
State Highway Tax	2,985.69	
Fire Prevention Tax	235.76	
Metropolitan Parks Tax	20,417.54	
South Metropolitan Sewer Tax	21,489.76	
South Metropolitan Sewer Tax (additional)	154.00	
Charles River Basin Tax	3,680.36

When a taxpayer in the Town of Milton pays a bill from the Tax Collector for taxes due the Town of Milton, he pays a direct tax for Town, State, and County expenses, but inasmuch as the receipts from the State are much in excess of the actual State and County taxes, the tax bill received from the Town represents a direct tax for purely local expenditures. Individuals also pay a tax to the State based upon taxable income, which tax, after deducting the expenses of collection, is distributed by the Commonwealth to the cities and towns for their general uses, to reduce the tax on real estate and tangible personal property, and is used as one of the Town's receipts, as already explained. For the year 1929, for instance, the Town of Milton paid a State tax of $41,310.00, and a County tax of $40,801.34, and used as estimated receipts from the State, as the Town's share in the income tax and corporation excise tax, $113,390.26, a net gain above the State and County taxes of $31,278.92, which was used in reducing the amount to be raised on real estate and tangible personal property.

The rate at which the various taxes collected by the State is imposed is fixed by statute. The amount received by the State, therefore, varies to the extent that corporations' income for the preceding year varies, to the extent that individual incomes vary, in the amount that property held by corporations varies, to the extent that the number of transactions covered by the stock transfer tax varies, and so on and so forth. Inasmuch as the income received by the State from its various taxes varies, to a similar extent the income received by the Town from the State also varies. To all intents, therefore, the local tax on real estate and tangible personal property provides the only elastic and changeable feature of our tax system. That is to say, whatever revenue of State, county, city and town is not provided by the taxes other than the real estate and personal property tax must come from these two sources.

Therefore, when all that is receivable from all other sources has been computed, the balance that has been appropriated by the town, whatever that amount may be, must be raised by a tax on real estate and personal estate. For the most part, the increase in municipal expenditures has been so rapid that the growth in receipts from other taxes has not proved adequate to meet the increase. The result, therefore, is that the burden upon real estate and tangible personal property increases as expenditures increase.

In 1917 real estate bore 60 per cent of the burden of direct taxation, incomes bore 10.16 per cent, and the business corporations, through the excise, 5.91 per cent. In 1928 real estate paid 65 per cent of the direct taxes; the taxes on incomes produced 8.73 per cent (in a year marked for a large return from the income tax), and the business corporation excise produced only 5 per cent of the total revenue from direct taxation. The total receipts of direct taxation increased from $123,400,156 in 1917 to $272,365,842 in 1928, over 120 per cent. These figures merely bear out the general impression that real estate bears a tremendous proportion of the total tax burden. Although efforts are being constantly made, year after year, to devise ways and means for relieving the tax burden placed upon real estate, and to distribute it over other classes of property, on the very face of the figures just shown, it seems extremely improbable, even with the most heroic efforts that might be made by the Legislature, that the tax on real estate will be substantially reduced.

The Assessors' duty to the community becomes obvious, then, when it is realized that real estate must be responsible for paying such a large proportion of the money that must be raised to pay for municipal activities. Every effort and care should be exerted to see that the tax is properly, fairly, and equitably distributed over all those who are liable for the real estate tax; and the Assessors, of course, in addition to the real estate tax are similarly concerned with the personal property tax.

The administration of the local tax problem in the various cities and towns of the Commonwealth, is a very different matter from the administration of State taxes. The State taxes are levied and collected by the Commissioner of Corporations and Taxation, and the whole procedure is subject to a uniform administration. Each town is a sub-division of the Commonwealth, and no matter how small a local taxing unit it, each such unit must have its full quota of Assessors, Collectors of Taxes, and equipment for the assessment and collection of the taxes. Of course, in the smaller town, the equipment is comparatively primitive, and proceedings comparatively informal. It is unfortunate that it can be truly said that in the great majority of communities real estate assessments are haphazard and inaccurate. It seems particularly unfortunate that this should be true with respect to that part of the total annual revenue produced which provides over 60 per cent of all the taxes assessed for municipal expenditures. The real fundamental of taxation on real estate and taxable tangible personal property in Massachusetts is that the property shall be assessed for its "full and fair cash value." (General Laws: Chapter 59, Section 38.) The casual, traditional methods commonly employed do not permit assessed valuations to follow changes in value either promptly or accurately. Tangible personal property for all practical purposes is valued at a very nominal figure in most communities. Why do these conditions exist? It is not because of any intentional neglect or any inability on the part of the Assessors, but rather because of the failure on the part of the various municipalities to provide means for the use of modern methods of valuation, and to bring to the assistance of the assessors such simple mechanical aids as are ordinarily used in every-day business practice, such as a careful recording of the pertinent and necessary facts concerning various properties on which taxes are based. The administration of the assessors' office in any particular city or town is, of course, a matter of evolution that has taken place over the years since the establishment of the town, and the methods in use, for the most part, have just simply grown.

There seems to be a pronounced reluctance which denies to this all important field of municipal activity the least of modern devices, while at the same time other activities revel in the ultra modern, and even approach a close acquaintance with the futuristic. Is it the fear of facing the facts and possible revelation that the valuation foundation will not wisely support the expenditure structure; or is it selfish contentment in the tax one now pays, and the reluctance to risk any investigation, however praiseworthy, because, perhaps, it might mean a higher individual tax? Is a policy of laissez faire defensible when facts point out the necessity of a thorough study of the very foundation of our present tax system? We think not.

Milton has been particularly fortunate during the past number of years to have had a continuity of administration in the Assessors' office by reason of the fact that there has been little change in the personnel of the Board of Assessors from year to year. This has tended toward a uniform administration of the affairs of the Board. With the rapid changes in the development of real estate which has taken place and is taking place in Milton, the difficulties of properly valuing real estate have grown from year to year, and the point has now been reached where the effective administration of the office is seriously hampered by the lack of proper records. When the town had merely a few hundred buildings, and the Assessors could practically visualize in their own minds each and every parcel and building, a record of the assessed valuation, as determined by some previous board, was quite sufficient for the purposes of the office. With the growth of the town to the point where Milton now has some four-thousand-odd dwellings, the complexity of the problem has increased greatly. It is impossible for the assessors to carry in their minds the details of each particular piece of property. At present, the only record which is maintained in the office are figures on a card which say that so-and-so's land and buildings are assessed at such-and-such a figure. The figure for buildings, except for such particular adjustments as may have been subsequently made, are valuations placed on the buildings the first year they were assessed.

An example of the inadequacy of the present records and their failure to portray the facts was disclosed by a careful study of the taxable property of the public utilities and business zone real estate in the Town of Milton, as undertaken by the Board in 1928. The New England Telephone & Telegraph Company is a very substantial taxpayer; its personal property valuation for purposes of local taxation is provided for us by the Commissioner of Corporations and Taxation, and was $528,400 in 1927. The personal property valuations of the Edison Electric illuminating Company of Boston and the Boston Consolidated Gas Company are determined locally. The records in the office for 1927 merely showed assessed values at $250.000 and $210,000, respectively. A study of the properties and an establishment of the facts enabled us to increase the valuations to $550,000 and $560,000, without objection of the companies. The increase in revenue that year and each year since, and which will continue for the years to come, was approximately $18,000. A profitable survey! During the same year a survey was made of the real estate throughout the Town which had been set apart under the Zoning Laws as business locations. The result was an increase in valuation of about $150,000, again practically without objection, and with an annual increase in revenue of about $4000. In all an annual increase in revenue in that and future years in excess of $20,000.

This example is given not merely to show what was accomplished in increased revenue, for that will not always follow, but to show the loss which has resulted from inadequate methods and improper records, and the benefits to be derived from an accurate recording and examination of the facts. From the standpoint of equitable taxation, all other taxpayers in the Town, including the New England Telephone & Telegraph Company, were suffering from the previous low valuations, because they,

in the general tax rate, had to contribute toward the deficiency resulting from those low valuations. Had the situation been reversed, and the utility and business zone valuations referred to been reduced, the unfair burden which the utilities and business property would have previously been carrying would have been equalized. From the Assessors' standpoint, and therefore from the standpoint of all the citizens of the Town, this latter result should be equally desirable. Equitable distribution of the tax levy knows no favorites!

As the expenses of the town increase, and the tax rate increases, the question more and more arises, to what extent have the Assessors, with the means which have been placed at their disposal by the Town, been enabled to properly establish valuations, so that everyone may pay his just share of the Town taxes, but, at the same time, pay no more and no less than his fair share. It has been the case in many communities that when the tax rate has risen to the range of $35 to $40 per thousand, a serious survey has been made of all the facts in the particular community and an effort made to modernize the methods under which taxes are assessed.

The Board of Assessors of the Town of Milton feel that the time has now come when a building survey and a comprehensive study of the whole town should be made to guarantee that the valuations used now and the valuations to be used in the future are fairly and properly established. The Assessors recommended such a general plan to the Town in 1929, but apparently a misunderstanding as to its intentions developed, so that the Town did not feel free to follow the Assessors' recommendations, the first year it was presented. The situation is no different this year, except that the Town is one year nearer to the time when such action must be taken. A municipality with a valuation in excess of thirty million dollars, and an income by taxation on real estate, personal property, motor vehicle excise, and polls in excess of one million dollars annually, cannot afford to be careless or haphazard in the methods it employs. It seems to the Board of Assessors that the citizens of the Town should not be content with anything except the very best methods available to determine the taxes of each and every individual. A variation of one thousand dollars, in the determination of the full and fair cash value, means that the particular individual who is over- or under-assessed, pays $25 to $35 more or less in taxes than he should, depending upon the tax rate for the particular year.

Some well-intentioned and otherwise usually well-opinioned people seem to think that the tax rate should be between $25 and $35 per thousand, and that the Assessors should so arrange valuations as to achieve that end. There are others who feel that a tax rate of $50 to $60 per thousand would be desirable for the results which a high tax rate brings. However desirable either of these results might be, the fact remains that the law says that valuations shall be placed at the "full and fair cash value." If this is properly done, the tax rate is clearly a simple mathematical problem of determining what the tax rate should be, based upon the full and fair cash value of all the taxable property in the Town, in order to raise the amount of money for the appropriations of the annual Town Meeting. Thus, as a practical matter, the Assessors should have no concern about what the tax rate is to be. Their full concern should be, what is the full and fair cash value of each and every particular parcel in the Town, so that every person is fairly treated, and an equitable distribution of the tax levy is made!

If the Assessors adopt this particular attitude, their duty becomes that of seeing that all citizens receive fair treatment, rather than seeing to it that some people are favored and others are oppressed. The "tax rate" is frequently made to be other than a truth-teller by the studied effort of some Assessors to determine deliberately the value of some properties in excess of the full and fair cash value, and determine the value of other properties below the full and fair cash value, and thus benefit one tax-

payer to the disadvantage of another. The citizens of Milton can at least rest easy in their own minds that the Board of Assessors of this Town is doing its best, with the facilities which the Town provides, to avoid such a condition.

The administration of the Assessors' office has been characterized by conservatism and by moderate expenditures in the administration of their duties. In addition to the three Assessors, there are employed by the Board two persons who are full-time employees of the office. The work of the past year has increased, due to the motor vehicle excise tax and the problems effecting its administration, so that the work of the department is of such volume that, in addition to these two people, it is necessary at times to hire additional assistance. The volume of the work has increased at such a rate that it will very soon be necessary to have at least one additional person. The physical facilities of the office are seriously deficient to the extent that the office space is wholly inadequate, and that the vault space and facilities for keeping records are equally improper. If the Town acts upon the suggestions of one of its Citizens' Committees and builds proper Town office facilities, this defect will of course be remedied in the near future. The most serious difficulty in the proper administration of the Assessors' duties comes from the lack of sufficient records concerning the characteristics of buildings in the Town. This difficulty can only be corrected by a building survey. It is hoped that the realization of this necessity will impress itself upon the minds of the Warrant Committee and Town Meeting members, so that they, in their wisdom, will see fit to take such steps as the Assessors recommended.

There are two ways of providing for a building survey. First, the Board of Assessors could be provided with an appropriation sufficient to hire extra personnel, working under their direction, to make an accurate survey of the buildings in the Town, and record the facts properly for future use; or, secondly, the Board of Assessors could be made up, instead of as at present by a part-time Board, of a Board which would be a full-time, full-pay Board. This would hardly seem necessary, however, in a town the size of the Town of Milton. If the necessary information, which could be readily obtained as the result of a building survey, were properly recorded and classified, the work of the office could be properly administered, with the regular organization, by a part-time Board of Assessors. It seems to us that the administration resulting from a part-time Board, be it this particular Board or any other Board that the Town may choose to elect, would result in a higher type of service than might be obtained by a full-time, ful-pay Board in which the incentive for office might be the salary it carried. Were the Board a full-time Board, its first duties and its first efforts should be directed in the direction of a careful re-examination of every parcel taxed in the Town.

There is no doubt, as a practical matter, that a popular prejudice exists toward making any changes, for fear that it may effect the particular pocket-books of the particular individuals. There are those who are satisfied with conditions as they exist, and who point out the fact that in the years past the administration of the office has been satisfactory, and that the Town should be content to drift as it has for years. Fortunately for the Town, however, the administration of the various departments of the Town of Milton is in the hands of individuals who are interested in the past to the extent that it provides lessons and experiences for the future. If the present situation is such that the sort of administration which has been "perfectly satisfactory" in the past is no longer suited to conditions as they exist at present and promise to be in the future, the Assessors would indeed be derelict in their duty if they did not point out to the Town the necessities of their office, and not only the desirability but the urgency of making certain administrative changes to guarantee the avoidance of disturbing conditions in the future. Such changes as are necessary are purely administrative, and merely require

a sufficiently large appropriation to accomplish them.

The Assessors are charged under their oath of office neither to over-value nor under-value any property subject to taxation. This they cannot keep, however, if they have not sufficient facts before them to intelligently determine valuations. If the Assessors knew what the result of a building survey in the Town would be, it would be entirely unnecessary to make such a survey. Of far greater interest and far greater necessity is the uniformly fair determination of values, rather than any desire to arrive at higher or lower valuations, for the sake of creating a higher or lower tax rate. The really important result to be achieved, in addition to the guarantee of as equitable tax distribution as is humanly possible, is the assurance that would result from a modern, accurate knowledge of the valuation of the Town. With such figures available, the citizens, the Town Meeting members, the Warrant Committee, and Town officials could all consider the matter of Town expenditures with the firm conviction that they were acting on facts, rather than a figure which has been the legacy of the accumulation of years. For it is Town expenditures in relation to actual capacity to pay, rather than tax rates, which determine the soundness of the Town's financial activities.

This general subject of a re-examination of valuations which have existed for many years, and a re-survey of buildings in a particular municipality, has been the subject of discussion and action in many cities and towns throughout the Commonwealth. Just recently the Town of Natick has entered upon a building survey such as that which this Board of Assessors suggested for the Town of Milton last year. One of the Assessors of Natick has recently had occasion to make a public statement concerning their experiences, and it might be interesting to set forth in this report some of the general considerations which confront them; not so much as an example in detail of what should be done in Milton or any other town, but as an example of what a particular town is doing to meet its particular problems.

The tax rate of the Town of Natick has been, for some time, substantially in excess of $40 per thousand, and it is this tax rate, coupled with other possible conditions, which finally forced the Town to engage in a building survey in order that it might intelligently appropriate money at its annual Town Meeting, and raise the money necessary for such appropriations by a fair and proper tax distribution. It is hoped that the Town of Milton will not wait until a tax rate of $35 to $40 per thousand is forced upon it, before it accepts the Assessors' recommendation and gives serious consideration to this problem. The tendency for rapid growth in the municipal expenditures makes the Assessors' duties more important every year, and places upon the Assessors of each municipality the obligation to make certain of their valuations. A study made for the purpose of examining and improving the conditions such as existed in Natick, and which now exist in Milton, requires one to recognize the many qualifications which surround the term "valuation." As Mr. Lucey of Natick has recently said, "Value of real estate admits of many qualifications. We have the terms of replacement value, sound value, depreciated book value, fair sale value, and assessed value. The tax accountant considers his book value cost less an arbitrary amount of depreciation. The insurance man considers replacement less an accrued physical depreciation. The real estate man thinks in terms of fair sale value, or whatever the traffic will bear; the banker, in terms of forced sale value, and we also have the buyer's value and the seller's value. We have the sentimental value, and above all we have the great majority of real estate holders, whose property is not for sale.

"The valuation of real estate for taxation purposes is en entirely different matter. The calling of the Assessor is a dual one. He has to place his value, and he must also determine the equal distribution of all his values, which is even more important, for, after all is said and done, a tax value, to a great extent, must be a matter of equalization.

"He is not to place a value on one parcel or several parcels of a pos-

sible different character, like the tax accountant, insurance adjuster, the realtor, or the investment banker or broker—his is the whole works, and he must dovetail his land and building values into the best possible final results as a complete taxable whole. This is a difficult problem of economics and must be met head-on and with determination by all Assessors, to a greater degree than ever before, in order to meet the exigencies that keep crowding upon us. If two-thirds of all the taxable property in Massachusetts is in real estate, and the burden of additional cost of government is being passed more and more on this class of property, the load is bound to create greater unrest, even discord, and every municipality will have to 'clean house.'

"Experience teaches us that we cannot expect relief from lower expenditures. We then will have to do the 'house-cleaning' and organize our real estate values for the purpose of taxation."

It is rather interesting to read Mr. Lucey's words in December, 1929, for the first time, when the Milton Board of Assessors find that they so closely correspond with the ideas which they had and recommendations which they made to the annual Milton Town Meeting in March, 1929.

"The honesty and integrity of our Massachusetts Assessors are beyond question. They are among the most important public officials in the State. . . . They try to accomplish the impossible and do not take the public into their confidence and say to them, 'We are but three men with but a small clerical force at our command. The exacting daily duties of our office take up so much of our time we cannot have personal contact with every parcel of real estate every year. We must have a true value of the whole as of April 1st, in one year, or we have no modern value, and we have not an equalization, which is the crying need in our communities, and which will do more than anything else to free the tax-payer from the dissatisfaction which possesses him.' The experience in our Massachusetts cities, and I believe it would apply also in our larger towns, is that it takes from five to seven years to carefully assess the territory. What a change, then, is continually taking place in each sector every fifth or seventh year. It is but a staggered valuation, and the general result is indefensible. It is difficult under these circumstances to have a true value and impossible to have an equitable one.

"Take the books of the Assessor in Massachusetts today. How have the new buildings been reconciled with the old—for example, take an average, good, six-room house. In 1910 this could be produced at $500 per room. In 1928 this cost $1000 per room. Today's cost is approximately $900 per room (December, 1929).

"It has been impossible in our (the Assessors of Massachusetts) work on values, of course, to follow the values of the dollar, which was par in 1900, 85c in 1913, 45c in 1918, and 60c in 1929, taking the year of 1900 as a basis.

"How many cities and towns in Massachusetts have reconciled this six-room $3000 house of 1910 with the same house of 1928 at $6000? What applies to this house in like manner applies to all buildings. We are about satisfied that there is to be no change in price in the present conditions as to building materials and a tendency to slight labor increases. The time is now ripe for the modernization of the assessing of real estate, and a solution presents itself—a practical, scientific overhauling and re-valuation of all land and buildings, based on a certain standard of value at the same time. The standard being static, it can become flexible as a whole, or in each section, or in each block, and you have solved your most perplexing problem, that of equalization.

"By this flexibility I mean that you establish a base value throughout, then if a block or a section fades or brightens, a percentage applied will produce the equilibrium. The base once established, it is only necessary to check as from a chart, and it can remain subject, at all times, to your regulation. . . .

"The first start should be made in land valuations. There are a number

of systems of land valuation embodying scientific rules and formulæ. Among these are the Hoffman, Somers, Cambridge, Buffalo, Cleveland, and many others of more or less prominence. All of these rules have their genesis in the principle that the first foot back of the street front has the greatest value and that each receding foot is worth slightly less than the one in front of it. The original rule was an adoption of the language of Judge Hoffman, in an opinion in which he stated that the value of ratio between 0 and 100 feet of depth might be expressed in terms of value by a curve which would show two-thirds of the total to be in the first 50 feet back of the street. This tenet of value has been repeatedly affirmed by the court in succeeding years and has been generally adopted throughout the country.

"Some years ago we adopted the Cambridge system. . . . Having obtained from the formulæ of whatever system is adopted and the coefficient applied to the area, the next step is to place the square-foot-price on the lot. Now, if every parcel and plot of land was sold each year, the results would represent a good opinion of land values. But few sales are made, however, compared with the whole, and these cannot serve as a basis to determine accurate values. The laws of various states have attempted to establish values predicated on a price a willing buyer would pay a willing seller, but I think it is fair to say that a large proportion of sales of land is made for either speculation or the necessity of the buyer. Neither of these can be called a fair market value.

"I contend the seller makes the price, also that a change in price of different lots does not necessarily effect the relative value of the lots in the same block. The unit of value, whether it be foot, lot, or acre, should be not as difficult as the next step—the valuation of the buildings, or let me say, the improvements on the land. Now the valuation of land is ordinarily static. Land seldom depreciates, when it does the reason can be easily traced; land cannot be duplicated. Improvements on land can be duplicated, and this makes physical and functional depreciation of buildings. The manner of arriving at land values has been thoroughly modernized by the use of standardized methods, using either the front foot or the depth curve coefficient determined, and only the square foot unit of value to be obtained, but the standardization of improvements on land has not yet been reached, but during the past two years much progress has been made in scientific appraisals for the purpose of taxation, and the replacement method seems to be the keystone of modern valuation. It is the standard for appraisals for insurance and commercial purposes.

"The depreciation element then comes into the picture and rounds out a sound value. The physical depreciation is not difficult, as it only applies to age and condition, but the functional depreciation is the determining factor that calls for the Assessors' skill, his more particular, peculiar knowledge of local conditions that makes it imperative that he, and he alone, can arrive at a real taxable sound value.

"Let us take up for a moment this functional depreciation. By and large it is nothing more than our old friend obsolescence. It can be covered in three words—Type, Location, Lack of Utilities. It is most apparent in factories and old business blocks, old houses too large in square or cubic contents for the ordinary family, with high ceilings and large attics, freak interiors, French roofs, old plumbing and heating facilities, etc. Lack of utilities is a serious cause of functional depreciation, as are buildings in wrong locations for the purpose for which they were erected. In some cases, whole communities may have to be depreciated for reasons obvious to the Assessor; so while it is possible to standardize building values in relation to replacement, and to a certain extent their physical depreciation, it would not be feasible to do so as to functional depreciation. This, with sales and earning capacity, should be three points on which the Assessor should supplement the physical sound value and arrive at his taxable valuation. . . .

"I find that, as a rule, Assessors are too prone to place too much emphasis on sales values, which are becoming every day of questionable importance as a value element. New mercantile buildings and houses without number seem to be bought on a margin, so to speak, when we see two or three mortagages covering property we are sure is beyond the cost, or a payment of $500 down on a $10,000 or a $12,000 house, and the registry piling up the records with foreclosures. A scientific appraisal would bring to the Assessor the sound value. . . ."

The preceding remarks are of interest as showing that one particular town has gone beyond the point of merely listening to the Assessors' recommendations and is actually doing something about the condition which confronts it. Natick is not alone in this activity, for many other towns are following the methods and practice necessary to arrive at the general condition of equalization. Of course, there are those who say, "It can't be done," but no reasonable man will seriously contend that careful, uniform, accurate methods, supplimented by seasoned judgment, will not fairly arrive at valuations more equitable than the same seasoned judgment would produce based on mere visual observation of a particular building, unsupported by other facts.

It seems to us that the Assessors, like the officials administering duties of any other department in the Town, have an obligation to the citizens in addition to that of doing the current work of the particular department, and that is to give the benefit of their advice and experience to the Town and point out the way in which our steps are leading us, and recommend such action as may be necessary to protect the interests of the Town in the years to come. It is not enough to do the work of the office from month to month and year to year merely for the sake of disposing of this year's work. In the long run, it is probably much more important to take advantage of the experiences of previous years and of the present time, and use that experience to lay down plans and procedure for the future. In recommending to the Town last year the necessity of a building survey and a study of the valuations throughout the Town, the Assessors acted in line with what they thought was their duty in pointing out to the Town Meeting the situation that confronts Milton. Milton has for many years been fortunate in the quality of service which has been rendered by its various departments.

The Assessors now specifically recommend, as they did last year, to the Warrant Committee and Town Meeting members the desirability and necessity of appropriating for the use of the Board of Assessors a sum of money sufficient to conduct a building survey, in order that the Assessors may be properly equipped with information such that they, in their use of their own power and judgment, and theirs alone, may determine values on which taxes shall be based. It will be regrettable if the Town fails to take advantage of the experience and recommendations which are set forth herein, and waits until such time as an alarmingly high tax rate forces it to take, hastily, the action which a reasonable consideration of the facts dictates as being necessary now.

The usual statistical information published annually at this time is appended hereto.

Respectfully submitted,

WILLIAM W. CHURCHILL,
GEORGE S. MURRAY,
ROBERT BOWIE,
Assessors of Milton.

The population of the Town, as computed by the Assessors for the year ending April 1, 1929, was 15,503.

Other statistics are as follows:

Number of dogs	990
Number of horses assessed	66
Number of cows assessed	317
Number of sheep assessed	30
Number of swine assessed	28
Number of fowl assessed	1250
Number of persons liable for military duty	2780
Number of dwelling houses assessed	3477
Number of acres assessed	6218

1929 Taxes, In Addition to Those on Real and Personal Estate

4545 polls @ $2.00 (April levy)	$9,070.00
31 polls & $2.00 (December levy)	62.00
Local sewer tax and interest	17,748.14
Local sidewalk tax and interest	612.14
Local street betterment tax and interest	4,159.75
Local moth tax	164.75
Real estate tax (December levy)	98.69
	$31,915.47

Total of All Taxes Assessed

Real and persanal taxes (April levy)	$951,814.35
All additional taxes	31,915.47
	$983,729.82

REPORT OF THE BIRD WARDEN

Milton, Mass., December 31, 1929.

To the Citizens of the Town of Milton:

I beg to submit to you my report as Bird Warden for the year 1929.

There was no appropriation and there are no accounts to be submitted.

There is very little change to report during the past year, of the birdlife observed within the town. The scarcity of both varieties of Cuckoos which I noted in 1928, I believe continued in 1929 These birds are considered very valuable on account of the destruction they do to several of the insect pests. The number of Starlings appears to be about the same as during the previous year, and where they are numerous I believe they have the unfortunate effect of driving away various species of the native birds which we should have with us. I urge the shooting of Starlings where colonies are established, in such localities that shot guns can be safely used. Citizens wishing to assist in this matter should consult the Chief of Police in regard to the town regulations covering the use of guns for this purpose.

I believe that the English Sparrows have held about the same, or slightly diminished since 1928.

Of course, as the town fills up with population the woodland birds and rarier varieties of roadside birds are steadily diminishiing, owing to the clearing away of their natural shelters and food.

A number of citizens in the town are carrying on the practice successfully of feeding stations during the winter, and they seem to derive much pleasure in watching the birds, especially during the stormy weather when they come in numbers to the stations.

Respectfully submitted,
RALPH E FORBES,
Bird Warden.

REPORT OF TRUSTEES OF CEMETERY

Milton, Mass., January 14, 1930.

To the Citizens of Milton:

The Trustees report as follows for the year 1929:—

There were 164 interments in the Cemetery during the year, 101 of which were from out of town.

Forty-three new lots were finished.

Thirty-eight lots were taken by residents of the town.

Four single graves were sold to residents.

Twenty-seven lots and 1 single grave were placed under Perpetual Care during the year.

Sixty-eight foundations for monuments and markers were made during the year.

Seventeen lots were regraded and reseeded.

The Cemetery Building, for which money was appropriated by the Town at the March meeting, has been completed, and now makes available, adequate storage facilities, good quarters for the workmen and rest rooms for visitors to the Cemetery.

A two-inch main laid from Center Street to supply water to the new building, supplies also that section about the Soldiers' Lot, where it was much needed. The main will be continued as development of the cemetery may require.

PERCY E SHELDON,
REGINALD L. ROBBINS,
THOMAS K. CUMMINS,
ASAPH CHURCHILL,
WILLIAM P. WOLCOTT,
THOMAS W. POND, Superintendent

REPORT OF THE FIRE DEPARTMENR

Milton, Mass., January 3, 1930.

To the Honorable Board of Selectmen,

Milton, Massachusetts.

Gentlemen:

I herewith submit my report for the Fire Department for the year 1929.

Alarms

There have been 303 alarms received as follows:
131 bell alarms, 172 telephone calls, 26 calls to Boston, 1 call to Canton.
Boston apparatus has responded 36 times to Milton.

Alarms each month:

January	12	July	27
February	6	August	23
March	47	September	23
April	40	October	43
May	24	November	23
June	20	December	15

Classification

Automobiles	34	Dwelling	29	Lumber	1
Boy's hut	3	False	13	Needless	16
Brush	39	Garage	4	Rubbish	12
Chimney	10	Grass	64	Shed	4
Church	1	Green House	1	Station Platform	1
Drug Store	1	Hay Stack	3	Tar kettle & truck	3
Dump	17	Hen House	1	Tree	4

Other Calls

Accident, House filled with smoke. Rescue animals. Release children from locked room. Assist people to get into locked house.

Figures on Property at Risk

Value	$525,000 00	Net Loss	$350 00
Fire Loss	44,461 90	Per Capita Loss	2 85
Insurance paid	44,111 90		

Work Performed

Feet of Hose laid	24,150	Feet of Ladder raised	869
Gallons of Chemicals used	1,992½	Miles travelled	1,640.4

Permits Issued

Out of door fires	744	Explosives	55
Inflammable fluids	4	Fireworks	6
Oil Burners	72		

Inspections

133 inspections of Oil burners and tanks.
260 inspections of stores.
Regular inspections of all Garages and Filling Stations.

Personnel

The force remains the same as last year with one exception, one callman has resigned.

> Charles H. Bowman, for many years Captain of Engine No. 1, resigned from the department as of April 1st. He was a callman for forty-five years and during all of that time he was a conscientious, sincere, real, and true fireman. He left the department with the best wishes of all.

Apparatus

All of the LaFrance apparatus has been given an inspection by the La-France engineer, and all necessary repairs were made. A new set of Pneumatic tires have been applied to the Pump Engine.

The Oldsmobile, ten years old August 1929, has come to some extensive repairs and it is impossible to get any parts whatever for it. The model was done away with in 1924, and all parts were junked in 1927. I have asked for an appropriation to purchase a new truck to replace this piece of apparatus.

Fire Alarm

Three new fire alarm boxes have been installed this year, replacing three old type boxes.

Discipline

The discipline in the Department continues as usual, of the best.

Recommendations

Following my recommednations of last year, I have asked for an appropriation to cover the salary of two more permanent men to be stationed at East Milton. In the lase five years the value of buildings erected has advanced over $1,750,000.00 and nothing has been done to keep pace with this growth. One more man on each shift will be a start in the right direction of giving East Milton the fire protection it should have.

I wish to extend my sincere thanks to the Honorable Board of Selectmen for their assistance throughout the year.

I wish to thank the Police Department for their cooperation during the year, their help at fires has been very much appreciated.

At this time it gives me great pleasurse to extend my sincere thanks to the Officers and Men of this department for their earnest cooperation in carrying on the good work.

Respectfully submitted,
J. HARRY HOLMES,
Chief of Department.

REPORT OF LICENSING COMMISSION ON GARARES

Milton, Mass., December 31, 1929.

To the Honorable Board of Selectmen, Milton, Mass.

Gentlemen: The Licensing Commission for One and Two Car Private Garages respectfully submits the following report for the year ending December 31, 1929.

Fifty hearings were held and two hundred twenty (220) licenses were issued. Inspections were made on all locations and garages.

Respectfully submitted,

J. HARRY HOLMES, Chairman,
JOSEPH H. DUFFY,
G. E. BURT.

REPORT OF TREE WARDEN

December 31, 1929.

To the Honorable Board of Selectmen:

I beg to submit the following report of the work of the Tree Warden Department of this town, for the past year.

Trimming

There has been very little damage to the trees from storms during the past year, much less than during the three or four previous years. The Department has trimmed about eleven miles of street trees.

Planting

This year we have planted 122 new trees.

Insects

The insect pests were about the same as last year.

Saw Mill

We have not sawed as much wood as last year, but there has been a better sale of wood and lumber so that the mill shows a profit above expenses.

Plans for Next Year

We believe that the policy of tree planting should be continued and we hope to be able to plant about 100 trees next year.

Appendix A.

Trees planted:	
Norway Maples	122
Trees removed:	
American Elms	7

Maples	9
Ash	6
	22

Appendix B. (General Account)

Appropriation for public work	$8,500 00
Expenditures	8,434 66
Balance reverting to Treasurer	$65 34

Appendix C. (Private Account)

Appropriation		$3,500 00
Expenditures		3,084 20
Balance reverting to Treasurer		$415 80
Receipts from private work		$3,152 82
Total reverting to Treasurer		$3,568 62
Receipts	$3,152 82	
Less Expenditures	3,084 20	
	$ 68 62	
Profit from private work		

Saw Mill Account

CREDITS—		
13,580 feet of lumber sawed at $10 per 1000	$135.80	
Receipts from cord wood	216.00	
Receipts from lumber sold	96.10	
Receipts from sawdust	21.00	
		$468.90
EXPENSES—		
Cost of Electricity	$46.94	
Cost of Labor	88.50	
Cost of sawing cord wood	45.00	
		180.44
Credit Balance		$288.46

Respectfully submitted,

RALPH E. FORBES,
Tree Warden.

REPORT OF MOTH SUPERINTENDENT

December 31, 1929.

To the Honorable Board of Selectmen:

I beg to submit the following report of the work of the Moth Department of this town, for the past year.

Suppression Work

The amount of creosoting done this year was somewhat more than the previous year. The infestation of Gypsy Moths is somewhat different this year from that which appeared last year, in that the crowded colonies of nests are more scarce and the isolated nests more numerous. The significance of this is that it takes more time to destroy them, and isolated nests are more apt to be missed.

The Brown-tail Moth has apparently disappeared from the town.

Equipment

We have had to do some repair work on the buildings during the past year, but they are now in excellent condition. The equipment is also in good condition.

Appendix A

Inventory of property of Moth and Tree Warden Department:

One 1926 3½-ton G. M. C. truck with sprayer and platform body	$3,200.00
One 1913 Packard truck	50.00
One 1-ton G. M. C. truck	100.00
One 1-ton Ford truck, 1928	600.00
One Nash Coupe, 1928	680.00
Two Sprayer tanks and Pumps	500.00
Tools of all kinds (including field supplies)	600.00
Office Equipment	250.00
Buildings (including sawmille)	10,500.00
Hose	250.00
TOTAL	$16,730.00

Appendix B. (Gerneral Account

Appropriation	$6,000.00
Expenditures	5,576.56
Balance reverting to Treasurer	$423.44

Appendix C. (Private Account)

Appropriation	$4,000.00
Expenditures	2,509.16
Balance reverting to Treasurer	$1,490.84
Receipts from private work	2,517.60
Total reverting to Treasurer	$4,008.44

Receipts	$2,517.60	
Less expenditures	2,509.16	
		$8.44 Profit from private work

Respectfully submitted,

RALPH E. FORBES,
Local Moth Superintendent.

REPORT OF THE BOARD OF HEALTH

Milton, Mass., December 31, 1929.

To the Citizens of Milton:

The number of contagious diseases reported to the Board of Health for the past three years has been as follows:

	1929	1928	1927
Anterior Poliomyelitis	1	1	7
Chicken Pox	38	59	73
Diphtheria	—	4	6
German Measles	3	9	7
Lobar Pneumonia	16	15	13
Measles	35	336	88
Mumps	5	6	205
Scarlet Fever	40	52	44
Tuberculosis (Pulmonary)	10	13	7
Tuberculosis (all other forms)	2	—	4
Whooping Cough	48	65	57
Influenza	44	—	1
Dog Bite	10	5	12
Typhoid Fever	—	1	1
Para-Typhoid Fever	—	—	1
Ophthalmia Neonatorum	—	2	—
Septic Sore Throat	3	—	—

The Board organized March 20, 1929. Mr. Philip Y. DeNormandie was elected Chairman and Mr. Hervey King, Secretary. The following appointments were made: Agent, Dr. Paul W. Kimball; Inspector of Milk, Dr. Paul W. Kimball; Deputy Inspector of Milk, S. R. Ramsdell; Inspector of Plumbing, L. E. Young; Deputy Plumbing Inspector, B. F. Murray; Agent for Issuing Burial Permits, G. F. Kemp; General Contractor, A. B. Snow; Inspector of Slaughtering, P. W. Kimball; Caretaker of Contagious Hospital, John Dexter. The contract for collecting ashes and garbage was awarded to S. G. Craig.

In order to aid in the prevention of diphtheria, the Board furnished during the month of December, the Cchick test and prophylactic treatment against diphtheria. Approximately 180 persons were given the Schick test to determine whether or not they were immune to diphtheria. This included a number who had previously been given the prophylactic treatment to determine if they had acquired permanent immunity.

Following the Schick test 194 persons were given the prophylactic course of three treatments. The Board of Health again wishes to express its appreciation of the co-operation of the School Department in this effort.

One hundred and sixty-seven permits for connecting houses with the common sewer have been issued during the past year.

During the summer the Board of Health had a survey of all the health activities in the Town made by the American Public Health Association which specializes in this form of work. This survey covered activities now carried on by the Board of Health, the School Department and the private agencies. The result of the survey was a recommendation which was concurred in by the State Department of Health that certain further activities should be undertaken and that every effort should be made to coordinate all the health activities in the Town whether public or

private in order that the most effective service to the people of the Town might be rendered at the least cost.

The increase in the number of tuberculosis cases in the Town and the consequent number of people coming in contact with these cases, renders it imperative that these cases should be more closely followed and more adequately supervised in order to prevent so far as possible the spread of this disease and to reduce the morbidity resulting therefrom.

The increase of population in the Town of recent years has made it evident that the Board was not adequately prepared to cope with the contagious disease problem in providing proper supervision of quarantine and instructive work preventing spread of contagious diseases.

The Board has given careful consideration to the results of this study of the health activities of the Town and after consulting with the State Department of Health has made certain recommendations to the Warrant Committee for appropriations for additional service to be rendered to the Town.

The Board has, this year, continued its practice of having all known cases of tuberculosis in the Town followed up by a competent nurse to be sure that the cases are receiving proper care and that proper hygienic measures are being taken with respect to those coming in contact with these cases.

Respectfully submitted,

PHILIP Y. DeNORMANDIE, Chairman,
PAUL R. WITHINGTON, M.D.,
HERVEY W. KING, Secretary,
Board of Health of Milton.

REPORT OF COLLECTION OF ASHES AND GARBAGE

December 31, 1929.

To the Board of Health:

I herewith submit my report for the year ending December 31, 1929. There have been collected 591 truck loads and 4187 double loads of ashes and 359 cords of garbage.

Respectfully submitted,

SAMUEL G. CRAIG.

REPORT OF GENERAL CONTRACTOR

Milton, Mass., January 8, 1930.

To the Board of Health:

Gentlemen: I herewith submit my report for the year ending Dec. 31, 1929.

Cesspools cleaned	41
Vaults cleaned	5
Dead animals buried	7

Respectfully submitted,

ALVAH B. SNOW.

REPORT OF INSPECTOR OF MILK

Milton, Mass., Dec. 31, 1929.

To the Board of Health:

Gentlemen: During the year 1929 there were issued 54 licenses to sell milk or cream and 11 dealers were registered to sell oleomargarine. Forty-eight of the licenses cover the sale of milk and cream which has been pasteurized and five are for the sale of milk and cream from cows that have been tuberculin tested and maintained in accordance with the State and Federal regulations. The milk has been quite satisfactory both from the standpoint of chemical composition and of cleanliness.

Respectfully submitted,

PAUL W. KIMBALL,
Inspector.
SHERMAN R. RAMSDELL,
Deputy Inspector.

REPORT OF INSPECTOR OF PLUMBING

Milton, Mass., January 1, 1930.

To the Honorable Board of Health:

Gentlemen: Herewith I submit annual report of the Department of Inspection of Plumbing for the year 1929.

Month	Permits	Valuation As Per Applications
January	29	$14,360.00
February	14	9,735.00
March	17	6,400.00
April	29	11,360.00
May	20	9,121.00
June	25	17,700.00
July	31	17,050.00
August	30	10,486.00
September	20	8,379.00
October	32	17,610.00
November	20	9,305.00
December	10	5,090.00
	277	$136,596.00

Respectfully submitted,

LORENZO E. YOUNG,

Inspector of Plumbing.

REPORT OF INSPECTOR OF SLAUGHTERING

Milton, Mass., December 31, 1929.

To the Board of Health:

Gentlemen: No animals were passed for food during the year 1929.

Respectfully submitted,

PAUL W. KIMBALL,

Inspector of Slaughtering.

REPORT OF INSPECTOR OF ANIMALS

January 1, 1930.

To the Honorable Board of Selectmen:

Gentlemen: I herewith submit my annual report for the year ending December 31, 1929.

I visited and inspected 46 barns and premises where cattle are kept and found satisfactory conditions pertaining to the sanitary requirements and health of the animals.

Physical examination was given to 309 cows and eight bulls for infectious diseases.

Interstate shipment of cattle has been complied with according to State regulations.

Eight barns and premises were inspected for proper disinfection following the removal of cattle reacting to the tuberculin test.

There were 17 dogs quarantined for rabies, four of which developed the disease.

Respectfully submitted,

ROBERT H. SEWELL,
Inspector of Animals.

REPORT OF INSPECTOR OF BUILDINGS

January 3, 1930.

To the Honorable Board of Selectmen:
Gentlemen:

I herewith submit my report for the Building Department for the year endisg December 31, 1929.

Month	Permits for new Dwellings	Permits for Alterations	Permits for Garages	Permits other buildings	Valuation
January	6	2	8	3	$50,832 00
February	10	4	10	1	62,145 00
March	14	5	12	5	130,455 00
April	15	10	28	7	128,621 00
May	24	14	22	1	168,585 00
June	12	14	20	2	148,075 00
July	7	17	30	6	86,175 00
August	10	13	17	1	93,325 00
September	19	12	25	1	143,790 00
October	11	23	28	1	105,630 00
November	10	5	14	1	89,718 00
December	6	5	9	5	70,670 00
Totals	144	124	223	34	$1,278,021 00

Making valuation as per applications $1,278,021.

Respectfully submitted

G. E. BURT,
Inspector of Buildings.

REPORT OF SUPERINTENDENT OF WIRES

January 3, 1930.

To the Honorable Board of Selectmen.

Gentlemen:

I herewith present the report of the Wire Department for the year ending December 31, 1929.

This department has supervision of the Fire and Police Signal System, inspection of all buildings equipped with electric light service, and all poles and wires on town streets.

Interior Wiring

	1928	1929
Certificates issued for light and power	274	315
Number of inspections	675	812
Number of incandescent lights wired for	7,686	8,003
Number of motors installed	29	29
Total horsepower	51 11/12	49
Number of electric heaters and ranges installed	28	3
Total watts	16,550	11,000

Radio

All outside antenna wires must be protected by a lightning arrester.

Anyone wishing a copy of rules concerning Radio Installation may have same by notifying the Wire Department.

Fire and Police Signal System—(overhead and underground)

Have replaced arms on poles reset by different companies in town.

Emergency calls 230.

For the maintenance of the Wire Department I have requested an appropriation of Nine Thouand, Five Hundred and Twenty-five Dollars and Sixty-eight Cents ($9,525.68).

Respectfully submitted,

E. E. CHOATE,
Superintendent of Wires.

REPORT OF THE PARK COMMISSIONERS

Milton, Mass., December 31, 1929.

To the Citizens of the Town of Milton:

The Park Commissioners herewith present their report for the year ending December 31, 1929.

The general program of the department has not varied from that of former years except in the increase of facilities and expenditures due to the ever-increasing population of the town:

The personnel of the department was as fallows:

Superintendent	John L. Kelly
Playground Director. . .	Aaron H. Yeaton
Assistants	Miss Alice Cody
	Miss Barbara Kemp
	Miss Helen Kelly

The principle work and labors of the department have been spent upon the grounds of the Brook Road Playground in an endeavor to furnish the High School with a plant which will meet the growing demand of an ever-increasing enrollment.

The school program of some years ago upon the athletic field was towards the perfection of a small group of boys in some particular endeavor such as a baseball nine or football team. In those times small spaces were ample and one baseball diamond and football oval filled the need. Today all this is changed. Children entering the High School today have a well-thought-out program with class teams and other activities enrolling every fit entrant. This, of course, makes additional play space urgent.

Milton has an excellent plant at Brook Road, but it is too small. Acquisition of more ground for athletic field space is strongly urged by your Park Commissioners.

The highway department co-operated with us in furnishing filling for the south end of the grounds at Brook Road in an effort to grade an unsightly spot.

The track, which was re-surfaced in the autumn of 1928, gave excellent service and was much appreciated by the high school track team.

The usual playground activities were carried on during the months of July and August upon these grounds and Hollingsworth Field.

Concrete steps were erected from Brook Road down to the entrance of the field house and some grading was accomplished which, it is hoped, will be finished in the early spring of 1930.

The work of clearing the swamp upon the grounds of the Hollingsworth Field was advanced this summer and it is hoped that this place will be more satisfactory as a skating pond for this coming winter.

A sidewalk was constructed of amesite upon the Crane Field at East Milton and has proven a very desirable short cut to the square and railway station.

We ask for an appropriation of $5400 for the carrying out of our program for the year of 1930.

Respectfully submitted,

WILLIAM G. RODD.
THEODORE D. SHAPLEIGH,
GEORGE OWEN, JR..
Board of Park Commissioners.

REPORT OF POLICE DEPARTMENT

Milton, Mass., January 10, 1930.

To the Honorable Board of Selectmen:

Gentlemen: I herewith submit the report of the Police Department for the year ending December 31, 1929.

Solicitors driven out of town	11
Warrants served for arrest	22
Amount of property reported stolen	$14,850.10
Amount of stolen property recovered	12,388.25

Crime

Several houses were entered during the year and in some cases the criminals were caught and sentenced.

On March 30th and December 16th, the manager of the Economy Grocery Store, 15 Pleasant Street, claimed that he was held up and robbed in his store. Both holdups were similar.

A dangerous pipe bomb was found on Randolph Avenue and after investigating with authorities of this State, Maine and New York, there was not adequate evidence to convict the suspects.

Two houses were raided for liquor and the owners were arrested and prosecuted.

I have recommended the purchase of a Teletype machine which would transmit simultaneously reports of crime and matters of importance to and from this and other police departments.

Traffic

After receiving and accepting the report of the Safety Committee, the Selectmen had automatic signal lights installed at what were considered the most dangerous intersections in the Town. They have helped to reduce accidents and expedite traffic and the public appreciate their usefulness.

Motorcycle Officer James J. Dalton gave safety talks in the schools.

Through the co-operation of the Superintendent and the Principals, a Safety Patrol was established in all of the grammar schools. It is comprised of several boys from each school who have been instructed in safety and traffic rules and detailed at intersections near their respective school.

Motor Service

A new Ford and motorcycle were purchased during the year. I have recommended the purchase of another Ford and motorcycle. The combination ambulance and patrol has been in constant use since 1923 and severely criticized for its uncomfortable and rough-riding quality. Its use as an ambulance is about ended and I have recommended that it be kept as a patrol and a new ambulance purchased.

Police Signal System

The wires and cables leading to the signal desk in the station have proved to be very defective. Some of them are 25 years old and should be replaced. At the request of the Selectmen, I have submitted figures obtained from The Gamewell Company for the installation of new wires, cables and boxes.

The Force

During the year, death removed from this Department, Francis T. Hanna, a faithful and efficient officer. The vacancy has not been filled owing to the Civil Service list not being available.

The discipline of the Department has been good in general. A few members were reprimanded for violation of the rules.

Numerous requests have been received from citizens for officers for various duties but I have been unable to comply with them. I have recommended that another patrolman be added to the force.

Commendations

I was pleasde to receive letters from the Selectmen commending Motorcycle Officer James J. Dalton for performing meritorious service in the arrest of five desperate men and Anna Healy, Clerk of the Department, for her alertness in effecting the capture of a habitual criminal.

Revolver Practice

The members of the Department have done considerable practice and are showing marked improvement. Officer John P. Driscoll won the shoot this year and the second leg of the Silver Cup. I have recommended that the appropriation for ammunition be increased.

Conclusion

My thanks are due and tendered to the Court and its officers, the Honorable Board of Selectmen for their advice and assistasce and to the other Town departments and citizens for their co-operation and information. I deeply appreciate the excellent services rendered by the members of this Department.

Respectfully submitted,
JAMES R. TRAVERS,
Chief of Poliice.

REPORT OF SEALER OF WEIGHTS AND MEASURES

Milton, Mass., December 31, 1929.

Honorable Board of Selectmen.
Gentlemen:

I herewith submit my report for the year ending December 31, 1929:

Number of Scales, Weights and Measures sealed	1,017
Number condemned	7
Number found incorrect and adjusted	25
Number of inspections	124
Number of weighings	204

Respectfully submitted,

JAMES SANGSTER,
Sealer of Weights and Measures.

ANNUAL REPORT OF THE MILTON BOARD OF PUBLIC WELFARE

January 14, 1930.

To the Citizens of Milton:

In Governor Allen's inaugural address he spoke of the extent of mental disease in this Commonwealth. It is interesting to notice that two of the families aided by our town are in need of this aid because of insanity. Also there are two families that are dependent because the fathers of both are in the Norfolk County Tuberculosis Hospital and the mothers have several small children. In these four families, preventive work done some years ago might have made unnecessary these large sums of money that must be expended for reilef at present. Such preventive work is being done in Milton by the School Department, through the Fresh Air Class in the Collicot School and the work of the School Nurse, through the Red Cross Committee of the Milton Woman's Club in providing extra milk for under-nourished children and through the Milton Social Service League in the work of fhe Visiting Nurses, the Baby and Nutrition Clinics. All this helps more than we can realize in building strong bodies and healthy minds for the future.

Among the receipts of the Department is one of particular interest. The sum of $669.00 was paid to the Town Treasurer as reimbursement for board in the home at the Town Farm over five years ago.

There are at present five aged people in the home at the Town Farm. They are there because they have no other home. The policy of the Board is to aid those who need it in their own homes or with relatives when possible, but when there is no other place, it is a deep satisfaction to us to know that we have a home that belongs to us all as citizens of Milton where it is the self-respect-thing to go. We all owe a great debt to Mr. and Mrs. Dexter for the efficient way in which it is managed. We urge the townspeople to visit their Town Farm, for we are sure they will be proud of it. There is a great need throughout the state of more homes for the aged and we in this town are most fortunate that we can make such comfortable provision for our own people.

It would be impossible to over-estimate the value of the service that is being rendered to Milton by Albert Rounseville, the Agent of the Board. His knowledge of legal and court matters is combined with a rare and unfailing sympathy for anyone in trouble or difficulty and the privilege that we have of laying our problems before him and listening to his wise counsel is one that money cannot repay. It is necessary to have the large amount of investigating and clerical work and record keeping done by paid workers and it will be much easier to maintain this at the standard that we approve when we have an office where our files can be kept and our records consulted. All the members of the Board give their service of course without salary.

Respectfully submitted,

HORACE N. PLUMMER, Chairman,
HUGH McCUE, Secretary
CHARLES W. ROLLINS

REPORT OF TRUSTEES OF MILTON PUBLIC LIBRARY

January 9, 1930.

To the Citizens of the Town of Milton:

In order to understand the work of the Library the Librarian's report must be read.

The new building for the branch at Mattapan, voted in March, 1929, was dedicated on 12 November and opened for the delivery of books on the following day. The figures show that this building is appreciated: it has great possibilities of ever-increasing usefulness. There are many to thank for the accomplishment of this building and this acknowledgment seems but meager. The jump in circulation and the increase in registrations are most heartening

The use of the East Milton Branch keeps on increasing but is more and more hampered by the inadequate space. We hope that the offer of land will be accepted at the coming March meeting, and that an appropriation will be made to erect the building to house this branch as comfortably as the one at Mattapan.

A most gratifying increase is that in the use of the Library and its branches for reference work. Practically no private library can maintain a large reference collection and keep it up to date. The Trustees feel that a good reference collection, readily open to the public and especially to the teachers and pupils of the schools, is the Public Library's first duty. To facilitate this use convenient quarters are necessary. Instruction in the use of the books is furnished by the Librarian as her report shows.

We note that 4500 notices of books overdue have been sent out. While it is true that the Town gets back a few cents on each book overdue, it should be borne in mind that each day a book is detained is depriving some other reader of a chance to get the book he wants to read. A quick turnover of the books makes for less need of extra copies and less expense.

When the main Library was built room was left for a third stack. This third stack has now been added with the income of the Channing Fund. Other special needs have been met from time to time from the income of that fund, but now the Trustees have voted to devote its future income to the purchase of books. By this decision the annual appropriation by the Town may be somewhat reduced, although pressing needs as they arise will have to be met or the system will suffer.

The Chevrolet truck is proving economical in its use for the branches.

Mr. Edward L. Pierce, a son of one of the first Board of Trustees, has given the Library the official notification sent his father by the Town Clerk, Jason Reed, of the Town's action 1 March, 1869, when a committee of eight was appointed to consider the establishment of a Public Library in this Town. For this and other gifts and acts of good will the Trustees are most grateful.

Respectfully submitted,
NATHANIEL T. KIDDER, Chairman,
FRANK E. LANE, Treasurer,
ARTHUR S. PIER, Secretary,
VINCENT LEROY BENNETT,

ARTHUR H. TUCKER,
Trustees of the Milton Public Library.

REPORT OF THE LIBRARIAN

January 9, 1930.

To the Trustees of the Milton Public Library:

I have the honor to submit my report for the year ending December 31, 1929.

The chief event of the year has been the building of the new Mattapan Branch. Forty thousand dollars was appropriated for this at the March meeting in 1929 and building, according to plans made by Mr. Eliot T. Putnam, began as soon as the old Kidder House could be moved. Its doors were closed on April 30 while the house made its journey to the rear of the lot, but opened again on May 4 for business. We were often without heat and sometimes without lights. Lanterns were used on several occasions to help in the search for books, and boys and girls took encyclopaedias out on the piazza to get the last ray of daylight. On May 14 we were again connected with the electric current and from then until November 9, when we moved in our new quarters, the old building served the public of Mattapan.

On Saturday, November 9, a group of Boy Scouts, led by Arnold Kenseth, moved the books to the new shelves and at six o'clock on that night, Kidder House which had housed the Branch since 1911, was closed. We had many willing helpers while moving and settling, and we are grateful to Milton Small, Philip McCarthy, Eleanor Timmins and Grace McLaughlin for their assistance.

The new building, which had been beautifully decorated by the Milton Garden Club, was dedicated on the evening of November 12, with appropriate exercises. The keys were presented by Mr. Nathaniel T. Kidder, chairman of the Board of Trustees, to Mr. Kenneth D. Johnson, chairman of the Board of Selectmen, who accepted them in behalf of the town and returned them to Mr. Kidder. Dr. Frank E. Wheatley, President of the Milton Park Improvement Association, then spoke briefly and the exercises closed by the presentation, by Mrs. A. B. Cooper, of a standard flag, the gift of the Huntington F. Wolcott Relief Corps. The flag was carried in by Mr. Francis H. Kemp. In presenting the flag, Mrs. Cooper said that flags for the outdoor pole were to be given in the near future and they have since been gratefully received. After the formal exercises, refreshments were served by the Milton Park Improvement Association to the three hundred or more people who attended.

The building was opened to the public on the following afternoon. From moment the doors opened until they closed at six, an eager crowd of children and older people filled the room and during the first three hours, 339 books were circulated. To Master Philip McCarthy goes the honor of taking out the first book. There had been a loss in circulation from January 1 to November 9 of 592. At the end of November, this loss had been made up and there was a net gain of 689. The total circulation for the year has been 31,174, a gain of 2,048. 1325 of this was in December. In addition to the large number of books circulated since the dedication, 107 new borrowers' cards have been issued, 55 to children and 52 to adults, a proportion which shows that the Branch is appreciated equally by both old and young.

I can best sum up what the use of the Branch has been during its seven weeks of existence by quoting from Miss Hills' report:

"The circulation from November 13 to December 31 has been 6841 with a daily average of 208.8. 104 7 of this has been juvenile and 104.1 adult. This is closer than it has ever been before. In the past the adult was double the juvenile as there had never been room enough to have a large collection for the children without cutting down the number for grown

ups. Many new books have been added, the greatest number being for the children as they were needed most. It has been found necessary to restrict the youngsters to only one new book at a time. It is quite hard for them to choose sometimes which book is wanted as they want them all. There were three full shelves of new nevels for the adult readers on the opening day.

The people seem to enjoy their new library very much. The children come in the afternoon, take off their coats and make themselves at home until dark. In the evening older people come, fathers and mothers, sometimes with their children, and the older boys and girls come to do their studying. There hasn't been an evening that someone hasn't been writing at one or more of the tables. One evening there were four teachers and two college students doing refernce work at the same time. The new Encyclopedia Brittanica has been much appreciated, and is in constant use. Books on philosophy, religion and social sciences that seldom went out from the old building circulate from the new. Ten volumes of Shakespeare went out in one day.

Not a day goes by that someone does not speak of the beauty of the new building or the attractiveness of the interior, or how lovely it looks lighted at night, and what a fine 'job' the trustees did when they got the chance."

Miss Dora W. Hills has been in charge of the Mattapan Branch since 1913, during which time the circulation has doubled. The personal thought, the individual attention and the interest which Miss Hills has put into her work has contributed much to the success of this Branch. All who visit it are glad that at last she has a building which is beautiful in its proportions, dignified and restful in its decorations and furnishings, and practical and convenient to work in.

Mr. Frank H. Hills has taken care of Kidder House from 1913 until it closed. We take this opportunity to voice our appreciation of these sixteen years of faithful service.

The circulation from the East Milton Branch has been 28,959, a gain of 1094 over 1928. The important event so far as this Branch is concerned is the offer by Mr. Nathaniel T. Kidder of a gift to the town of land between Edge Hill Road and Hollis Street, on which to build a branch building for this section of the town. It is our earnest hope that the town will, at its annual meeting in March 1930, appropriate money so that East Milton may have as beautiful a building as that just completed in Mattapan.

The work at Russell Reading Room continues quietly and varies little from year to year. More boys and girls than usual have used it for reference work. The circulation for the year has been 4168.

There has been a gain of 1902 in the Children's Room. 10,892 books have been circulated from the schools, the largest number ever issued through these channels. New forms have been printed to be used by the teachers when ordering deposits. Because of their uniformity, it has been much easier to fill class room requests. We are greatly handicapped in our work with the schools by lack of books. Particularly do we need primers and readers for the first three grades. During the last two years we have had many gifts of these from our townspeople, but many more could be used. We shall be grateful indeed for any future gifts along this line that may come to us.

During the summer the picture collection was revised and six hundred new pictures mounted. Much work still remains to be done but we have made a fair beginning toward revising this valuable tool.

During Good Book Week, children wrote reports on their favorite book. An interesting collection of papers was turned in. The year ends with a Travel Club in progress, for which the children are reading with enthusiasm.

The usual instruction was given to the ninth grade pupils of the High School. These classes came as we were moving books into the new stack, so we were unable to give the lesson on the arrangement of books on the

shelves. We consequently did not ask these boys and girls to take the regular examination

We have been so absorbed and interested in the completion of the Mattapan Branch that we have almost lost sight of the fact that this has been the busiest year in the history of the library.

Following is a brief summary of some of the work done:

136,450 books were circulated through the system, a gain of 7,307 over 1928, and a per capita of 8.8 by the 1929 town census.
949 books were sent to the bindery.
3,071 books were catalogued and prepared for circulation.
7,200 books were sent on deposit to the Branches.
600 new pictures were mounted.
1,783 pictures were circulated.
211 High School pupils were instructed in the use of the library.
4,500 overdue notices were sent out.
12,000 volumes were moved and re-arranged after the erection of the new stack.

For ten years the shelving space in the Central Library has been growing more and more crowded. During the last few years it has been impossible to put books back in many sections with any degree of accuracy owing to the over-crowded shelves. This year we have added a third stack which at once relieved the congestion. This work was paid for from the accumulated income of the Channing Fund, which the Trustees have been holding for this purpose.

A Chevrolet truck was bought in March and was first used on April 1. It has cost us $132.45 to run and house it for nine months. During a corresponding period last year our various deliveries cost $302. In addition to a saving of money we have had the convenience of having a car to use at all times.

As in the past, members of the staff have taken courses for professional advancement and the library has been represented at the winter and spring meetings of the Massachusetts Library Club.

There have been many gifts, the outstanding one being Mr. Kidder's offer of land in East Milton, already spoken of. Mr. Edward L. Pierce, of Princeton, New Jersey, has given the original certificate of Town Clerk, Jason Reed, dated March 1, 1869, relative to establishing a public library in Milton. Two tiles, from the fireplace of the Coats Mansion which stood near the Central Library, were a gift from the estate of the late Arthur W. Sias, a former resident of Milton. The townspeople have been unusually generous in their gifts of books, magazines and flowers and a complete list of donors is appended to this report.

I feel that with the erection of a new stack, the purchase of a new truck, the completion of the Mattapan Branch and the largest circulation in the history of the library, the year has been an eventful and succesful one.

That such an amount of work has been accomplished is due to a cheerful and willing staff and to the friendly supervision of the Trustees who have given unstintingly of their time.

Respectfully submitted,

CARRIE S. ALLEN,
Librarian.

APPENDIX I
Art Room Exhibits

Portraits and pastels by Mary Neal Richardson; Lincoln and Washington exhibit, loaned by Miss Mary Bowditch Forbes; work of Vesper George

Art School; paintings by Milton artists; oils by May Austin Klaus; airplane views of Milton, loaned by Town Engineer; handicraft work by members of Milton Woman's Club; oils by W. H Partridge; oils by Ernest E. Perry and Courtland Butler.

Glass Case and Kidder Hall Exhibits

Paper dolls in the costumes of various countries, designed and made by Miss Esther B. Trull; teapots and boxes from China, loaned by Miss J. Dorothy Gordon; three small model gardens from Massachusetts Horticultural Centennial Show, loaned by Mrs. Bernard W. Trafford; billboard menace exhibit under auspices of Milton Garden Club; hand made jewelry made by Miss Beatrice Crossman; Japanese objects, loaned by Miss Hester Cunningham; antique daggers and rapiers, loaned by Miss Rosamound Lamb; old-fashion plates, loaned by Miss Rosamund Lamb; toy animals, loaned by Miss Margaret Bigelow; and an exhibit of small objects, loaned by various towns people.

Gifts

Mr. W. Newton Harlow, Mr. Nathaniel T. Kidder, Mrs. J. Malcolm Forbes, Mr. Sumner E. Spencer, Mrs. Walter T. Harrison, Miss Mildred Gordon, Miss Anne D. Beck, Blue Hill Meteorological Observatory, Dr. Vincent Y. Bowditch, Mrs Christine T. Calderwood, Mrs. Harriet Tuell, Mr. James F. Ballard, Mrs. Andrew H. Ward, Mrs. W. L. W. Field, Mrs. J. A. Jeffries, Miss Faith Ward, Mrs. Charles C. Copeland, Miss Harriet Whittier, Milton Garden Club, Miss Frances McCarthy, Mrs. Ernest W. Bowditch, Mr. Roger Wolcott, Miss Mary Marks, Mrs Robert Saltonstall, Mrs. A. B Smith, Mrs. Philip Y. DeNormandie, Edward and Francis Cutter, Mrs. Horatio A. Lamb, Dr Mary A. Heard, Warland Wight, Jr., Miss Cora Cummins, Mr Frederick T. Fuller, Mrs. Margaret MacFarlane, Mr. A. H. Durell, Columbine Book Club, Mrs. Holden McGinley, Mr. Henry A Blanchard, Miss Helen Jacques, Hon. Richard B. Wigglesworth, Mr. Philip P. Chase, Mrs. Charles W. Lillie, Dr. M. V. Pierce, Mrs. Edward C. Bradlee, Dr Frank E. Wheatley, Mrs. Geoffrey G. Whitney, Mrs. Nathaniel M. Safford, Mrs. S. Huntington Wolcott, Mrs. Walter S. Hinchman, Mrs. James S. Russell, Mrs. Bernard W. Trafford.

REPORT OF SEWER COMMISSIONERS

The Board of Sewer Commissioners makes the following report of operations of the Sewer Department during the year ending December 31, 1929:

General

Population by the Assessors' census of 1929	15,503
Estimated length of streets of the town (miles)	83.15
Percentage of length provided with sewers	32
Method of disposal	Metropolitan system For Sewage and

Collection Mains

	For Sewage	Surface Water
Linear feet of pipe (measured)	146,786.4	700 (storm overflow)
Linear feet extended during the year:		
By town	8,549.9	
By private parties	170.9	
Number of manholes	699	
Number of inverted siphons	1	
Number of storm overflows	1	
Number of emergency overflows	1	
Number of automatic pumping stations	1	
Linear feet of force-main (12 in.)	960.6	
Number of gate chambers on force-main	1	

House Connections

Number made during the year	164
Number of stoppages coming to the notice of the department	14

Discharge of Sewers

Estimated population using sewer system	11,365
Number of buildings connected	2,178

Financial

Total cost of collection mains to December 31, 1929, (including the East Milton sewer and drain through Babcock Park District	$514,895.92
Bonded debt at date (including East Milton sewer and drain bonds)	$150,000.00
Average rate of interest on bonds	4.103%

For details of sewer construction and maintenance accounts, reference is made to the Financial Report compiled by the Town Accountant, as shown elsewhere.

The sewer extension made during the year were as follows:

By the Town: Bassett Street, 601.8 feet; Libby Road, 205.0 feet: Governors Road, 308.6 feet; Church Street, 270.3 feet; Antwerp Street, 1184.7 feet; Easement, Pleasant Street to Edge Hill Road, 1202.4 feet; Saint Agatha's Road, 295.6 feet; Adams Street, Libby Road to Reservation Road, 567.3 feet; Reservation Road, 609.4 feet; Harold Street, 668.2 feet; Revere Street, 577.6 feet; Hudson Street, 450.0 feet; Meagher Avenue, 773.0 feet; Fairlawn Avenue, 200.0 feet; Rowe Street, 486.0 feet; Edge Hill Road, 150.0 feet.

By private parties: Woodward Court, 170.9 feet.

J. W. ROLLINS, Chairman,
FRED Y. MARSHALL,
STANLEY CUNNINGHAM,
Sewer Commissioners.

REPORT OF HIGHWAY DEPARTMENT

Milton, Mass., December 31, 1929.

To the Honorable Board of Selectmen:

The report of the Highway Department for the year 1929 is respectfully submitted.

On April 1st, when I assumed charge of the street work, there were forty-two men employed and we still have that same number on the payroll.

Many of the streets in Milton are subjected to very heavy traffic. Where adequate drainage has not been provided, the heavy rains and the freezing sleet and snow break down the surface very quickly. Where the wear is great and the road in very poor condition, it would seem economy to tear up the old road and build one designed to resist these conditions. This can only be done where there is plenty of money to do with, so the most satisfactory and emonomic methods of reconditioning these roads must be studied.

The first move was to make out a working program for the general highway work. Highland Street, Brook Road, Squantum Street, and Lincoln Street required immediate attention because they were throughways carrying heavy traffic and in places were nearly impassable.

Highland Street

We began with Highland Street, which is about a mile in length. About two-thirds of it had to have a new wearing surface, due to the fact that it had gone beyond repair. We first deepened and enlarged the ditches on either side of the road, dug cross drains and conducted the water to the new side drains, thus intercepting the ground water which formerly flowed into the road. While this was being done, the surface of the road was broken up and prepared for stone and was later penetrated with asphalt. The remaining third of the street, after being patched, was given a coat of heavy asphalt covered with stone chips, which made a light-wearing surface. I recommend that the remaining third of this street be retreaded with stone next year.

Squantum Street

Squantum Street was treated much in the same manner as Highland Street. No permanent construction was advisable from Adams Street to Granite Avenue because it will be necessary for the Sewer Department to open this road in another year to complete work done this past year in the vicinity of Granite Avenue. Vacant land abutting this street, now in the process of development, will also require street openings.

That part of Squantum Street from Granite Avenue to a point about 200 feet beyond Denmark Avenue is a retread surface. This portion of the street was broken up by the Boston Consolidated Gas Company when they installed one of their gas mains. They agreed to meet our expenses to an amount not exceeding $3000.00. This gave the Town a fair road at no expense to the taxpayer, and kept our Town labor employed.

Brook Road

Brook Road from Brush Hill Road to Blue Hill Avenue, a distance of 848 feet, was rebuilt and constructed according to engineers' lines and grades.

Lincoln Street

Lincoln Street, 853 feet long, was in the poorest condition of any public street in town. It was necessary to use the excavator to sub-grade this road before a wearing surface could be laid. The drainage was improved by the addition of two catch basins. All this work was done to lines and grades and should give many years of service.

Brook Hill Road

At the request of the Selectmen, Brook Hill Road was added to the list of roads to be resurfaced. Before resurfacing, about two hundred and sixty feet of drain was laid and two catch basins installed. This road was resurfaced from Canton Avenue to West Side Road, a distance of 643 feet.

Streets Resurfaced During 1929

	Length	Width	Total Sq. Yds.	Total Cost	Cost per Sq. Yd.
Highland Street					
Canton Ave. to Reed St.	3,935.0	17.4	7,590.0	$3,215.18	0.4236
Brook Road					
Blue Hill Ave. to Brush Hill Rd.	848.	22.50	2,218.0	1,140.90	0.5144
Squantum Street					
Adams St. to Granite Ave.	1,635.3	22.8	4,135.54	1,988.85	0.481
Lincoln Street					
Brook Rd. to Thacher St.	853.	19.0) 22.0)	2,030.8	1,439.03	0.7086
Brook Hill Road					
Canton Ave to near West Side Rd.	643.5	23.8	1,822.32	1,046.03	0.574
***Squantum Street**					
Granite Ave. to Denmark Ave.	1,431.10	22.	3,750.		
Total	9,345.9		2,154.66	$8,829.99	

*Work paid for by Boston Consolidated Gas. Co.

Thacher Street

Thacher Street came under the permanent construction appropriation and was done by contract, being awarded to Simpson Brothers Corporation of Boston by the Board of Selectmen. After drainage was installed by the town, a vulcanized sheet asphalt surface was laid.

Betterment Streets

The betterment streets built by the Highway Department are Viola Street, Breck Street, Bassett Street and Antwerpt Street. These streets are built just as the other betterment streets have been built. First adequate drainage, then eight to ten inches of gravel base with four inches of broken stone wearing surface rolled and penetrated with asphalt, and on either side of the road a four-foot tree lawn and a four-foot sidewalk.

The gutters and shoulders of many of the highways were in a dangerous condition. These have been repaired, some with gravel and others with broken stone rolled and penetrated.

Granite Avenue

Granite Avenue on the easterly side from Squantum Street to Wood Street was widened. This work required the use of a steam shovel and the excavated material was used on Squantum Street in the vicinity of Denmark Avenue to fill in and straighten the road. Retaining walls, steps and driveways were built as planned.

The Keystone excavator, under the control of the Water Department, has been used frequently by the Highway Department. It is through the cooperation of the Superintendent of the Water Department in planning the season's work that it was always available when needed.

Street Oiling

For oiling, I have used the heavier type of oil because it is more durable and adds to the wearing surface of the road by keeping the water out.

Sixty-five per cent and 96% asphale has been used as conditions have required. The two grades of asphalt are used extensively by road builders and are applied hot. The 65% asphalt is the lighter and is used mostly on gravel surfaced roads because it will penetrate the worn, loosened surface and leaves a fairly smooth water-proof surface. The drying process takes four or five days and one application of asphalt will last a year or more. The 96% asphalt is a much heavier grade and wears best on a smooth, hard surfaced road. This treatment is followed immediately by an application of stone chips.

The 96% asphalt was used on a part of Brush Hill Road, on the upper end of Thacher Street, on a part of Brook Road and on the streets approaching the Town Hall.

The only tar used was on Adams Street and Centre Street. These roads were originally tar.

Drainage

The following is a list of drainage installed this year by town labor:

Location	Length in feet	Size in inches	No. of basins	No. of manholes
Bassett Street	200.	10		
	80.	8	5	1
Breck Street	130.	8	2	0
	240.	10		
Brook Hill Road	20.	8	2	0
	300.	15		
Canton Avenue	960.	12	0	5
Capen Street	24.	8	2	1
Centre Street	63.	8	0	0
Curtis Road	163.	8	0	1
Eliot Circle	195.	8	0	1
Granite Avenue	18.	8	2	2
Highland Street	66.	8	1	0
Lincoln Street	40.	8	2	0
Norway Road			1	0
Projecta Road	531.	12	0	0
Smith Road	88.	8	1	0
	156.	12		
	755.	10		
Thacher Street	370.	8	21	6
Walnut Street			1	
Warren Ave. at Playground	82.	8	0	1
Total	4,481.		40	18

1260 feet of the Canton Avenue drain was laid this year up to December 31st. About 400 feet of this line and the catch basins remain to be done.

Traffic Signals

After the March Town Meeting the work of installing the traffic control signals was started. The Highway Department did all the excavating and concrete work in connection with this installation. All the money for

traffic signals, excepting equipment, has gone to town labor, this amount being $1,799.31.

The following is a list of intersections controlled by "Stop" and "Go" signals:

Blue Hill Avenue at Dollar Lane and Milton Street	Electromatic signal
Blue Hill Avenue at Brook Road	Pretimed signal
Brook Road at Central Avenue and Reedsdale Road	Pretimed & manual signal
Brook Road at Randolph Avenue	Pretimed signal
Brook Road at Centre Street	Pretimed signal
Randolph Avenue at Centre Street	Pretimed signal
Reedsdale Road at Canton Avenue and Centre Street	Pretimed signal
Granite Avenue at Squantum Street	Electromatic signal
Granite Avenue at Adams Street (rebuilt signal)	Manual control

At two of the intersections; namely, Blue Hill Avenue at Dollar Lane and Milton Street and at Granite Avenue at Squantum Street, the type known as Electromatic Vehicle Actuated Signals have been installed. This type of signal was chosen for these two intersections because they are most efficient and are particularly adapted to handle traffic at these points. This signal allows a continuous stream of traffic unless a vehicle actually wishes to cross. The vehicle is permitted to cross at the first gap that occurs in the continuous stream. The signal apparatus could not be purchased but is rented on a monthly payment plan and has been paid for out of the signal appropriation. The poles and signal heads were purchased by the town and installed by town labor.

At the present time there is being installed at the intersection of Canton Avenue, Highland Street Thacher Street a magnetic signal having a semi-actuated control. This signal is being installed on trial at the expense of the Crouse Hinds Company of Boston and at the end of a stated period its purchase will be optional.

Mr. Maxwell Halsey, Traffic Engineer for the Department of Public Works, ordered the signal in East Milton changed. This had been installed before we began to install the control system under the supervision of the State. To meet the standard code for signals, it was necessary to install an entire new unit with the four lenses in one, putting the red at the top and the green arrow at the bottom. Because of this unforeseen demand, the signal appropriation was exceeded to the amount of $338.67.

Equipment

Most of the equipment is in very poor condition. There are five trucks, a five-ton White which is seven years old, a three and one-half ton truck which is five years old and three small ton trucks. Two of these small trucks have very little value. Therefore, I am asking for an appropriation for one ton truck and for one large truck to replace the five-ton White.

Steam Rollers. The town owns three steam rollers as follows:

1 tandem, built in 1916, weight about 6 tons
1 maintenance, built in 1914, weight about 10 tons
1 maintenance, built about 1916, weight about 12 tons.

The first two machines have passed their day of usefulness. The Highway Department needs the use of two rollers most of the year. Therefore, I recommend trading in the two old machines and purchasing one new gasoline road roller and am asking for an additonal appropriation for this purpose.

New Sheds

Much of the equipment, such as wagons and snow ploughs, has to be stored out in the yard and is exposed to the elements. I recommend an appropriation to build additional sheds for the purpose of storage.

On April 1st there were seven horses owned by the town. These were used for general work on highways and for ploughing snow. Three of the poorest of these animals were sold. This winter we have the use of three horses belonging to local contractors in exchange for their board.

Private Work Account

I have not been allowed to charge the private work account for street repairs where openings have been made by the Water or Sewer Departments because of the wording of the Article for this appropriation.

Details of the financial statement will be found in the report of the Town Accountant.

Before closing my report, I wish to thank the Selectmen and all officials of the town for their courtesy and cooperation. I also wish to express my gratitude to the foreman, sub-foremen and the employes of the Highway department for their excellent services.

Respectfully submitted,
FORREST J. MAYNARD,
Superintendent.

REPORT OF BOARD OF WATER COMMISSIONERS FOR 1929

Milton, Massachusetts,
January 16, 1930.

To the Citizens of the Town of Milton:

The Board of Water Commissioners submits to you herewith its Annual Report for 1929.

As in our two previous reports, we refer you to our report dated January 16, 1926, for a detailed discussion of the Department's problems.

Financial Report for the Calendar Year 1929

1. 1929 Operations

Operating Receipts	$113,758 06	
Operating Expenses	57,331 71	
Net Operating Revenue		$56,426 35
Interest	$ 15,138 87	
Bond Retirement	25,000 00	
Total Fixed Charges		40,138 87
Balance for Property Retirement & Surplus		16,287 48
Retirement Reserve Transfer		10,000 00
Balance for Surplus		*$6,287 48

*In accordance with the terms of the "Enabling Act" under which your Commissioners operate, this sum should not be less than $10,000.00.

The information in the following table compares the conditions of 1902 and the past six years.

	Number of Fire Hydrants in Use	Number of Meters in Service	Miles of Main in Use	Cubic Feet of Water Purchased	Population April 1, by Assessors
1902	266	1000	35	15,873,600	7,100
1924	467	2659	60	26,277,400	11,950
1925	496	2976	64	29,471,800	12,779
1926	515	3174	67	34,234,400	14,259
1927	541	3317	70	34,322,900	14,813
1928	561	3482	72	36,205,900	15,508
1929	578	3670	74	41,384,000	15,503

At the close of 1929, eighteen persons were regularly employed by the Department, which continues to be conducted economically and efficiently.

2. 1929 Business

A tabulation titled "Statement of Earnings, Expenses, Construction Expenditures, Etc." will be found in the pages immediately following this report. This tabulation shows clearly the results of the Water Department operation for the last six years and includes an estimate for 1930.

Total Earnings satisfactorily increased over 1928 results in the principal sources of revenue.

After deduction of Operating Expenses, Taxes, Interest and Bond Retirement Charges and transfer to Retirement Reserve, the Balance for Surplus amounted to $6,287.48. While this balance was larger by $6,029.37 than that for 1928, closer study of the tabulation reveals the following:

(1) Increased Earnings because of the dry summer and an increase in the minimum charge for water supply;

(2) An increase of $1,938.97 in the cost of water purchased from the Metropolitan District Commission;

(3) A slight increase in Operating and Maintenance Expenses exclusive of cost of water;

(4) An increase of $5,639.56 in Interest and Bond Retirement charges; and

(5) A charge of $10,000 to further build up the Retirement Reserve against which property when retired from service as no longer useful to the Department, will be charged at its original cost.

It will be noted with interest that the Earnings increased $13,365.95 over those for 1928 while the Operating Expenses, other than the cost of water, increased only $108.05 above those for the past year.

3. 1929 Construction

The necessary extensions and reinforcements to the system and additions to equipment of the Department have been completed at a total cost of $43,301.42. This figure is $12,670.75 less than was spent in 1928 and is less than the 1927 expenditures by $28,406.79.

4. Financing for 1930

Largely because the necessary reinforcement of the system of water mains, on which $200,293.54 has been spent in the last six years, has not as yet been completed, it is necessary to provide the Dpartment with additional funds for continuing these essential extensions to the system, for which purpose about $60,000 will be required.

5. Water Rates

Careful administration and operation of the Department enabled your Commissioners to meet all charges without any changes in rates until March, 1928, when a reasonable increase in the hydrant rental was granted; but as was indicated in our report last year, additional revenues are necessary because of the cost of strengthening and enlarging the system of mains and the continued increased in cost of water purchased, largely due to the cost of the Swift River project now being built under the direction of the Metropolitan District Commission. Therefore, as of June 30, 1929, the quarterly minimum charge was increased from $2.50 to $3.00, leaving however, the charge for water used in excess of the first 1,000 cubic feet per quarter at the same rate as formerly, namely, 25 cents per hundred cubic feet.

This increase of but $2.00 per consumer per year in the cost of water is moderate under the circumstances. Whether or not a further increase in water rates will be necessary, your Commissioners cannot now foretell because this will be governed by conditions largely beyond their control including.

(1) The increase in the cost of water secured from the Metropolitan District Commission.

(2) The investment which your Commissioners will be called upon to make in the water main system for its reinforcement and improvement.

As to the extensions to serve new territory, your Commissioners expect they will be more nearly self-supporting than in the past because the yearly guarantee on main extensions has been increased from 6 to 8% of the cost thereof and the period covered by the guarantee lengthened.

6. Shelter for Automobile Equipment

At the March 1929 meeting the Department was authorized to construct a suitable garage on property adjacent to the Thacher Building for use of the Water and Engineering departments. Your Commissioners were pusuccessful in securing the necessary authority to construct this garage and it was therefore not built.

The need still exists for such a building and the matter will again be brought to the attention of the Town at its next meeting.

Articles have been introduced in the Town Warrant to clothe your Commissioners with the necessary authority to conduct the usual operations of the Department to provide for hydrant rental, additional finance and a shelter for mechanical equipment.

Respectfully submitted,

MARCY L. SPERRY,
EDWARD L. HURD,
EDWARD E. FORD,

Board of Water Commissioners.

STATEMENT OF FINANCIAL CONDITION OF THE WATER DEPARTMENT ON DECEMBER 31, 1929

ASSETS

What the Department Owned

(1) Plant $915,900 98

This includes all of the water works property belonging to the town which is being operated by the Water Department. It consists of street mains; services; meters for measuring water used; gates for the control of water supply, and hydrants for fire protection; general equipment, such as, mechanical excavator, air compressor, Leadite equipment, pipe machines, forges, etc., used in construction work; automobiles and trucks; and office equipment, such as vault, counter, typewriters, adding machine, desks, filing cabinets, etc.

(2) Cash 39,445 70

The amount held by the Town Treasurer to the credit of the Water Department, subject to withdrawal only by warrants of the Commissioners, plus a small cash fund which is maintained in the office of the Department for defraying minor expenses.

(3) Savings Bank Deposits 15,100 55

These deposits are made by consumers whose homes are in new territory. The money is held in the Milton Savings Bank as a guarantee to the Water Department of an adequate return on the investment made to give such consumers water service.

(4) Accounts Receivable 33,440 10

The amount owed to the Water Department by residents and others for water supplied, service installations, or for miscellaneous items.

(5) Materials and Supplies 17,517 45

The value of supplies, such as iron pipe, pipe fittings, valves, repair parts, etc., on hand.

Total Assets $1,021,404 78

LIABILITIES

What the Department Owed

The Department accounts for money used to provide for your water system as follows:

(6) Bonds Outstanding $366,000 00

The Department is responsible for the property represented by these bonds as shown below:

Date	Rate	Issued	Retired	Outstanding
1902 . . .	3½ %	$312,000	$282,000	$ 30,000
1924 . . .	4 %	50,000	10,000	40,000
1925 . . .	4¼ %	25,000	5,000	20,000
1926 . . .	4 %	50,000	8,000	42,000
1927 . . .	4 %	85,000	9,000	76,000
1928 . . .	3¾ %	70,000	3,000	67,000
1928 . . .	4 %	95,000	4,000	91,000
		$687,000	$321,000	$366,000

The property represented by the bonds retired is included in the next two items:

(7)	Town of Milton ..... The total net money provided by direct appropriation by the Town for extensions to the system.	$240,025 30
(8)	Milton Water Works ..... Represents original capital investment plus subsequent increases as Water Loan Bonds are retired through Water Department earnings.	293,693 70
(9)	Consumers' Guarantee on Main Extensions ..... The guarantees appearing in the assets (Item 3) as pledged by consumers in new territory are held only as a trust, and therefore cannot be used for Department purposes unless forfeited. To offset this item, which must be accounted for in the statement of assets, there must be again shown a like amount as a liability for which the Department is responsible to those who have pledged it.	15,100 55
(10)	Sale of Water—Minimum Advance ..... Advance payment of minimum charges made by the consumers credited to this account are being reduced as the water is used.	10,872 11
(11)	Interest Accrued ..... This is interest accrued on bonds outstanding.	2,525 20
(12)	Reserve for bond retirement ..... Certain water loan bonds become due and payable each year. These payments are now being made from the earnings of the Department, and this amount represents that portion of $25,000 of bonds payable in 1930 which is applicable to the bonds payable in 1930 which is applicable to the year 1929.	10,583 33
(13)	Reserve for inventory adjustment ..... This account has been set aside to provide for adjustment o finventory, when it is depleted through loss, deterioration or damage, or when its market value is less than its inventory value.	297 81
(14)	Reserve for property retirement ..... Amount set aside from surplus to build up a reserve against which will be charged the original cost less salvage of property retired from service due to having become worn out in service, obsolescence, or for other causes. This amount includes $10,000, which was transferred from surplus in 1929.	16,158 84
(15)	Suspense—Contributions for extensions ..... Where a part of the cost of main extensions is advanced by outside parties the amount advanced is placed in this account temporarily. It will eventually be returned or credited to party advancing it.	221 89
(16)	Surplus ..... The book value of the Department's property exceeds its obligations by the amount of this surplus.	65,926 05
Total Liabilities		$1,021,404 78

REPORTS OF SPECIAL COMMITTEE

December 1, 1929

To the Board of Selectmen of the Town of Milton:

Dear Sirs:

At the town meeting held in March 1929 the two committees appointed by the Moderator under Articles 58 and 59 of the 1928 Warrant were consolidated into a single committee originally composed of the following membership: James S. Russell, Chairman, James F. Ballard, Edward C. Bradlee, Stanley Cunningham, and Frank A. Stout. Mr. Edward C. Bradlee subsequently resigned from the committee and in June 1929 Mr. Oscar W. Haussermann was appointed to fill the vacancy caused thereby.

The committee has been appointed to consider three matters, namely:

(1) The regulation of future real estate developments;
(2) The advisability of revising the building laws of the town; and
(3) The policy of laying out highways and assessments of betterments thereon.

In view of the fact that the above three matters are not parts of one general subject, the committee has found it necessary to study each matter separately and to report separately thereon.

The three reports on the above matters respectively are annexed hereto.

Respectfully submitted,

JAMES S. RUSSELL, Chairman,
JAMES F. BALLARD,
STANLEY CUNNINGHAM,
OSCAR W. HAUSSERMANN,
FRANK A. STOUT.

Report of Committee Appointed by the Moderator of the Town of Milton to Consider the Regulation of Future Real Estate Developments in the Town

FOREWORD

We assume that back of the article in the warrant ordering the appointment of this committee were (1) a recognition of the fact that although existing laws and by-laws may protect the town against **some**, they do not protect the town against **all**, of the major features of undesirable real estate developments; and (2) a fear that with the extension of rapid transit facilities between Boston and Milton there will come real estate developments, which although within the law as the law now stands, will, nevertheless, materially hurt the town.

The population of Milton will grow. Growth means additional private spaces. These future houses, structures, streets, and new public open spaces. These future houses, structures, streets, and open space will for the most part develop on what are now the undeveloped areas of the town.

A general desire exists that this certain future growth will be coordinated and harmonious, and that the new streets will all be properly located, constructed and equipped, and the entire process of future development will be consistent with the present high standards and residential character of Milton. Some citizens hope and believe that such a development will result naturally without additional regulation. Others are convinced that such a result requires additional regulation.

Because of the many-sided nature of the problem and the sphinx-like state of the Massachusetts Constitution in so far as its express provisions go and the illusory nature of existing statutes pertaining to some aspects of the problem, few citizens have had the time to develop a mental picture of the problem as a whole and of the defects and loop-holes in the laws that now exist and of the possible constitutionality or unconstitutionality of such regulations as have already been suggested.

However, interest, discussion and cerebration (possibly in the order named) have been developed among the people of the town regarding the planning problem. This is a necessary and important first step. The next step inevitably will be the development of a working consensus among the voting majority of the citizens. When such a consensus arrives the town will act.

The committee believes there is danger to the town in non-action. It also believes there is danger in postponing the plugging up of the holes that exist in supposedly protective legislation now on the statute books and in the town's by-laws.

The purpose of this report is **first** to bring home to the citizens the principal ways in which real estate developments can be detrimental to Milton and the extent to which existing statutes and by-laws protect or fail to protect the town against such detriments; and **second**, to show what steps can be taken this year without severely disturbing the present status quo, toward trying to obtain additional legislation aimed (a) to handle in a manner both constitutional and economical the prevention of buildings athwart previously mapped out streets or open spaces; and (b) to enable the town to establish, and in the manner to be indicated, to enforce, reasonable standards as to materials in, and type of construction of, future private ways that will be opened to public travel; and **third**, to point out what must be done ultimately if the town actually desires a legally protected town plan aimed to assure coordinated and harmonious development of present undeveloped areas.

I. PRINCIPAL EVILS OF SO-CALLED UNDESIRABLE REAL ESTATE DEVELOPMENTS; AND EXTENT TO WHICH EXISTING STATUTES AND BY-LAWS PROTECT OR FAIL TO PROTECT TOWN AGAINST THEM.

Individuals treating the problem of protecting and controlling future development of the town often forget that there are at least seven general evils to combat and are likely to focus on one particular evil as though it embraced the entire problem. Regulations protect only to the extent that they cover the situation as a whole in all its aspects.

Generally speaking, the evils that are the attributes of so-called undesirable, detrimental or improper real estate developments usually take one or more of the following forms:

1. The use to which the structures thereon are to be put conflicts with the general character of the immediate neighborhood or of the town as a whole.
2. The type of construction is below reasonable standards of construction and/or the houses are too near the front or side lines of the lots on which they rest.
3. The development though conforming to zoning by-laws and building regulations is, from the qualitative or architectural or aesthetic standpoint, materially below the standard of the immediate neighborhood.
4. The private plan of the development may either omit, or contain improper provisions for installation in streets and roadways of such facilities as sewer, water pipes, etc.
5. The private plan places houses or other structures athwart streets or ways or open places planned for that area by public boards.
6. The streets or ways either (a) are of improper width, or (b) are not in conformity with the direction and location of future streets as planned by public authority, or with streets already laid out and in use in the general vicinity, or, (c) are so closely gridironed as to result necessarily in exceedingly small lots and houses below the standard of the community.
7. The construction by the developer of the streets or roadways in the development may be below reasonable standards because of inadequate foundation, improper surfacing and faulty or non-existent means of drainage.

In regard to the first two evils above mentioned, the committee believes that existing permissive legislation and the zoning by-laws and building regulations thereunder constitute a system of legal protection against these two evils adequate for the needs of the town. It is believed that the existing state statutes are broad enough to permit such amendments of our zoning by-laws and building regulations in the future as the town may reasonably require.

In regard to the third evil above-mentioned, it is obvious that society has not yet reached the stage where sufficient consensus has been developed as to what is good taste, good architecture and aesthetics, to afford any common standard upon which to base regulations aimed directly or solely at the occasional architectural monstrosity or the development that by general verdict is undesirable solely because unattractive.

In two Chicago suburbs the restriction as to architectural standards is that—

> "Every building shall be so designed and constructed as to be suitable from the architectural standpoint in its environment."

The committee obviously for the reason above stated, to say nothing of

the doubtful constitutionality of any such restriction in Massachusetts, makes no recommendation pertaining to this particular evil.

As already stated, a real estate development may be detrimental to the settlers thereon, or to the neighborhood, or to the town as a whole, because

(4) The private plan of the development may omit, or contain improper, provisions for installation in streets and roadways of such facilities as sewer, water pipes, etc.

When a developer voluntarily builds first-rate streets and at his own expense installs the above facilities therein and then dedicates the streets to the town, the situation is so Utopian that good citizens yearn for a law that would force developers to do the same handsome thing involuntarily, as a condition of approval of their plan by public boards.

No way exists, the committee believes, under the Massachusetts constitution legally to force the developer to equip at his own expense his own private ways with the facilities above mentioned.

To facilitate following ensuing comment in regard to the fifth and sixth evils, we re-state them here. We pointed out above that a real estate development may be detrimental or undesirable because

(5) The private plan places houses or other structures athwart streets or ways or open places planned for that area by public boards;

or because

(6) The streets or ways either are (a) of improper width or grade, or (b) are not in conformity with the direction and location of future streets as planned by public authority, or with streets already laid out and in use in the general vicinity, or (c) are so closely gridironed as to result necessarily in exceedingly small lots and houses below the standard of community;

An eminent authority on the legal aspects of city planning has written:

"The dangers to a city plan which has no enforceable legal protection are twofold.

In the first place, owners may erect on the site of the proposed streets buildings of such a substantial character that if, when the streets are finally established as public streets, the owners must be paid damages for the destruction of the buildings, the cost to the city will be prohibitive and the plan must be abandoned.

In the first place, if owners of tracts of vacant land who open it up for development are permitted to lay out their roadways without regard to the city plan, it will be impracticable to carry out the city plan in that neighborhood and the city plan must be abandoned, even if no structurres happen to lie in the roadbeds of the streets projected on the city plan, because two inconsistent street systems, each sufficent in itself, cannot well co-exist in the same territory."

How far has existing legislation in Massachusetts gone to enable a town to protect itself against the two evils last mentioned? The complete expression of the Massachusetts legislature on the matter is found in Section 70-81 of Chapter 41 of the General Laws,—these sections embracing the so-called Planning Board Act and the Board of Survey Act.

In Section 70 of Chapter 41 of General Laws it is provided that "every town having a population of more than ten thousand .... shall .... create a Planning Board, which shall make careful studies of the resources, possibilities and needs of the town .... and maks plans for the development of the municipality."

Section 72 adds that "towns may make .... by-laws for carrying out the purposes of Section seventy".

Section 73 provides that in town accepting the Board of Survey Act, "the selectmen shall constitute a board of survey".

Section 74 states "no person shall open a private way for public use without first submitting to said board suitable plans thereof in accordance with such rules and regulations as the board may prescribe, ... After hearing the board may alter such plans, and may determine where such ways shall be located and the width and grades thereof ..... and thereafter no way in the territory to which the plans relate shall be laid out or constructed except in accordance therewith."

Section 75 provides that the Board of Survey "may . . . . from time to time cause plans to be made to such territory or sections of lands in the town as the Board of Survey . . . may deem necessary, showing thereon the location of such ways, whether already laid out or not, as, in the opinion of the board, the interest of the public may or will require in such territory, showing clearly the direction, width or grades of each way". (Then follow provisions re-hearing and filing of adopted plans.)

Section 77 adds that "if any person shall open for public travel any way, the location, diection, width, grades .... of which have not been permanently approved by the boardd of survey, ... neither the town nor any public authority shall place any public sewer, drain, water pipe, or light in, or do any public construction work of any kind, or make any repairs, on such private way."

Section 78 forbids the register of deeds to record plans not endorsed by the Board of Survey.

The decision of the Massachusetts Supreme Court in the case of **Board of Survey of Lexington vs. Suburman Land Company** ((235 Mass. 108) makes it clear that no penalties, remedies or restrictions can be imposed upon non-conforming developers other than those expressly set forth in the above sections. In this particular case dealing with a similar statute, the court held that the statute did not entitle the town to an injunction to restrain a developer from laying out non-conforming streets. The Court said:

> "The statute contains specific consequences in the nature of penalties by restricting the rights of owners in the event of violation of the statute. The consequences imposed by a statute of such a character are commonly regarded as exclusive and no general relief against violation of its terms is conferred upon public officers by implication. Such a statute, reaching out into a new domain, usually covers the whole field and states fully and exclusively the duties, obligations, powers and remedies thereby created .... It is customary for the Legislature in statutes of this general nature, to confer the right to relief in equity by express terms, when its purpose is that such relief shall be afforded. That rule is recognized .... There is nothing in this case which calls for a relaxation of that rule."

Commenting upon the kind of penalty which the Board of Survey Act imposes upon non-conforming developers, our town counsel has written:

> "The only penalty for failing to present plans as required by the statute is that if the plans are not presented and approved ways cannot be laid out by the town, and neither the town nor other public authority can place any public sewer, drain water pipe or light in, or do any public construction work of any kind, or make any repairs on the way. **This provision does not prevent an owner from laying out his ways in any manner he sees fit, but he cannot get public improvements if he does not choose to come into line.**
>
> The penalty has proved very effective and, so far as I know, it is not subject to any constitutional objection."

By way of summary of the Board of Survey Act, and of the Sections pertaining to Planning Boards, we give below the salient matters covered and the things not covered thereby:

(a) A comprehensive town plan covering all undeveloped

areas, as well as developed areas, may be drawn up by Board of Survey, or by the Planning Board.

(b) A developer cannot get his private plan recorded in the registry of deeds, and cannot get sewers, water pipes, drains, or light or public construction work in or on his private ways, if the streets or ways do not conform to the width, grades, direction, and location approved by the Board of Survey, or established by the Board of Survey on any public plan of its own extending over the developer's tract.

(c) No penalty in the nature of a fine is imposed on non-conforming developers and no right of injunction is given to the town to prevent the developer from laying out non-conforming ways.

(d) The sections fail absolutely to cover, either expressly or impliedly, the situation where a land owner, after the Board of Survey has adopted a plan, places houses or other structures athwart streets or ways provided for by the adopted plan over the owner's land.

(e) No power is given to the Board of Survey to force the developer so to construct his streets as to meet reasonable standards in regard to foundation. surfacing and drainage. (But see later discussion on this point.)

Finally, real estate development may harm the town or citizens of a given neighborhood, or purchasers of lots or houses on the development, because

(7) The construction by the developer of the streets or roadways in the development may be below reasonable standards because of inadequate foundation, improper surfacing, and faulty or non-existent means of drainage;

Does the Board of Survey Act give to the Milton Board of Survey the power to make and enforce rules and regulations whereby the private developer would be obliged so to construch his roadways as to meet reasonable standards in respect to foundation, surfacing and drainage?

While the letter of the law affords some ground for rebate on this question, it seems to be the general opinion that no such power is given by the Act as it now stands.

Moreover, in the Lexington case above mentioned, the court, as we have seen, has clearly indicated an attitude against enlarging the powers of the Board of Survey through liberal construction or implicatiion.

> "Such a statute" said the court, "reaching out into a new domain, usually covers the whole field and states fully and exclusively the duties, obligations, powers and remedies thereby created."

In the following sentence of the court in the same case there is at least a hint as to the scope of the "rules and regulations" which a board of survey may impose:

> "The bill does not allege that the plans were rejected because of failure to conform to the mechanical requirements of the rules and regulations, as to kind of cloth on which made, size, scale, or other details."

We give here an interesting letter from our town counsel pertaining to this matter:

> "———— One of the matters which has been most talked about in recent years has been the practice of certain developers to lay out their land upon improperly constructed streets, and I believe this to be one of the things which your Committee has particularly in mind.
>
> We now have a statute on the books establishing a board of survey, which has been generally accepted as a valid act

and has been before the Supreme Court in at least one case, and perhaps more.

It is familiar to you that this act provides that 'no person shall open a private way for public use without first submitting to the board suitable plans thereof, in accordance with such rules and regulations as the board may prescribe.' There is no special statement as to what rules and regulations may be adopted, except that in cities the plans submitted must be shown the profile of the way and the method of drainage of the adjoining or contiguous territory. Whether the language of the act would enable the town boards to make rules and regulations relative to the method of construction of the way, I think is doubtful and, so far as I know, the town boards have not attempted to do this. The act, however, might be amended either so as to apply to the entire Commonwealth or so as to apply to Milton alone, to make the provision clear that boards of survey could, among their rules and regulations, include regulations as to the construction of the way. If this could be done, it seems to me that one of the particular problems of your Committee would be met.

The above would be somewhat new and nobody could give absolute assurance that the Supreme Court might not say that it is going too far, but at the present writing I should consider it a valid provision."

II. RECOMMENDATIIONS INVOLVING IMMEDIATE ACTION

As already stated, comprehension of the general task of protecting and controlling future real estate developments involves consideration of not one, but seven, general problems.

The committee has appointed out in Part I of this report that sufficient permissive legislation exists to enable the town through zoning by-laws and building regulations adequately to protect itself in regard to the first two of the seven general problems already listed.

As to the third problem, the committee has stated in Part I that in its opinion there is no practical or constitutional way in which the town can directly impose upon developers qualitative or architectural or aesthetic standards aimed directly and solely at appearance.

As to the fourth problem, the committee has stated that in its opinion there is no contitutional way in which developers may be forced to turn over to the town gratis private ways completely installed, at the developer's expense, with such facilities as sewer, water pipes, etc.

We come now to the last three problems listed in Part I, namely:

Preventing after-built structures athwart previously planned streets or open spaces (Item 5 in Part I).

Forcing developers to construct streets in conformity with sound standards as to foundation, surfacing and drainage. (Item 7 in Part 1).

Forcing developers to conform their private roadways as to width, grade, location and direction to the layouts of the town authorities (Item 6 in Part I).

The committee indicated in Part I of this report that, in regard to these three matters, our town under existing laws either has no protection at all or has seriously inadequate protection.

At present there is no protection at all against the private land owner building on his land structures across proposed streets, ways or open spaces previously planned or mapped out by town authorities.

"The most simple and direct method of dealing with the situation in such a case would be for the municipality to take by eminent domain the location of the proposed streets before it is too late but not to prepare

streets for travel until they are needed. This plan, however, is impracticable because too expensive."

The committee believes that a method exists which is practical and constitutional for handling the situation. This method is embraced in the so-called Nichols bill, a copy of which is annexed hereto. The committee has been informed that, under the sponsorship of the Massachusetts Federation of Planning Boards, the Nichols bill, in substantially the form of the annexed copy will be introduced in the legislature this year. Substantially the same bill, we understand, was passed three times by the lower house of the Massachusetts General Court but each time failed by a small margin to pass the Senate.

In substance this bill provides that after a way or open space on private land is mapped out on a duly adopted plan of the Board of Survey or the Planning Board of a town the owner of the land is deprived of the right of thereafter placing buildings or other structures athwart such way or open space. It allows the owner, however, within one year after such plan has been adopted, to sue for compensation or damages resulting from the instant deprivation of the right to place, in the future, structures across such way or open space.

Th passage of this bill the committee believes would give to any plan of future ways that may be adopted by the board of survey or planning board one kind of real protection now lacking. The committee therefore recommends that the town at the next town meeting pass a vote approving the Nichols bill.

We come now to a second specific recommendation of the committee.

As the law stands, the town has no power to establish and enforce standards in respect to the foundation, surfacing and drainage of private ways which the developer may care to open for public travel. What materials, if any, shall go into private ways and how such ways shall be constructed are matters which at present the private developer alone determines. No power exists in the Planning Board or Board of Survey to prevent the developer's opening up for public use the flimsiest sort of private way.

As already stated, the Board of Survey Act provides that no person shall open a private way for public travel without first submitting to the board of survey suitable plans thereof in accordance with such rules and regulations as the board may prescribe.

Our town counsel states: "There is no special statement as to what rules and regulations may be adopted, . . . Whether the language of the act would enable the town boards to make rules and regulations relative to the method of construction of the way, I think is doubtful and, so far as I know, the town boards have not attempted to do this. The act, however, might be amended either so as to apply to the entire Commonwealth or so as to apply to Milton alone, to make the provision clear that boards of survey could, among their rules and regulations, include regulations as to the construction of the way. If this could be done, it seems to me that one of the particular problems of your committee would be met. The above would be somewhat new and nobody could give absolute assurance that the Supreme Court might not say that it is going too far, but at the present writing I should consider it a valid provision."

Following the foregoing suggestion of Mr. Bryant the committee has prepared with the assistance of Mr. Bryant a bill which the committee has designated the Bryant bill. This bill provides for amendments of certain sections of the Board of Survey Act in so far as the Act pertains to the town of Milton. The aim of these amendments is to broaden the scope of the "rules and regulations" which the board of survey may make so as to enable the board to make rules and regulations not only as to width, grade, location and direction of new ways but also as to "drainage and materials and method of construction."

The Bryant bill leaves the Board of Survey Act unchanged as to the nature of the penalty imposed on nonconforming developers. That is to say, if a developer after the passage of the Bryant bill, opened a private way

which was not in accord with the board of survey's rules and regulations as to width, grade, direction and location and also as to drainage, materials and method of construction, the penalty in such case would be, as now provided in the Board of Survey Act, as follows: Neither the town nor any public board could lay out such way nor could the town or any public board place any public sewer, drain, water pipe or light in, or do any public construction work or make any repairs on such way.

The committee recommends that the town at the next town meeting vote approval of the Bryant bill.

III. RECOMMENDATION OF CONTINUATION OF STUDY OF TOWN PLANNING

The eloquence of the committee's silence up to this point in its report in regard to the comprehensive Platting bill submitted to the town at three public hearings has probably been noted. We have available for any interseted persons copies of that bill and also copies of a much deleted Platting bill prepared after the last public hearing.

The committee has decided not to recommend action this year on this Platting bill in either its original or its revised form. This decision of the committee is based upon three considerations:

(1) The citizens have not yet had sufficient time to make up their minds as to whether they desire to delegate to a public body the extensive power given in the bill to the Platting Commission therein provided for; and

(2) The lawyers in and out of the town who have considered the bill appear to be too far apart on the constitutional questions raised by the bill to warrant an immediate attempt to obtain its passage by the legislature.

(3) A material part of the added protection which the committee believes the town needs and which was provided for in the Platting bill can be obtained through the passage of the Nichols bill and of the Bryant bill.

The committee believes that the passage of the Nichols bill and the Bryant bill will do much to prevent two specific evils incident to improper real estate developments.

The committee is convinced, however, that more than the Nichols and Bryant bills will be needed to assure the town of the coordinated and harmonious development which we believe an overwhelming majority of the citizens desire.

The situation, even with the Nichols and the Bryant bills on the statute books, will still fall short of that contemplated by a platting bill with its platting commission, its master plan and its provisions aimed at discouraging detrimental development.

The town will still lack the positive and inspiring standard of a comprehensive town plan to guide present and future boards of survey and planning boards in the exercise of such powers as they may have over separate or successive real estate developments.

The committee believes that a continuation of the study, through a carefully selected committee, of the general matter of town planning and of the legal problems involved therein is greatly to the interests of the town.

Rapid transit between Boston and Milton has come. A more rapid growth of Milton's population is certain in the next few years. The extensive unbuilt areas of the town more than ever before hold the keen attention of developers and prospective settlers. Shall the future growth of the town be haphazard or shall it be in accordance with a comprehensively conceived plan? If the citizens believe comprehensive town planning will be to their interests, they soon will be seeking that which a typical platting bill affords.

The committee accordingly recommends that the next town meeting pass a vote instructing the Moderator to appoint a committee to consider the matter of obtaining for Milton a town plan legally protected to the extent permitted by the Massachusetts Constitution.

Respectfully submitted,

JAMES S. RUSSELL, Chairman,
JAMES F. BALLARD,
STANLEY CUNNINGHAM,
OSCAR W. HAUSSERMANN,
FRANK A. STOUT,
Committee.

REPORT
of
COMMITTEE APPOINTED BY THE MODERATOR OF THE TOWN OF MILTON TO CONSIDER THE ADVISABILITY OF REVISING THE BUILDING REGULATIONS OF THE TOWN

The building regulations of the town, including regulations as to construction, electric wiring and fixtures, gas fixtures and plumbing are set forth in Chapters 7 and 8 of the by-laws of the town.

The first inquiries of the committee appointed to consider the advisability of revising these regulations took somewhat the following form:

> It is revision or is it enforcement of these regulations that the town needs?
>
> Or, does the town need both revision and better enforcement?

The committee has concluded that the regulations contained in Chapters 7 and 8 of the by-laws are enforced as well and as uniformly as can reasonably be expected, considering the amount of new building in Milton during the past few years and the very limited personnel and the modest appropriations which the town has afforded the departments in charge of inspection.

In connection with the precise question of whether the regulations contained in Chapters 7 and 8 of the by-laws should be amended, the committee has been fortunate in obtaining remarkable assistance of those citizens of the town best fitted to deal with the question. A special meeting was held in the small Town Hall on September 16, 1929. The committee invited to that meeting builders, architects, engineers and public officials likely to have an intelligent interest in the matter of revising the regulations in question. The attendance at this meeting while not large was fairly representative of the groups above mentioned.

At the meeting of September 16th those present were invited to state their views as to what specific regulations should be amended and as to the nature of such amendments. At this meeting, although suggestions were made as to certain revisions of minor importance, the general sentiment expressed was to the effect that the present building laws were in the main satisfactory.

Following this meeting, the committee received a written report from Mr. Lorenzo E. Young, our Inspector of Plumbing, containing suggestions as to changes in, and additions to, the by-laws relating to plumbing. The committee also received from Mr. Joseph D. Leland of J. D. Leland & Company, Architects and Engineers, an able document of some 120 pages entitled "Proposed Building and Plumbing Laws of the Town of Milton" setting forth a complete building code for the town of Milton.

Mr. Stanley Cunningham, the engineer of our committee, and Mr. G. E. Burt, the building inspector, have reported to the committee that they are impressed by the merit of the Leland code and believe that the matter should be given careful study with a view toward its adoption in whole or in part by the town. Accompanying the submission of the code was the following letter from Mr. Leland:

> "I am handing you herewith a suggested building law for the Town of Milton which is the combined efforts of my partner, Mr. Temple, and myself. We have called in professional advice and have communicated with several authorities in connection with drawing up this proposed code.
>
> I regret that it is 120 pages, but this is partly due to the fact that it is typewritten double space, but in printed form the whole would make a small pamphlet.

We have been very conscientious in preparing this data for you and the Town, and in our opinion it would serve its purpose for many years and due to the fact that the Town is growing so rapidly and will grow on account of the rapid transit which is now in operation from Boston, is necessary and is looking toward the future.

I regret that I have been several monthhs in preparing this information for you, but when I once got started I felt that the only way to accomplish what you wanted, was to go into it thoroughly.

Sincerely hoping that you and the Town will be able to use this data, I remain

Very truly yours,

(Signed) JOS. D. LELAND"

The suggested revisions in the plumbing laws submitted by Mr. Young and the code submitted by Mr. Leland are annexed hereto as a part of this report.

We feel that our committee and the town have a real debt of gratitude to Mr. Leland and to Mr. Young for their able contributions to the study of the committee on this matter. The committee believes that the matter of considering the very exhaustive and carefully worked out Leland code and the Young revisions in the plumbing laws should be referred to a special committee of engineers, architects and builders and other technically trained and qualified to advise the town as to whether the Leland code and the Young revisions should be adopted by the town either in part or in their entirety.

The committee accordingly recommends that the town vote at the next town meeting to instruct the Moderator to appoint such a committee.

Respectfully submitted,

JAMES S. RUSSELL, Chairman,
JAMES F. BALLARD,
STANLEY CUNNINGHAM,
OSCAR W. HAUSSERMANN,
FRANK A. STOUT,

Committee.

REPORT
of
COMMITTEE APPOINTED IN MARCH 1929 BY CHARLES S. PIERCE, MODERATOR OF THE TOWN OF MILTON, TO CONSIDER THE POLICY OF LAYING OUT OF HIGHWAYS AND THE ASSESSMENTS OF BETTERMENTS THEREON.

For many years previous to 1925 town ways had been laid out by the Selectmen and presented to the town for acceptance under Chapter 10 of our by-laws which provides in Section 2 "if an existing private way, the fee of which is in the abutters shall be laid out for the acceptance of the town as a town way, such way shall not be accepted unless and until the Selectmen shall have certified in writing that such way is well built, and as constructed it is equal to the average construction of existing highways of the town".

The obvious intention of this by-law was to protect the town from being called upon to pay any of the original cost of making such private ways fit for acceptance.

In 1926 the town adopted the following addition to Section 2 of Chapter 10 of its by-laws: provided however, that this Section shall not apply to ways laid out subject to the provisions of law relating to the assessment of betterments".

Since 1925 all the ways laid out by the Selectmen for acceptance, or rejection, by the town have been under the betterment act and with the assessments of betterments fixed on the basis of two-thirds payable by the abutters and one-third by the town. This division of costs does not apply to permanent sidewalks where it is one-half on each.

No private way can come before the town for acceptance, or rejection, except by being laid out by the Selectmen; and they also have the power to decide on the division of betterment costs. The town is under no obligation to accept such ways however and has in the past used its discretion freely.

During the four-year period, 1926 to 1929 inclusive, the town accepted sixteen private ways as laid out by the Selectmen under the conditions described above. These sixteen came as follows: 1926—one, 1927—four, 1928—four, 1929—seven. The total length of the sixteen is 10,607 feet, almost exactly two miles.

The total cost of rebuilding after the town had accepted them was $38,424, or about $42,000 per mile. Of this the town paid its one-third on highways and one-half on permanent sidewalks, which came to $27,866.

For the year, 1930, the Selectmen have laid out fifteen ways and recommend an appropriation of $98,106 for rebuilding them. If accepted and this amount is voted the town's one-third will be just under $33,000. The other two-thirds being eventually collected from the abutters.

The combined length of these fifteen ways is 10,327 feet; not quite two miles.

The town has at present the following mileage of streets:

Town public ways	51.14 miles
Town private ways	26. miles
State ways	5.88 miles

Based on the costs of the past four years, i. e. about $42,000 per mile, it will take about $1,100,000 to fix up the twenty-six miles existing of private ways. One third of this is about $370,000.

This is a large sum, and as it is multiplied by the opening of more and more private ways may well prove an important factor in making taxation so burdensome as to force us to give up self government and seek financial relief by annexation to Boston.

This burden can be avoided by demanding that these private ways be up to our standard before being laid out by the Selectmen; or that if laid out under the betterment act the entire cost of bringing them to our standard to be met by the abutters.

Further relief in first cost of construction whether borne by abutters alone, or shared by the town, can be obtained by causing a less expensive type of road.

For instance: These sixteen streets of 1926 to 1929, totalling two miles cost $84,000 None of them are main lines. They all were built to develop and sell off the lots of land along them.
struction more costly and more permanent than most of our main thoroughfares enjoy?

Nor does it seem appropriate to use stone curbing on the corners of these side roads. Such curbing is expensive and only needed in busy places like Milton Village and East Milton. On suburban and country roads it is often dangerous as well as unsightly.

The Committee makes no recommendation as to the percentage of costs to be borne by the abutters and by the town in cases where private ways are accepted and laid out by the Selectmen under the Betterment Act. The State law throws the responsibility of deciding these percentages upon the Selectmen. The only action which the town can take in such cases is to approve or reject the layout of ways as submitted to it by its Selectmen. The Committee, however, does recommend that in constructing secondary streets the town seriously consider using a less expensive type of road than has been used during the past four years and which has cost about $42,000 a mile.

Respectfully submiitted,
JAMES S. RUSSELL, Chairman,
JAMES F. BALLARD,
STANLEY CUNNINGHAM,
OSCAR W. HAUSSERMANN,
FRANK A. STOUT.

HOUSE . . . . . NO. 688

By Mr. Ellenwood of Reading, petition of the Massachusetts Federation of Planning Boards for an amendment of the law protecting locations reserved for public ways. Mercantile affairs.

NICHOLS BILL

THE COMMONWEALTH OF MASSACHUSETTS

In the Year One Thousand Nine Hundred and Twenty-Nine

An Act further protecting Locations reserved for Public Ways.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Section 1. Chapter forty-one of the General Laws is hereby amended by striking out Section eighty and inserting in place thereof the three following new sections:—

Section 80. The city council of a city or a town at a town meeting may by vote provide that the location of all or part of the ways not already laid out as public ways or such portions thereof as are not included in existing public ways, which are shown on a plan prepared, approved and filed by the board of survey of such city or town under section seventy-five or by the planning board of such city or town, whether such board of survey or planning board was established by general or special law, or by the division of metropolitan planning, after such notices and hearings in all cases as

are required in the case of boards of survey by said section seventy-five, shall be reserved for the location of a public way. The city or town clerk shall within thirty days after such vote cause to be filed in the registry of deeds of the county or district in which such city or town is situated an attested copy of such plan and vote. Notice shall be given forthwith after the filing of copies of said plan and vote as aforesaid to the persons and in the manner provided in section eight of chapter seventy-nine.

A plan so filed in the registry of deeds may be changed by vote of the city council or the town to conform to a new plan prepared by the board of survey or the planning board or the division of metropolitan planning after like notices and hearings to those required in the case of an original plan and in such case the city or town clerk shall cause an attested copy of the new plan and vote to be filed and notice thereof to be given as herein provided in the case of an original plan and vote.

The city or town clerk shall transmit to the registry of deeds in which a plan is filed under this section a list of the names of the persons to whom notice has been given, and the register of deeds shall cause such names, with a reference to the plan against each, to be entered in the index of grantors in such registry, and unless the name of the owner of such land at the time of filing said plan or of his successor in title shall have been so entered in the index a purchaser for value of any land reserved under this section who has no actual notice that such land has been affected by such plan shall have the same rights as if no reservation had been established under this section.

Section 80A. If the location of a way, or any part thereof, which has been reserved under section eighty is laid out as a public way, or is included within the limits of an existing public way by proceedings for widening, altering or relocating such way, no damages shall be paid to or recovered by any person for damage in his property, caused by the laying out, widening, alteration or relocation of such way, in respect of buildings, structures or additions thereto or other improvements upon his land which shall have been constructed after the filing in the registry of deeds of an attested copy of the plan and vote reserving such location under section eighty. Any person whose property has been taken by the action of any city or town under section eighty may recover the damages thereby caused by filing a petition for the assessment of such damages under chapter seventy-nine against such city or town within one year from the filing of the attested copy of the vote and plan in the reegistry of deeds as provided in said section. The filing of a plan and vote under section eighty shall not be deemed a public improvement for which betterments may be assessed under chapter eighty; but any benefit to land with respect to which a petition for damages has been filed under this section arising from action by the city or town in which it is located under section eighty may be set off from the damages to such land awarded on such petition.

If notice has not been given to any person in the manner prescribed in section eight of chapter seventy-nine that a portion of his land has been reserved for the location of a public way within seven months from the filing of the attested copy of the vote and plan in the registry of deeds as provided in section eighty and if he has not filed within one year after such filing a petition under this section for the assessment of the damages caused by such reservation, he may file a petition for damages under this section at any time within sixty days after he receives actual notice of the inclusion of part of his land in the reservation of a location under section eighty.

Section 80B. If a petition for damages is filed against a city or town under section eighty-A, the city council or the selectmen may at any time before such petition is heard and not more than fifteen months after the recording of the plan amend the plan so that no part of petitioner's property will me included in the bad of a proposed way or may institute proceedings under chapter eighty A for the taking of the rights asserted by the petitioner, and in either case the petition shall be dismissed with costs

taxed in favor of the petitioner, which costs shall, in case the petition is dismissed on account of the amendment of the plan, include indemnity for the trouble and expense to which the petitioner has been put. The provisions of chapter eighty A shall, so far as apt, be applicable to proceedings brought as aforesaid under this section.

Section 2. Said chapter forty-one is hereby further amended by striking out section eighty one and inserting in place thereof the following:—

Section 81. Sections seventy-three to eighty B, inclusive, shall not authorize a city or town to lay out or construct any way, which may be indicated on any plan, until such way has been laid out as a public way, in the manner provided by law, nor shall such sections render a city or town liable for damages, except as provided in sections eighty A and eighty B and for such damages as may be sustained under section seventy-six by reason of the making and filing of any new plan or by reason of any changes made in any plan already duly attested and filed and for such damages as may be sustained by reason of the acts of the board of survey, its officers and agents, under section seventy-nine. Any person injured in his property as aforesaid under section seventy-six or seventy-nine may recover the damages so caused under chapter seventy-nine.

"BRYANT BILL"
AN ACT TO ESTABLISH THE POWERS OF THE BOARD OF SURVEY IN THE TOWN OF MILTON

Chapter forty-one of the General Laws, in section seventy-four thereof, as applied to the board of survey of the town of Milton, is hereby amended by inserting in line four thereof, after the word "prescribe," the following: "In the town of Milton such plans shall be so prepared as to show the profiles of such way and the method of drainage of the adjacent or contiguous territory."

Section 2. The board of survey of the town of Milton shall have in addition to the powers granted to it under sections seventy-three to eighty-one, inclusive, of chapter forty-one of the General Laws, the power to alter plans submitted to said board under section seventy-four of said chapter, and in addition to the powers in said section granted, and subject to the provisions thereof, to determine the material and method of construction of Ways in the town of Milton shown on said plans, and shall indicate any modifications on said plans.

Section 3. The board of survey of the town of Milton shall have in addition to the powers granted to it in section seventy-five of chapter forty-one of the General Laws, the same powers as are granted in said section to boards of survey in cities, and plans of drainage shall be prepared under the direction of said board.

Section 4. Section seventy-seven of chapter forty-one of the General Laws as applied to the town of Milton, shall be modified by inserting in line eleven thereof after the words "width, grades," the words "material and method of construction"

Section 5. The board of survey in the town of Milton shall from time to time appoint a competent person to examine ways constructed in said town which are subject to the provisions of this act. Any person interested may make application to said board of survey for an examination of any ways so constructed, and if such ways as constructed comply with the provisions of the plans approved by the said board of survey, said board of survey shall certify such fact in writing and such certification shall be conlusive evidence of the compliance of said ways with said plans, and may be recorded in the registry of deeds for the county of Norfolk.

FUNDS HELD BY THE TOWN

Perpetual Care Fund

Amount held December 31, 1929 . . . . . $83,029.50

This fund is held by the Town Treasurer in accordance with Chapter 82, Sections 15-18, of the Public Statutes.

Jason Reed Fund

Amount held December 31, 1929 . . . . . $2,626.67

The interest on this at the rate of 4½ per cent per annum is paid over to the Trustees of the Cemetery.

E. T. L. Reed Public Park Fund

Amount held December 31, 1929 . . . . . $6,206.30

Extract from the Will of Elizabeth T. L. Reed

"All the rest, residue and remainder of all the moneys remaining in the hands of said Executor or Administrator, I direct shall be divided into three equal parts.

"The second of said parts shall be paid to and deposited with the Treasurer for the time being of said Town of Milton, the same to be received, held and invested by said town as a fund, to be known as the "Jason Reed Fund," and the income thereof shall be applied to the preservation, care, improvement, or embellishment of the said Milton Cemetery.

"And the third of said parts shall be paid to said Town of Milton and the same shall be applied by the proper legal authorities to or towards laying out, improvement or ornamentation of a Public Park or Parks in said town, in such manner as said authorities may deem advisable.

"I make the foregoing bequests in favor of First Parish, the Cemetery and the Parks in said Milton, both on account of the deep interest taken by my father, the late Jason Reed, deceased, in the affairs of said town, and of my own profound desire for the welfare of said town and of the citizens thereof."

Mary L. Peabody Fund

Amount held December 31, 1929 . . . . . $5,177.50

The clause under which this bequest is given as follows: "To the Selectmen of the Town of Milton, Massachusetts, $5,000, to be invested and the income thereof to be distributed annually to the poor at Christmas."

Funds for Improvement of Cemetery

Dec. 31.	Sarah G. Vose Fund	$1,170.63	
	E. G. Tucker Fund	1,168.48	$2,339.11
Invested as follows:			
	Blue Hill National Bank, Savings Department	$1,170.63	
	Blue Hill National Bank, Savings Department	1,168.48	2,339.11
"Herrick Fund,"	45 shares common stock, Saco-Lowell Shops		
	22 shares second preferred, Saco-Lowell Shops		
	Blue Hill National Bank Savings Department		$5,000.00

William B. Weston Bequest

The $6,000 Hospital Fund left with the Massachusetts Hospital Life Insurance Company with accrued interest to December 31, 1929, amounts being added on that date for the past year.

The $15,000 Poor Fund left with Francis C. Welch, Trustee, is held in the Weston estate, the Boston Safe Deposit and Trust Company now being Trustees, no principal or interest having accrued.

REPORT

OF THE

SCHOOL COMMITTEE

AND THE

FIFTIETH ANNUAL REPORT

OF THE

SUPERINTENDENT OF SCHOOLS

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of the Town of Milton:

The School Committee submits herewith as its main report the report of the Superintendent of Schools, to which it invites your careful attention.

The Committee acknowledges with pleasure the receipt of the following gifts to the several schools as indicated:

High School

Picture—Grand Canyon of Arizona—painted by Thomas Moran—Class of 1929.
United States Flag for Senior Room—Daughters of Veterans of Civil War, Emma Forbes Ware Tent.

Belcher School

Bulbs—Milton Garden Club.
$50—Belcher School Association.

Collicot School

Bulbs—Milton Garden Club.
$50—Vose School Association.

Vose School

Bust of Colonel Charles A. Lindbergh—Classes of 1923, 1929, and Grace Woodbury.
Bulbs—Milton Garden Club.

Glover School

Bulbs—Milton Garden Club.

Wadsworth School

Bulbs—Milton Garden Club.

Tucker School

Bulbs—Milton Garden Club.
Radiola—Tucker School Association.

After careful consideration of the estimated cost of maintaining the schools during the year 1930, your Committee recommends the appropriation of $313,390. (Harriet Whittier and Arthur W. Vose dissenting).

Respectfully submitted,

HAROLD B. GARLAND, Chairman,
ARTHUR W. VOSE, Secretary,
CHARLES C. GILMAN,
EDWIN F. WEBER,
GEORGE F. MOULTON,
HARRIET WHITTIER,

School Committee.

January 13, 1930.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Committee of Milton:

In public school education I believe we know where we are going and we are making good progress on the way. The aim and the policies which guide us toward its achievement were set forth in my annual report to you a year ago. A further interpretation of these at this time may aid in understanding my recommendations and what has been accomplished during the fiscal year 1929.

For every pupil in the schools so to develop his capacities that he may realize his best life, is the aim toward which all activities are directed.

The studies of the classroom, instead of being mere learning of facts as preparations for living in a community supposed to stand still, are used as means to help boys and girls to develop poise and balance among changing conditions of living.

The people of Milton are aware of the fact that the school population is steadily and rapidly increasing, since this condition has been brought to their attention in many ways during the past ten years or more. The full significance of the increase from year to year and its relations to the development of individual children has not been understood so readily, and yet that significance is of vital concern to each parent whose child is daily attending one of the schools.

Instead of a number of small schools we have a system of large schools. The child no longer knows all of the children in his school by name and personal characteristics, but finds himself one of a large community under the same roof, in which it is possible for him to know intimately only a small group into which he is placed by choice or circumstances.

In these changed surroundings it need not cause surprise if there is apparent in boys and girls an attitude which indicates a lack of willingness to accept personal responsibility, but on the other hand a readiness to take all of the privileges afforded by present day conditions. The principle of standardization for mass production taken from industries and forced into schools because of constantly increasing enrollment, if not the cause of this attitude, has provided a fertile field for its growth. Children are born into it and do not know the limitations experienced in the school days of the generation which is now judging them. Those in charge of their education are aware of this attitude which has come as a greater problem with larger schools.

The way out which affords most hope is the trend in education toward the individual child as the center. In the medium of the school his purposes and ambitions with their responsibilities may be given opportunity for development to the limit of his capacity under guidance of his teacher and public opinion of his school community so that he may realize his best life.

This trend in our school system is evident in the removal of grade restrictions for those whose abilities make it possible for them to progress more rapidly than would be possible in the traditional grades; vocational and educational guidance for pupils above the sixth grade; and the individual follow-up work in school health service.

This will have much to do with the question of whether a child comes to the end of his school experience aware of his talents, his interests aroused, with certain special abilities developed, and a wholesome outlook on life in general; or with an attitude of defense developed through days and years of failures and discouragement.

Health Education

Health education in Milton is at a stage of progress which calls for a clear-cut recognition of the policy in line with which its several activities are functioning.

In common with communities throughout the State we are pleased with the gradual increase in the span of life expectancy. The decrease in total number of deaths from all diseases since 1900 has been commonly understood to mean that one may expect to live a few years longer than he might have thirty years ago

In this belief lies a danger. The chief factor in this remarkable decrease in death rate has been the reduction in infant mortality. The death rate of children under five years of age has fallen to a very gratifying degree. On the contrary that of men and women over forty-five years of age is increasing in a manner that compels general interest. Investigation shows that degenerative diseases, those which appear about middle age as the result of breaking down of tissues of the body affecting action of vital organs, are increasing. Most of these are the development of early defects and habits of living which are wearing down the natural resistance of the body over a period of years until the breaking point is reached.

Constructive defense lies in an awakened appreciation of the conditions and a long range program persistently carried on.

It is our policy in health education to work with all organizations and individual interests in Milton engaged in promotion of good health to secure removal of all remediable defects in children, to aid in building up bodily resistance to disease, and to help establish sound habits of living. It is our belief that the extent to which these are accomplished will determine in a large measure the continued good health of those who are passing through our schools.

The starting point of our health work is the physical examination by the school physician each year in school for all children, and follow-up by the school nurse to secure the aid of parents and family physicians Through this means parents are provided with knowledge of the physical condition of their children and urged to take the necessary steps to make them physically fit for well-rounded living.

Physical education activities in the open-air, whenever possible, in the gymnasium and classrooms contribute to bodily health through muscular exercise.

A group of those children whose physical condition is such that they are not able to stand up under the regular school routine are given special care in the Fresh-Air Room. Treatment of children in this room differs from that afforded in the regular classroom in several ways. There is more direct outdoor air and sunlight. There are rest periods when the children are permitted to lie upon cots, each child having his own blanket. Midday meals of carefully selected and prepared food are provided at cost and children remain at the school. Pupils are weighed every week, since weight progress is one indication of physical improvement, and the result is recorded on large progress charts. Some additional attention is given by the school health service Under this regimen pupils are able to continue their school studies while regaining normal health.

An indication of the results obtained in this group during the few months that the room has been in operation will be found in the reports of the School Physician and School Nurse.

REPORT OF SCHOOL PHYSICIAN

My dear Mr. Turner:

The work of the School Physician for the year 1929 has consisted of daily visits to each school, and the yearly physical examination of each boy in attendance in the school system. All girls are examined by the women physicians. The daily visits have required at least two hours, during which time he has cared for children sent to him with various illnesses. Some have been isolated because of contacts with other children who had contagious diseases, and others have been recommended to the care of their family physicians. The general health of the school children has been excellent, and it is believed that a minimum of time has been lost because of sickness.

These daily visits to the schools enable the school physician to detect "bad coughs, sore throats, etc.," in the early stages. Exclusion of the children so affected results in a minimum spreading of disease. Parents are urged to pay especial care and attention to sickness of their children in the early stages. Prompt detection of sickness and early instigation of treatment will shorten the length of the sickness and reduce the economic loss both to the child and the school system. When there is doubt as to the nature of the sickness the family physician should be called and his advice followed. If there is any question of a contagious disease being present, the child should not be sent to school without medical advice. To do so may spread the disease to scores of other children.

During the past year approximately 4700 children have been seen for special examination, of which number 83 have been excluded from school, or 1.8%. The cause of exclusion have been impetigo contagiosa (running sores on face and hands), pink eye, severe colds, sore throats, and contact with contagious disease. For the most part exclusion has been only for a day or two.

During the football season the School Physician was in attendance at all home games, and gave first aid treatments as required. No sport requires more care of its performers than does football. It is a rugged, hard-fought game, and injuries are bound to occur. By proper physical conditioning and examination, fitness to play is determined and injuries minimized.

This past year has seen the opening of the "sunshine, fresh-air room" at the new Collicot School. In this room sixteen pupils have been in attendance since September. They are the underweight children with poor appetites, who tire quickly, and who lack the vitality of other children. In the sunshine room these children are never forced to the fatigue point. Their tolerance for school work is easily determined, and proper rest periods given. The room is equipped with cots and blankets, and in seasonable weather these are placed on the balcony in the open air. It is extremely gratifying to note that all sixteen children have gained in weight, varying from one-half pound gain to a five and one-half pound gain. The average gain has been two and one-half pounds for a period of three and one-half months. On the basis of a normal gain of five to six pounds per year between the ages of six and twelve years, it can be seen that the results are most favorable. These children receive morning lunches and a hot noon-day meal at the school.

The local Board of Health has again this year immunized hundreds of children against dipththeria. The ravages of this dread disease are well known, and all parents are urged to cooperate in this movement to eradicate diphtheria from Milton.

Finally, last June saw the inauguration of the pre-school examination of children. At that time approximately one hundred fifty children about to enter school in September were examined for remediable defects. For the most part the defects consisted of dental caries, and enlarged, diseased ton sils and adenoids. This pre-school examinaton is of vital importance, and it is hoped that this coming year a large number may be examined before

the opening of school Only by early recognition and prompt attention to the remediable defects can the health of the child be improved to the end that we may have one hundred per cent physically-fit first graders.

Yours truly,
CHESTER L. GLENN, M. D.,
School Physician

December 31, 1929.

REPORT OF SCHOOL NURSE

My dear Mr. Turner:

I should like to submit this annual report of health work in the schools of Milton as an appeal for more active cooperation of parents and friends rather than a mere statistical list of facts. The actual health work in itself really varies little from year to year. Always we are confronted with the question of the underweight child, the child handicapped by physical defects, and the child who is an emergency for the moment only,—incapacitated temporarily by some injury.

This last group is taken care of immediately of course and during the year comprises a goodly number. A superficial injury is cared for by the School Nurse or School Physician. If it proves to be of a more serious nature the child is taken home and the parents are advised to call in the family physician. There is little doubt that this group is given every attention at home and no effort is spared to put the child on his feet again.

But what about the child who goes about day after day apparently in good health, perhaps a little below par, a little tired and with a languishing appetite, not exactly in a robust condition and yet not ill? And again the child who is 10%, 15%, or 20% under weight? What are we doing? What are parents doing?

When the schools opened in September each child was given a thorough physical examination, and each child's teeth were examined by the school dentist. After these examinations had been completed the health card of each child was checked up. In any instance where a physical defect was marked as needing attention a report was sent home to the parents. Some of these reports receive immediate attention at home and are checked up with the family physician, which is, of course, all that is expected. We realize that doctors do not always agree on certain defects. If the family physician is consulted, of course his advice is to be followed.

Our concern lies chiefly with the child who is marked year after year on his physical record card as needing attention. Report after report is sent home and perhaps personal visits are made and still no action is taken. Each year this child's health becomes more of a handicap and his studies must necessarily suffer. Perhaps what started as a very small defect and might easily have been remedied in its early stages may develop into a defect of major importance. For instance, a child with diseased tonsils may apparently be in good condition but the poison may go through his system causing very serious difficulties and even affecting his heart Our plea is for these children that they may be given the chance to face life physically fit.

Aside from the examinations given by the physicians and dentist this fall the ears and eyes of each child were examined. This year the ears of the children in all grades above the second and through Junior and Senior High Schools were examined with the audiometer. All children not passing the test the first time were retested under the most favorable conditions possible. Reports were sent home to the parents of those who still were unable to pass the test. The teachers were given a list of these children in order that they might have the advantage of a front seat and that what might result from inability to hear would not be attributed to inattention or dullness. Of the one thousand pupils who were examined in the

Junior and Senior High Schools thirty-seven were found to have defective hearing in one or both ears. We are hoping that parents who received these reports will see that their child is examined by a competent ear specialist. It may be simply that a little wax has gathered or it may be something of a far more serious nature.

We examined the eyes of all pupils in the Junior and Senior High Schools, which constituted the same number, and of this group fifty-one were found needing attention. Here again notices were sent home. The eyes of the pupils in the lower grades were examined as usual.

The underweight children also present a very definite problem. The large percentage included in this group calls for attention. In one large school alone over fifteen per cent of them are underweight, anywhere from five pounds to twenty pounds.

In the schools we are trying to impress upon the child the few simple habits of healthful living, such as:

1. Get plenty of sleep
2. Eat vegetables
3. Drink milk
4. Attend to body elimination
5. Play out of doors
6. Take a bath oftener than once a week
7. Brush teeth
8. Get plenty of exercise

These health rules are being correlated with other studies wherever it is possible. But is the child practicing these habits at home? Above all else is he getting the sleep that he needs?

Mid-morning milk is furnished in the schools. We feel that some benefit is derived through this channel, but no amount of milk will make up for loss of sleep.

Last spring we spent a considerable amount of time and thought in arranging for some of the boys and girls in Milton to be sent to camp for at least part of the summer. Many of the children who could not go otherwise, but who needed the change, enjoyed the camp life through the generosity of special organizations.

This year marks a new epoch in the health work of the schools through the organization of the Fresh-Air Room in the Collicot School. Here for the first time we have ideal surroundings for the child who needs a little extra care and supervision in his daily routine living,—a room in which sunshine and fresh air abound. At present there are sixteen children who are having every advantage this room can offer. Each child is furnished with a folding cot and, when the weather permits, the rest periods are taken on the balcony adjoining the room. The children remain in school until 2:45 P. M., under constant supervision. At noon they are served with a hot lunch. In the three months that this room has been in operation the average gain has been two and one-half pounds per child. The greatest gain that any one child has made is four and one-half pounds. In no instance has a child lost.

Our general aim is to teach the child how to be well and how to keep well,—to see that each child in the classroom is as near physically fit as is possible that he may be in perfect condition to grasp the academic facts which his teachers are trying to give him.

Through the pre-school clinics which we held last June and which we shall hold again this coming summer we hope to enter the child in school free from any remediable defects. In this way we feel that each child is having a fair and even start and also we feel very strongly that it will help solve the retardation problem.

We may discover certain defects through these yearly examinations and our teachers may present the health rules in ever so clear and attractive a manner, but all of our time and efforts are useless unless we have the interest and cooperation of the parents to the extent of remedying

these defects, and insisting that the child put into every day practice the knowledge that is learned in the classroom concerning his own personal health and ultimately the health of the community.

BARBARA ROBINSON,
School Nurse

December 31, 1929

Dental Service

The need for additional dental service has a direct relation to promotion of health among the children now in our schools and to the long range program for continued good health.

Heart disease is the leading cause of death among those causes which are increasing in the group of individuals over fifty years of age. From 1850, when statistics were first obtainable, the upward trend has been persistent. That defective teeth are a contributing cause of heart disease is a fact agreed upon by both dental and medical professions.

Education in care of teeth through removal of defects and establishing daily habits during school years will have far reaching effects in checking the upward trend in heart disease as well as of other diseases that are frequently caused by defective teeth.

With twenty-eight hundred children in the schools we are limited to the same amount of dental service as was provided for sixteen hundred when it was started eight years ago.

The School Nurse is assisting in dental service. Since it is generally recognized that there should be a nurse for every fifteen hundred pupils, it is evident that more than her full time is needed in her own field.

Employment of a dental hygienist has been recommended to the Board of Health as an economical way to bring up the dental service to meet the needs of increased enrollment in the schools. This has their unanimous approval and their budget has been increased to meet the cost of a program worked out in joint conference of the Board of Health, the State Department of Public Health, and the Superintendent of Schools.

Details of School Dental Clinic work are found in the report of the School Dentist.

Our school health program is intended to encourage removal of causes of the lack of good health, teach health information, and secure development of daily habits of living that will promote healthful living on the part of each child.

REPORT OF SCHOOL DENTIST

My dear Mr. Turner:

I am pleased to submit to you the following report relative to the Dental Clinic operated in the Vose School.

During the past school year the Dental Clinic was open for sixty-five days and 452 appointments were made for pupils during that time. There were 233 different pupils seen and corrections made on their teeth. Of that number one hundred twenty-six pupils were discharged as finished.

The following is a list covering the actual work accomplished at the Clinic:

Extractions	137
Prophylaxis	141
Amalgam Fillings	187
Cement Fillings	112
Root Canal Fillings	1
Temporary Fillings	11

A complete dental examination was made of the entire school population during September and October and the various notations were recorded on the health cards.

The Massachusetts Department of Public Health held a meeting at Bridgewater Normal School relative to Dental Hygiene problems in the public schools. The matter of getting more parents and children interested in the work was discussed, also ways of getting the younger school children as near one hundred per cent correct as possible. This goal may be attained in Milton only through educational, as well as corrective, measures.

Respectfully submitted,
WILBER H. MORRILL, D. D. S.
School Dentist.

December 26, 1929

REPORT OF PRINCIPAL OF HIGH AND JUNIOR HIGH SCHOOLS

My dear Mr. Turner:

The enrolment of the Junior and Senior High Schools of Milton has sustained a normal and wholesome growth during the past year. Happily the increase in numbers was foreseen. Preparations averted serious crowding. Special rooms were utilized for academic work.

	Enrolment December, 1928	Enrolment December, 1929
Grade VII. —	215	216
VIII. —	210	212
IX. —	186	209
X. —	162	194
XI. —	148	143
XII. —	98	108
P. G. —	8	3
Total —	1,027	1,081

There is reason to believe that improved transportation facilities will accelerate growth in the immediate future.

The increased enrolment required the addition of two teachers to the staff. Seven teachers resigned,—three were married, three moved to other positions, one retired.

The auditorium and gymnasiums are used daily after school. The auditorium is used many unassigned periods during the week for rehearsals and class projects. The small size of rooms in the latest addition to the building hampers the use of these rooms for normal or large classes.

Standard Tests

Research in activities of secondary schools has made such commendable progress in analyzing and standardizing achievement that schools which fail to utilize standard tests lack valuable information that can be made accessible.

The results of the use of tests and scales in many high schools prove that they contribute abundantly to efficiency. A school in which a testing program is operated judiciously is certain to be more potent than a school which has no objective scales to supplement the subjective observations and judgments of teachers.

Teachers are educational engineers. They should know the quality of their material before the stress of actual use. They should examine frequently and accurately to ascertain the effectiveness of their classroom pro-

cedures. At the close of each unit of work before pupils are released or transferred teachers should have meaningful comparisons of achievement.

A systematic program of standardized educational measurement has been installed at Milton High School. Intelligence tests have been given throughout the six upper grades. However, the major emphasis has been focused upon subject, diagnostic or analytical tests. The purpose of these tests has been to reveal specific inabilities in any phase of a subject in order to determine trial remedies and to analyze complex abilities into simpler abilities.

Mention was made in the report of last year concerning a battery of standard subject tests which was used. During the latter half of the school year following remedial instruction inventory tests of equal difficulty were given. The resulting medians of these are in the following table. Altho it is interesting to compare the Milton results with the figures from other communities, it is much more illuminating to note the progress made by the various divisions. It is exceedingly fascinating to follow the progress of an individual pupil through this testing procedure.

Tests under Roman numeral I were given in the Autumn. Tests under Roman numeral II were given the following Spring. The Language Usage Test was taken from Providence. The other tests have been given throughout the country. Wherever nationwide digits have been omitted no comparisons were available.

The program of standardized tests in English was continued in the Autumn of 1929. The phases chosen for composite analysis and remedial instruction were Grammar, Capitalization, Punctuation, Sentence Structure, and Vocabulary. The tabulations of the vocabulary tests have not been completed. The highest possible scores were Grammar 30, Capitalization 28, Punctuation 30, and Sentence Structure 24. Achievement follow-up tests of equivalent difficulty will be given during the latter half of this school year. Comparisons with nationwide medians are accessible.

Ability Grouping

An endeavor is made in our schools to section pupils into divisions of like educational attainment. Wide spans of educational or mental age are injurious. It is a grave injustice to place a pupil in a section in which the level of school work makes no demand on his real abilities. It is equally unfortunate to place pupils with low mentality with groups two or three years beyond them mentally. Occasionally it is possible to classify pupils in divisions according to demonstrated abilities in individual subjects. Ability grouping is a great boon to pupils. A bright pupil must keep busy in order to compete with his comrades. A slow pupil can understand the recitation and consequently is more interested. The joy of accomplishment is a great incentive. The satisfaction of succeeding as well as other members of the class builds self-reliance and morale.

Milton is one of a few communities which have an unusual proportion of college candidates. A comparison with certain larger communities concerning the number who take College Entrance Examination Board examinations discloses the disparity.

High Schools	1929 C. E. E. B Candidates	Population 1928
Everett	16	43,000
Fitchburg	9	45,000
Haverhill	18	49,000
Holyoke	19	60,000
Lawrence	19	93,000
Lowell	17	114,000
Malden	29	53,000
Quincy	27	67,000
Worcester	28	197,000
Milton	31	15,000

There is evidence to indicate that this condition will continue. There is a vital need for more college scholarships available for Milton High School pupils. Last June there were four excellent candidates for the Massachusetts Institute of Technology. There was only one scholarship. Next June another group of able deserving pupils will be candidates for the same institution. Every year there will be able, conscientious, well prepared college candidates who will need financial assistance.

It is generally recognized that carefully selected teachers of experience are an incomparable asset to any community. A Table indicating the teaching experience of the teachers in this building is presented.

No. of years of experience	No. of teachers with total experience	No of teachers with experience in Milton
25 years or more	7	3
20 to 24 years	3	4
15 to 19 years	6	1
10 to 14 years	10	6
5 to 9 years	18	6
4 years	2	4
3 years	4	4
2 years	—	6
1 year	—	7
0 year	—	9

The median of total teaching experience is 10 years
The median of Milton teaching experience is 4 years
The average of total teaching experience is 12 years
The average of Milton teaching experience is 7 years

Municipal subsidy of athletics has not been maintained since last January. An interpretation of the state auditors seemed to render such support illegal. The financial status of high school athletics is in a very precarious condition. There are heavy annual liabilities which must be paid. The one source of revenue is totally inadequate. Unless financial relief is accessible in the immediate future football and baseball as school sports will have to be abolished. It is impossible to conduct sports properly safe-guarded and in a dignified manner without revenue. Curtailment of national sports would be unfortunate. The whole program of extra-curricular activities offers to pupils the opportunity to invest their talents and abilities in school situations which are prototypes of life situations. In fact, academic classroom procedure is gradually changing to a type of activity that supplants artificiality with an atmosphere of reality in which children delight to work. The saturation point in extra-curricular activities will not be attained until every pupil is participating in a form of activity the primary function of which is to develop his moral qualities.

It is a pleasure to work among a corps of teachers who not only are imbued with professional spirit but are encouraged to improve professionally. It is a delight to have teachers accept the challenge of youth with vision, resourcefulness, and effectiveness which may be ascribed to close communion with progressive phases of education.

Respectfully submitted,
GEORGE C. MARSDEN.

School Costs

The composite of all for which the annual appropriation for support of schools is expended is the medium in which public school education takes place. It includes teachers, schoolrooms, equipment, supplies, janitors, and all of the influences with which a pupil comes in contact in the course of his school life.

A pupil absorbs impressions from this medium as surely as a photographic film registers the imprint of the objects, moving or still, to which it is exposed. That which he learns indirectly, frequently is of more importance in developing attitudes of character and wholesome living than what he learns from direct classroom teaching.

The standard of public school education in Milton is but another name for the degree to which this medium approaches the best for development of our boys and girls. Beyond efforts to eliminate waste through possible improvements in methods, I do not see how retrenchments can be made in school costs without lowering the standard.

There are forces operating which require an increase in the budget each year to maintain the same standard. The first is the steady increase in number of pupils. The addition to our system of one hundred and fifty to two hundred annually requires expenditure of more money for additional teachers, equipment, supplies, and other items of the budget. The second is the annual increase in salaries of teachers who are giving satisfactory service, until the maximum of the schedule adopted in 1928 is reached. The third is our constantly expanding school plant which requires greater expenditures for operation and upkeep.

Any material difference between the proposed budget and the annual appropriation for support of schools must eventually result in a change of policies and lowering of the standard of our public school education.

School Plant

A modern school requires from its building and equipment the satisfaction of the needs that arise from the school program of activities. Living conditions are changing; education for living is changing; the school is a growing and changing institution. Our school plant is not an end in itself, but one of the means for carrying out the program of education that the people of Milton want for their children. To allow our school program to congeal under pressure of an unchanging form of structural materials would be to forego the best that experience and research provide for educational progress.

It is imperative from the standpoint of wise expenditure of public funds that schoolhouse construction, when it is to be undertaken, shall adequately accommodate present school activities and not impede changes that are likely to occur.

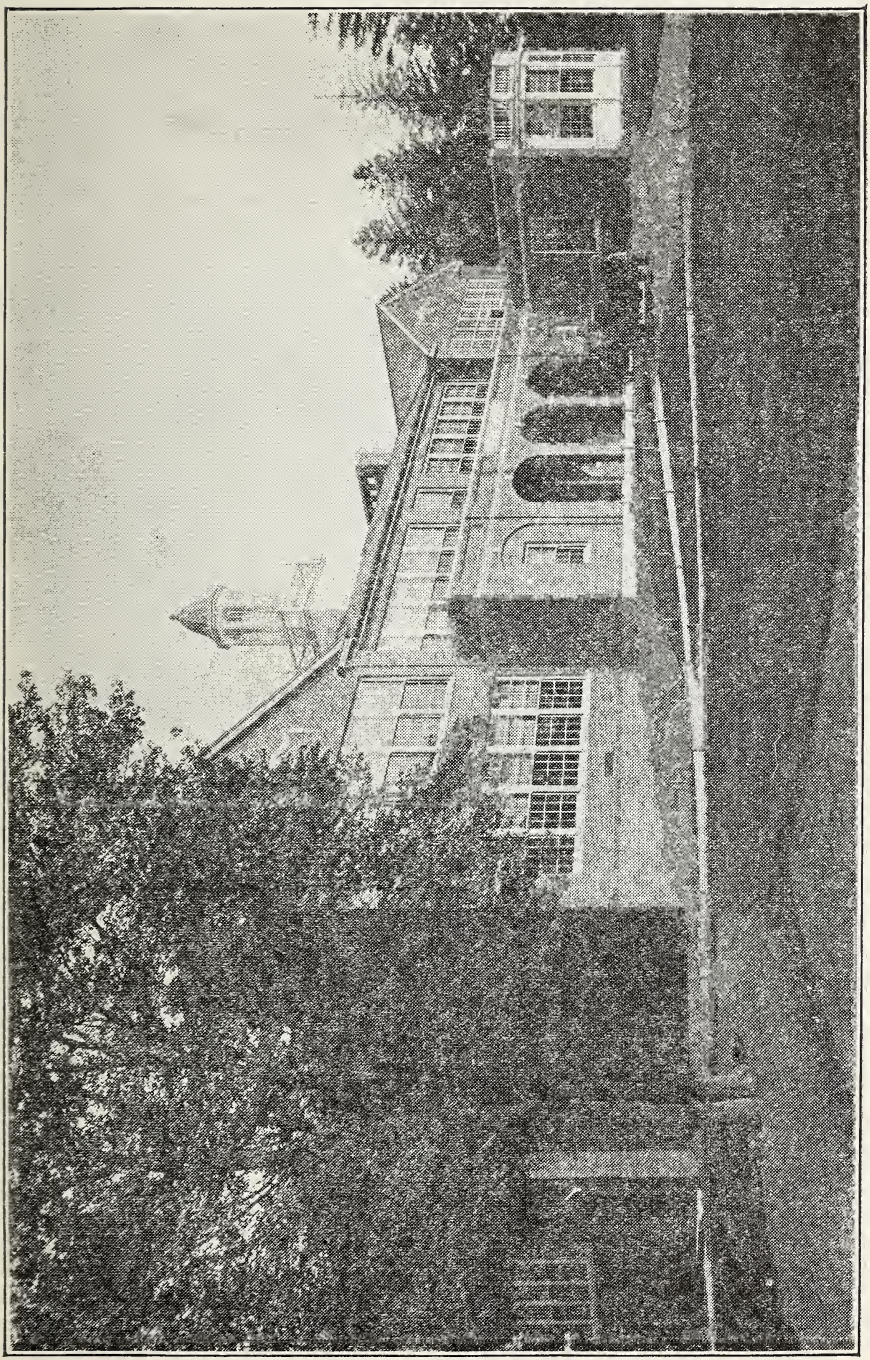
The new elementary school building on Edgehill Road, completed this year, reflects some of the changes that make for better educational service. These are apparent in provisions for safety of children, better lighting, heating, and ventilation, rooms and equipment for promotion of health, a gymnasium-auditorium for a wide range of activities, and adaptability of furniture and equipment to needs of children.

Description of the Collicot School

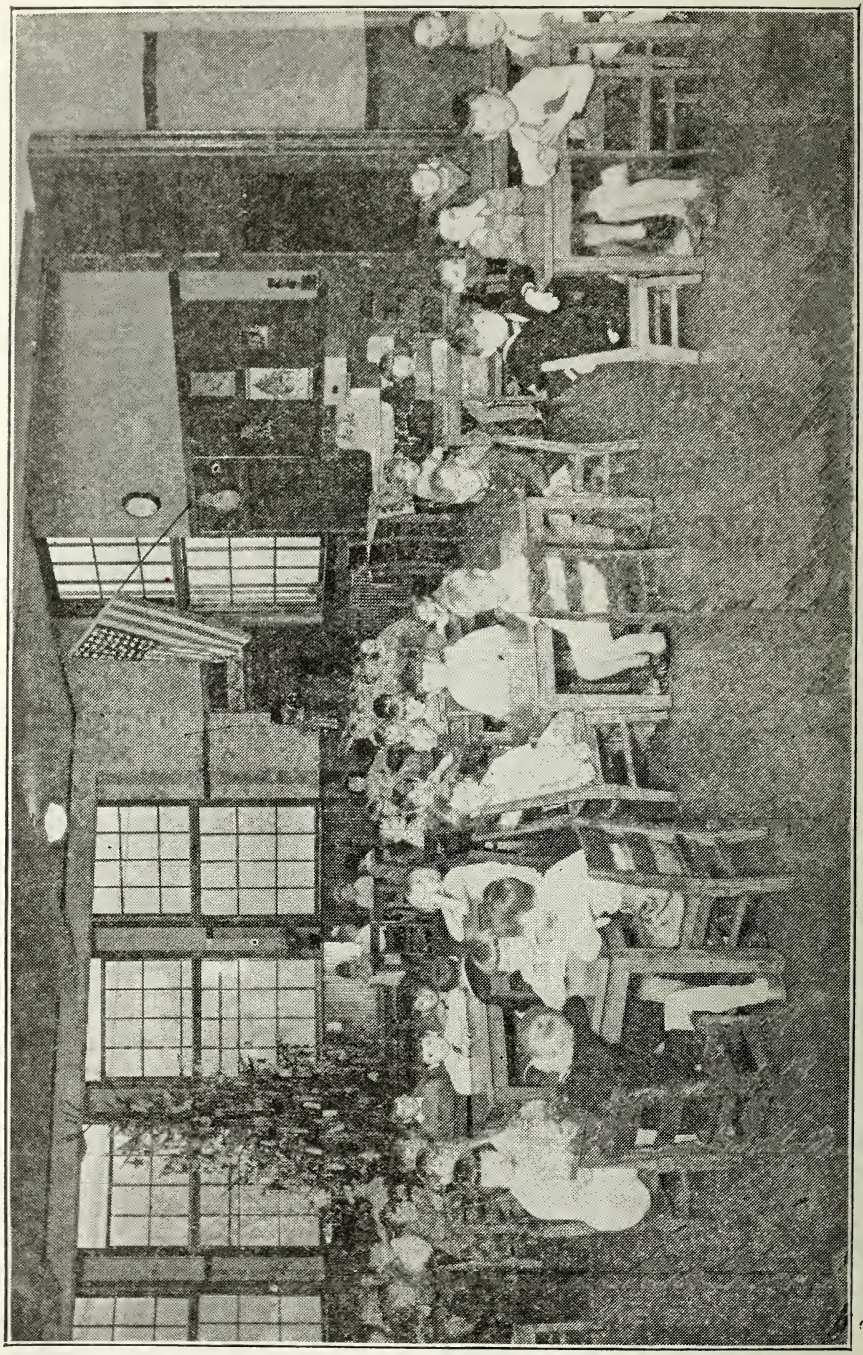
The following is taken from the description of the building by the Building Committee from the standpoint of construction.

"The Collicot School building departs from the more or less standardized form of school buildings in that it is somewhat irregular in plan in order to conform to the irregular shape of the lot. The lot fronts upon Edgehill Road and the front of the building faces that road, thus facing approximately southeast. The main portion of the building is substantially square with a wing running at a 45 degree angle substantially due north and south and parallel with the easterly sideline of the lot. In this wing are four classrooms on each floor,—three lighted solely from the east and one lighted solely from the west. The remaining classrooms are in the main building lighted either from the south or the west All of these rooms receive direct sunlight during some portion of the school day. By taking advantage of the natural slope of the ground toward the northwest, the special classrooms, such as the sewing room, manual training room, and the lunch room, have been placed in the basement in rooms which are practically wholly above the ground level.

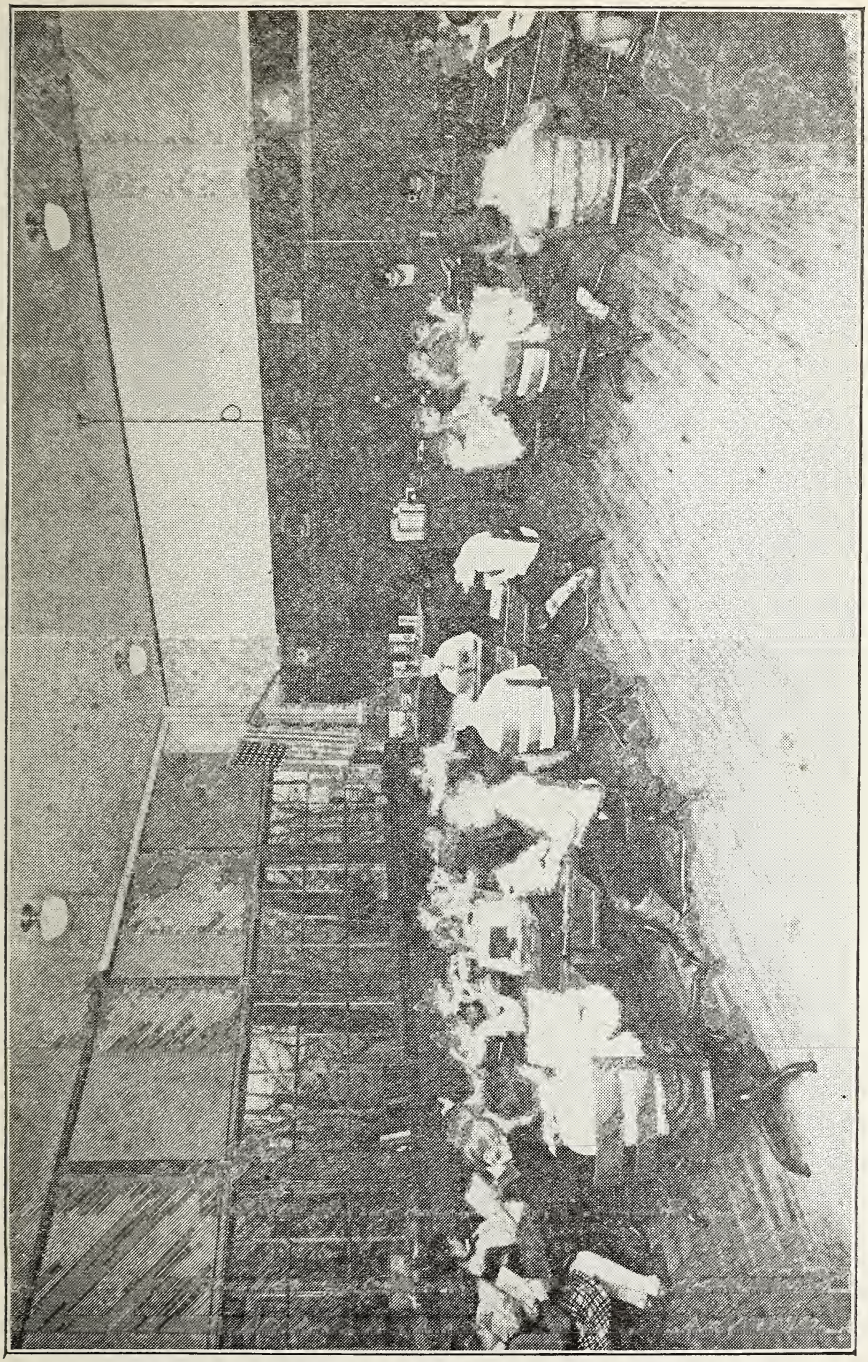
"The main entrance to the building faces Edgehill Road and is approached through an open loggia. From this loggia there is a separate entrance to the principal's office on the west end to the kindergarten suite on the east. The kindergarten suite consists not only of a double kindergarten room but of a separate coat and toilet room for the kindergarten children. Entering through the main doorway one enters the main corridor running parallel to Edgehill Road. On the right or east is the dental room, on the left or west are the nurse's room and the principal's office with its ante room.



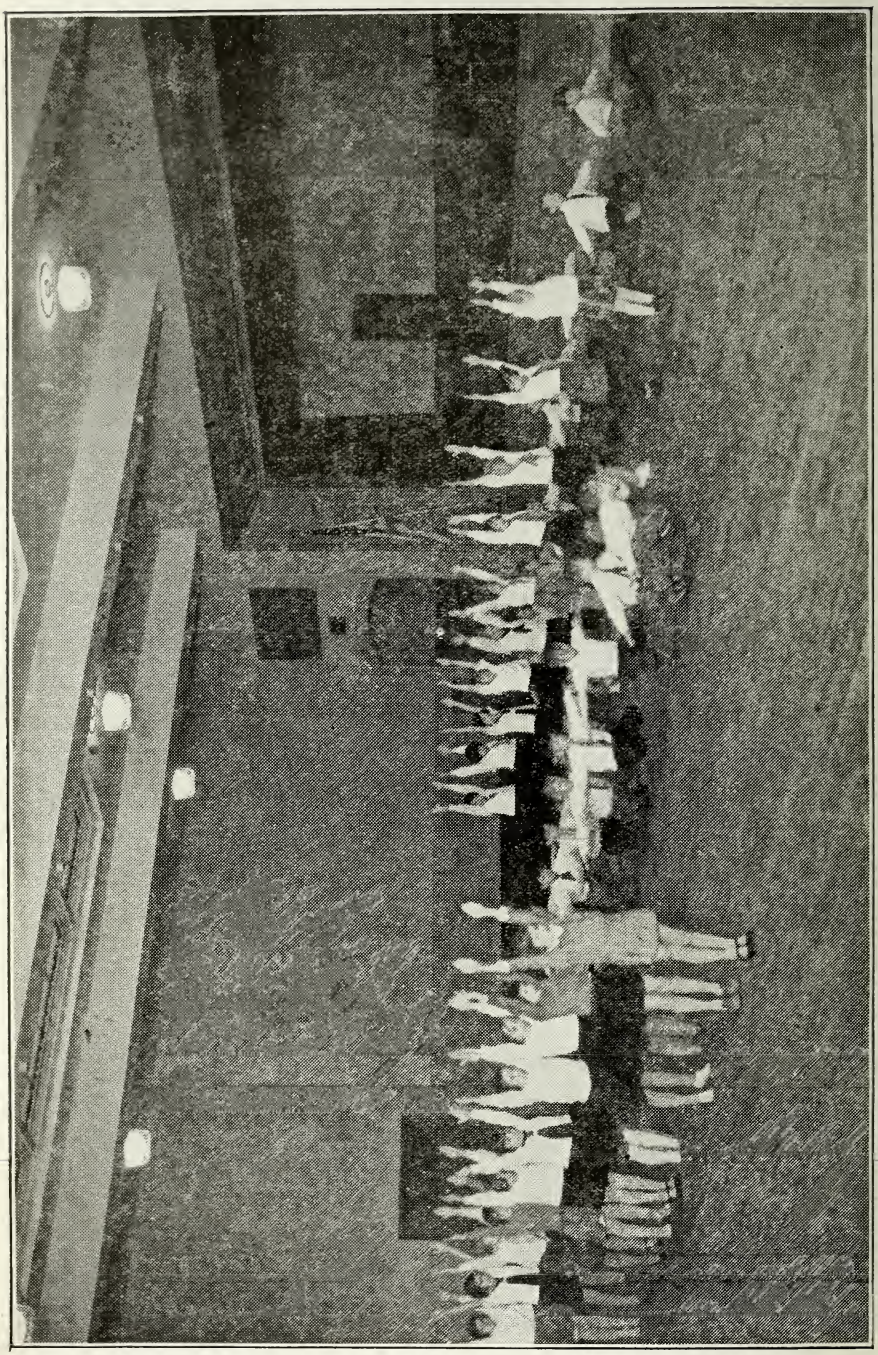
COLLICOT SCHOOL, EDGEHILL ROAD, MILTON



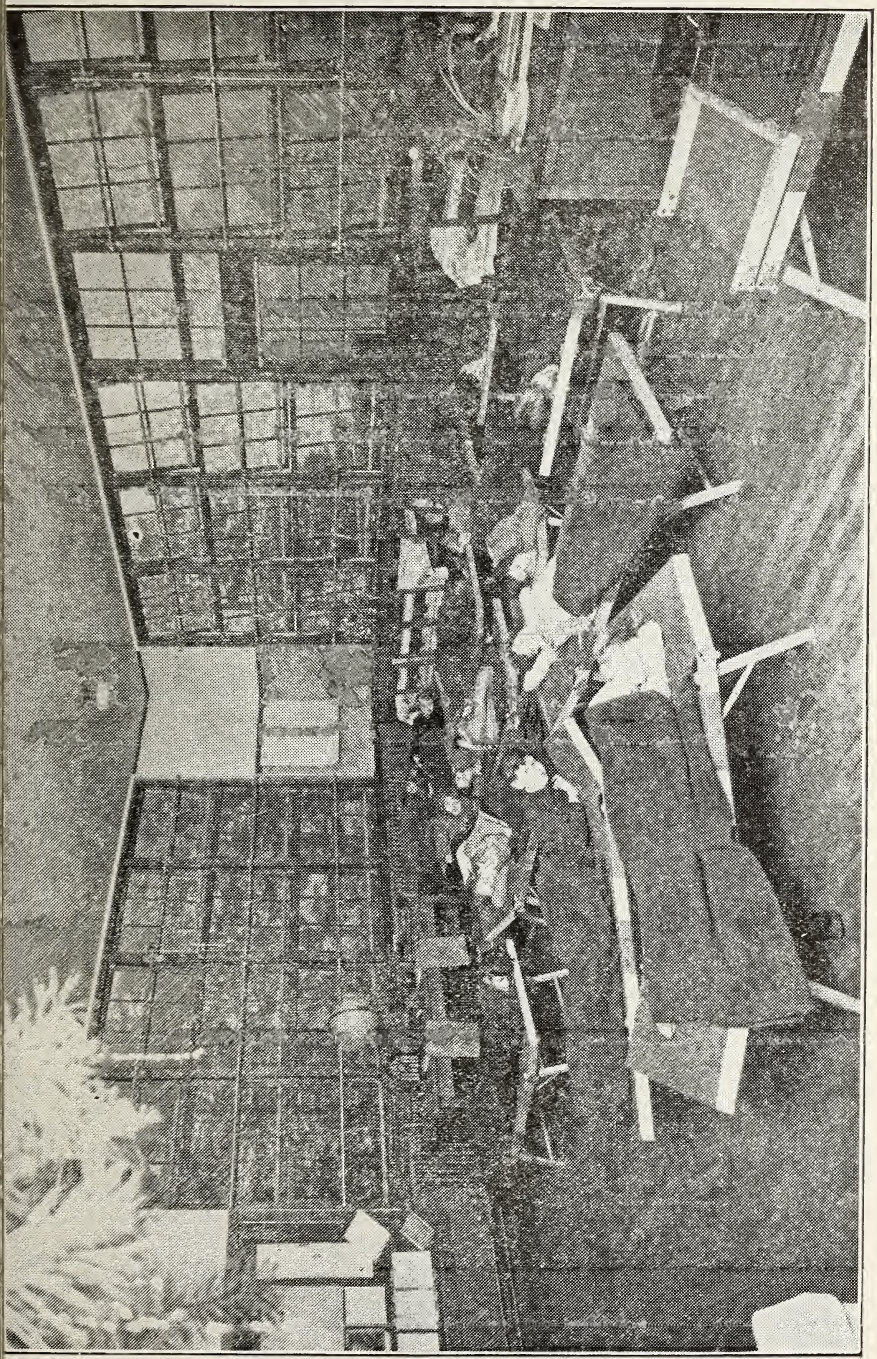
KINDERGARTEN, COLLICOT SCHOOL.



A TYPICAL CLASSROOM, COLLICOT SCHOOL



AUDITORIUM-GYMNASIUM — COLLICOT SCHOOL



REST PERIOD IN FRESH-AIR ROOM, COLLICOT SCHOOL

"Directly opposite the main entrance and across the corridor is an entrance to the stage of the gymnasium-assembly hall. This stage is on the same level as the first floor of the school building. The gymnasium-assembly hall, itself, is three feet lower than the stage and approached by three entrances,—two on either side of the stage and one from the rear. This hall is 50x66 feet in size. Adjacent is a kitchenette.

"The classrooms on the first floor, aside from the kindergarten suite, are six in number,—one in the northwest corner, one in the southwest, and the remaining four in the wing. On the second floor are eight classrooms,—four in the wing, three on the front of the building and one in the northwest corner.

"A fresh-air room is located on the second floor immediately over one of the kindergarten rooms. It has a south and east exposure with large windows arranged in banks, each window pivoted horizontally so that they may be opened to their full extent and can be adjusted to keep out the weather while still admitting the air. A door opens upon a large balcony over the roof of the kindergarten, thus providing a secluded open space with a southerly exposure.

"In each room is a built-in and ventilated Miller wardrobe for the hats and coats of the pupils of that room. This provides more economical use of floor space and a better control of the pupils.

"On each floor is a toilet room for boys and another for girls.

"There are three staircases, each enclosed in a fire-proof stair tower. One is at the west side of the building, one at the east, and a third at the north end of the wing, thus providing convenient and adequate means of egress.

"The classrooms are lighted from one side only and are in accordance with the necessary requirements for lighting.

"The heat is furnished by two tubular Hodge boilers under the low pressure vacuum system. The ventilation is through Peerless Ventilating Units in each room which draw fresh air through vents provided in the walls of the building and after warming the air deliver it into the room. The exhaust is through gravity vents exhausing at the roof.

"In the principal's office is a radio receiving set capable of receiving two separate broadcasts at once and distributing each throughout the entire building where each room is provided with radio outlets for loud speakers.

"The exterior of the building is the colonial precedent in design with red brick walls trimmed with varying shades of slate which is accentuated by a cupola."

CASE STUDIES FROM RECORD BOOK OF SUPERVISOR OF ATTENDANCE FOR THE YEAR 1929

January 11—Case I was found and taken to school.
January 12—Case I could not be found.
March 6—Case II offered excuse for absence that uncle had died, but attendance had been so irregular I took child to school.

March 12—Case III could not be found.
March 13—Case IV was found at home and taken to school.
March 21—Case V was absent without excuse. I called at home and found there was nothing wrong. Mother promised to have pupil in school the next morning.

March 21—Case VI could not be found at home during school hours. I called in vain also at eight o'clock at night
March 24—Case VII and brother absent. Brother was ill in bed. I took sister to school.

March 24—Case I and his brother absent. Mother had gone to Boston and taken one of the boys and the other one was left to care for small children.

March 27—Case VIII ran away from kindergarten. Taken back to school.

March 27—Case IX absent two days. I called at the house and found mother knew nothing about the absence. Mother and I could not find truant.

April 2—Case X was absent from Junior High for six days. I called at his home and was told that he was not there, but he was in the basement. I took him to school.

April 2—Case XI did not come to school in the afternoon. His mother had sent him to Boston on an errand. She thinks she has a right to do as she wishes with her children.

April 5—Case XII was not at home and his Mother did not know he was not in school.

April 8—Case I was absent again. Mother claimed he was at the shoemaker's in Mattapan Square. I could not find him in any of them.

April 29—Case XIII's attendance has been very irregular. I found him at home and took him to school. Apparently the mother's fault.

April 29—Case XIV was absent from school a week. Mother claimed he had no shoes fit to wear and she had no money with which to buy any.

April 30—Case XI was absent from Junior High School. I went to his home and was told that he was out. I asked the mother to produce him, which she did. I took him to school.

May 20—Cases I and XIV were both at home. I took Case XIV to the Vose School, but Case I refused to go to school. She claimed that he had no shoes and that she was away later. When I told the mother we would have to take court action, she laughed and said, "All right, go ahead, I don't care."

May 31—Cases VIII and XV were seen on the way to school, but did not report. I could not find them.

June 3—Case VIII was absent again today. He had been sent to Boston on an errand for his mother. He returned to school in the afternoon.

June 4—Cases XVI and XVII left school at recess. They were found later in the school yard.

June 7—Cases XVIII and XIX were found at home. I took them to school.

June 10—Case XX was absent. I could not find him.

June 12—Case XXI left school at recess. I found her at home and took her to school.

June 13—Case XXII Three children were kept at home in the afternoon because the mother feared the boys at the school would hurt them, but she finally allowed them to come to school.

June 24—Case XXIII was reported absent from school in the afternoon. I went to four of the swimming pools, but could not find him.

June 25—Cases XXIV and XXV were absent from school in the morning. I went to the East Milton swimming pool, where I found them, and took them to school.

September 17—Case I was at home with a boil on his leg

September 19—Case XXVI was found at home. I took him to school.

October 9—Case I's mother would not let him come to school She said she was boss of her children and did not care for the court, superintendent, or anybody else. She motioned to throw a plate at me.

October 10—Case XXVII was at home. I took him to school.
October 16—Cases XII and XV were absent. I called at their homes, but found no one in.
November 7—Case XXVIII was absent from school three days and was reported as seen out of doors. I found him ill and not in condition to go to school.
November 13—Cases I and XXIX were absent. Case I was out on doctor's orders. I could not find Case XXIX.
November 20—Case XXIX could not be found.
December 16—Case XXIX was at home with a sore throat.
December 30—Case XXIX's mother thought he was in school. I could not find him.
December 31—Case XXIX's mother sent him to school, but he did not arrive there.
December 31—Case XXX's mother had taken him down east for the holidays.

Conclusion

The attitude of all employed in our school system toward their duties is commendable. Principals and teachers frequently anticipate my suggestions for the best interests of our children. They are a fine, alert, professional group who are continually studying to contribute more for the development of the children whose school education is entrusted to them.

I appreciate the latitude which you as a Committee have given me to carry out the policies which you have approved for education of our children in Milton.

Respectfully submitted,
HORACE F. TURNER,
Superintendent of Schools.

January 13, 1930.

Appendix

SPECIAL REPORTS

AND

STATISTICS

QUOTATIONS FROM RULES AND REGULATIONS OF THE SCHOOL COMMITTEE

1. Admission to Kindergarten and to First Grade

Section 45. Children who will be five years old before January 1 of the following year may be admitted to the kindergarten during the month of September. Children who will be six years of age before January 1 of the following year may be admitted to the first grade during the month of September. Provided further that children mentally above the age requirement limit be admitted to school during the first month of the school year, or later if their residence in Milton began after the beginning of the school year.

2. Tuition Pupils

Section 69. Tuition fees at the rate of $125 (One Hundred Twenty-five Dollars) per year in the High School, $100 (One Hundred Dollars) per year in the Junior High School, and $75 (Seventy-five Dollars) per year in the elementary schools shall be paid by non-resident pupils to the Town Treasurer at the beginning of each term. Pupils whose term bills have not been paid at the end of the second week from the time the bills have been rendered shall be required to discontinue their attendance at school.

3. No-School Signal

Section 61. The signal 2-2 sounded four times on the fire alarm at—

7:15 means no school sessions for all schools for entire day.

7:30 means no school sessions for all schools below the Junior High School for the entire day.

11:40 mean no afternoon session for all schools below the Junior High School. This signal will not be sounded if the 7:15 or the 7:30 signal has been sounded. The session at the Vose School will not be affected by this signal.

The 7:15 signal will rarely be sounded, as it includes the closing of the High and Junior High Schools.

The widely varying conditions in the several parts of Milton make it difficult to reach decisions equally fair to all interests. Parents are, therefore, expected to exercise discretion in regard to their own children.

EIGHTH ANNUAL CONCERT
SENIOR AND JUNIOR ORCHESTRAS OF THE MILTON HIGH SCHOOL

School Auditorium
Friday, June 7, 1929
8:10 o'clock
Conductor, Russell A. Cook

STATISTICS OF CLASS OF 1929 MILTON HIGH SCHOOL

Total number of pupils in class of 1929—98

	Boys	Girls	Total
Colleges	11	11	22
Normal Schools	0	2	2
Other higher institutions	8	9	17
Graduate course, Milton High School	4	4	8
Total in schools or colleges	23	26	49
In business positions	20	27	47
At home	1	1	2
	44	54	98

The wide distribution of our students of this class in higher institutions may be seen from the following list:

Massachusetts Institute of Technology	4	Bridgewater Normal	1
Wentworth Institute	1	Mt. Holyoke	2
Boston University	5	Bryant and Stratton	2
Northeastern University	2	Vesper George	2
University of Maine	1	Curtis School of Aviation	1
Simmons College	4	Bentley School of Commerce and Finance	1
Pembroke College	1	Fannie Farmer's School of Cookery	1
Middlebury College	2	P. G. Course, Milton High School	3
Burdett College	4	P. G. Course, Other Secondary Schools	5
Massachusetts College of Pharmacy	1	At Home	2
Chandler Secretarial School	1	Working	47
Massachusetts Radio and Telegraph School	1	Faulkner Hospital	2
Massachusetts School of Art	1		
Notre Dame	1		

During the year 1929, many requests for pupils' service have been received. These have been for assistance in positions as follows:

Assisting Mothers	Table Service
General Housework	Stenography
Clerical Work	Insurance
Dental Clinic	Gardening
Salesmen	Radio Repair

Whole number in class of 1929	98
Whole number in class of 1929 at work	47
Number placed by help of Advisory Bureau	15
